RE: **DOCKET NO. F-2007** – Connecticut Siting Council Review of the Ten-Year Forecast of Connecticut Electric Loads and Resources

Dear Mr. Coretto:

The Connecticut Siting Council (Council) requests your responses to the enclosed questions no later than May 9, 2007. To help expedite the Council's review, please file individual responses as soon as they are available.

Please forward an original and 20 copies to this office. In accordance with the State Solid Waste Management Plan, the Council is requesting that all filings be submitted on recyclable paper, primarily regular weight white office paper. Please avoid using heavy stock paper, colored paper, and metal or plastic binders and separators. A list of parties and intervenors is enclosed. Fewer copies of bulk material may be provided as appropriate.

Yours very truly,

S. Derek Phelps
Executive Director

SDP/MP

c: Council Members
Parties and Intervenors
Bruce L. McDermott, Esq., Wiggin & Dana LLP

Docket F-2007
UI Pre-Hearing Interrogatories, Set One

1. List the technologies that the United Illuminating Company (UI) has in place to monitor and communicate voltage fluctuations? Identify those transmission system conditions and actions to maintain and protect the grid and customers.

2. Estimate the total number of megawatts of load reduction for UI's territory due to the Conservation and Load Management (C&LM) program for each year from 2007 through 2016. (The number of megawatts for each year would be the sum of the existing and projected C&LM effects.)

3. Describe any new and/or innovative C&LM energy savings measures that UI has recently put into use or is considering.

4. The Connecticut Light and Power Company notes in its 2007 forecast that, "Although customers are reacting to higher energy prices by reducing their overall consumption, peak demand for electricity continues to grow." Is UI experiencing a similar phenomenon in its service area?

5. Review the 2006 report titled *Connecticut Siting Council Review of the Forecast of Connecticut Electric Loads and Resources,* and provide any comments that may be helpful in the preparation of the 2007 report. For example, are there any new topics that UI believes should be addressed in the 2007 report that were not covered in the 2006 report?
