* Maximum full-time annual salary rate for teachers and/or administrators is the highest rate of pay within the collective bargaining agreement; for superintendents, it is the highest salary that would be used to advertise the position; for teaching at any of the public state colleges or university it is the highest rate of pay based on the full-time annual salary rate factoring in the retired members credentials. For example: if someone has earned their doctorate degree, the earnings limit would be based on 45% of the maximum salary for a professor.
