Project Name: Overdose Prevention

Project Description (max. 130 words):
*Please include desired outcome or product in your description.

The ideal intern will have an understanding of overdose prevention and drug user health. The student will market to the general public overdose prevention training services within specific communities in Connecticut and also work closely with health care providers interested in providing overdose prevention to their clients. The student will provide technical assistance on overdose prevention and drug user health.

Assist in the planning and coordination of the Over Dose Prevention Summit and assist in the oversight of the Open Access CT website and other social media platforms.
