Seminar Series presentations are considered a supplement to firefighter and Fire Officer classes offered by the Connecticut Fire Academy. Classes provided by the Connecticut Fire Academy comply with NFPA standards and best practices of the fire service. Seminar Series are also based on these standards and practices but can and often do include opinions of the subject matter experts that are delivering the presentation. Attending any number of the Seminar Series will allow the student to, not only add to their existing training; but also encourage the student to choose from the opinions of different speakers to develop their own style of strategies and tactics at emergency scenes, as well as inspire them to acquire more knowledge on fire service subjects.

2014 Seminar Series • Man vs. Machinery Incidents: Are you prepared

Man vs. Machinery Incidents: Are you Prepared

Friday February 14, 2014

Man vs. Machinery Incidents: Are You Prepared

Machinery entrapments occur all across the United States and Canada. Is your department capable of handling one?

The objectives of this program are to provide responders with the knowledge to help manage incidents involving extrication of patients from various types of machinery. Both common machinery and machinery specific to locations within your response area will be discussed.
This is a highly specialized skill set and caring for victims/patients entrapped in machinery requires providers to be trained in specific treatment modalities and the possible complications that may arise.

Tool selection, patient stabilization techniques, and crush injury syndrome will be discussed as well as several actual case studies.

Instructor Biography -
Lieutenant Mark Gregory

Mark Gregory has over 28 years of firefighting experience. He has been a Lieutenant in the FDNY assigned to Tower Ladder 111 (The Nuthouse Truck) for the past 11 years. Previous assignments as a Firefighter include Brooklyn's Rescue 2 and Ladder 132 (The Eye of The Storm). Mark instructs for the FDNY Academy as an Annual Education Day, Flashover, and Extrication Instructor. He also instructs at the Suffolk County Fire Academy and is the Lead Instructor for FDIC's HOT Program "Man vs. Machinery" which is taught by P.L. Vulcan Fire Training Concepts LLC.
