Department of Administrative Services

Office of School Construction Grants

ACOUSTICAL PERFORMANCE CERTIFICATION

LEA	State Project No.	Facility

Pursuant to Section 10-285g of the Connecticut General Statutes, for projects authorized by the General Assembly on or after July 1, 2005, please certify one of the following statements (check appropriate box):

☐ We, the undersigned, certify that for the project identified above, all classrooms and libraries constructed or altered as part of this project have been designed to be constructed or altered in accordance with American National Standard: Acoustical Performance Criteria, Design Requirements and Guidelines for Schools, ANSI S12. 60-2002.

☐ We, the undersigned, certify that for the project identified above, all classrooms and libraries constructed or altered as part of this project have NOT been designed to be constructed or altered in accordance with American National Standard: Acoustical Performance Criteria, Design Requirements and Guidelines for Schools, ANSI S12. 60-2002, because adequate acoustical modifications cannot be made without compromising health and safety, or the educational purpose or function of a specific classroom or library. Documentation, explaining how health and safety or the educational purpose would be compromised, is attached.

☐ We, the undersigned, certify that portable classrooms are included in this project that do NOT comply with ANSI S12. 60-2002, and request the Deputy Commissioner of Construction Services waive the standard for the portable classrooms. The basis of this waiver request is the portable classroom units will be used by the same school for a period of less than thirty-six (36) months, and the local board of education has supplied notice to the parents, students and teachers and held a public hearing on the effects that required acoustical standards for classrooms may have on the students ability to learn. Superintendent of Schools letter explaining waiver request and documentation of the required notice and public hearing is attached.
