INTRODUCTION

"Municipal Fiscal Indicators" is an annual publication of the Intergovernmental Policy Division (IGP) of the Office of Policy and Management (OPM). The publication consists of the most current financial information available for each of Connecticut's 169 municipalities. The majority of the data has been compiled from the audited financial reports of municipalities. The data extracted from these reports pertains primarily to the municipality's General Fund.

Connecticut Municipalities are required to have their financial statements audited at least once annually under Chapter 111 of the Connecticut General Statutes. These financial statements must be prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). GAAP are uniform standards for financial accounting and reporting; however, these standards may be interpreted differently.

This publication also includes selected demographic information relevant to, or having an impact upon, a municipality's financial condition. Some of the financial and demographic data has been calculated on a statewide basis to allow for comparisons between individual towns. Unique factors in a municipality may affect that municipality's statistics; such factors should be kept in mind when making comparisons among municipalities.

Great care and diligence have been exercised to ensure the accuracy and timeliness of the data presented in this publication. Some of this information was compiled from outside sources; therefore, its quality and accuracy is dependent upon the source of origin.

"Municipal Fiscal Indicators" is a collaborative effort on the part of all members of the Municipal Finance Services Unit of the IGP Division. We would like to thank the various parties that have provided us information used in this publication.

NOTES TO USERS

Adjustments are not made in this publication for an auditor's restatement of a prior year's financial statements.

Data for the **City of Groton,** which is a political subdivision of the Town of Groton, is included in this publication as it has been in previous editions. Certain financial and demographic information regarding the City of Groton is not available because separate statistics are not kept in all categories.

The **school enrollment data, net current expenditures (NCE) and NCE per pupil for FYE 2009 and 2010** presented in this publication, is the latest data available from the State Dept. of Education (SDE) at the time of publication. The SDE has indicated that the figures have not been completely audited and are not considered final.

Certain fiscal year 2008 revenue and expenditure items reported on the individual town pages in section D of this publication may appear at significantly higher amounts than in prior years due to the State of Connecticut's issuance of **$2 billion in pension bonds.** The proceeds of these bonds were deposited in the Connecticut State Teachers' Retirement Fund on behalf of municipal governments. This also affects certain fiscal year 2008 revenue and expenditure data presented on page A-7 of this publication. See Section D, **Addendum 1**, for more detailed information.

The Governmental Accounting Standards Board (GASB) has issued **GASB Statement No. 54, "Fund Balance Reporting and Governmental Fund Type Definitions"**. This Statement establishes criteria for classifying fund balances into specifically new defined classifications. These new classifications are not comparable to the traditional reserve/designated/undesignated fund balance classifications normally presented in governmental fund financial statements. GASB Statement No. 54 is effective for municipalities for fiscal year ended 2011; however, the **Town of Simsbury** early implemented the provisions of this GASB Statement for the fiscal year ended 2010. Page D-129 provides further detail.

SECTION A

GENERAL INFORMATION

GLOSSARY OF TERMS

ADJUSTED TAX LEVY (CURRENT YEAR)

This data represents the property tax levy for the current fiscal year less any lawful adjustments as determined by the municipality. It does not include prior years' tax levies. This data is derived from a municipality's Tax Collector's Report.

AREA IN SQUARE MILES

The United States Census Bureau implemented a computerized mapping system to determine the area in square miles of municipalities. This information was derived from the 2000 Census.

DEBT SERVICE

Debt service is the total of principal and interest paid annually on all the municipality's long-term bonds and notes. It does not include debt payments made by Proprietary Fund types.

EQUALIZED MILL RATE

The Equalized Mill Rate, or the Effective Tax Rate, is calculated by dividing the adjusted tax levy, as presented in the municipality's Tax Collector's Report, by the Equalized Net Grand List.

EQUALIZED NET GRAND LIST (ENGL)

The Equalized Net Grand List is the estimate of the market value of all taxable property in a municipality. Municipalities revalue their Grand Lists based on schedules established by the Connecticut General Assembly (CGS 12-62). Thus, there can be a marked difference between the market value of all property and the assessed value. OPM calculates the ENGL from sales and assessment ratio information and grand list reports filed by the municipality.

FUND BALANCE

The definition for this item is located on page A–5.

FYE (FISCAL YEAR ENDED)

Connecticut municipalities operate on the uniform fiscal year July 1 to June 30. A listing of "FYE 2010" means the fiscal year that began on July 1, 2009 and ended on June 30, 2010.

FORM OF GOVERNMENT

The Form of Government chart used in this report is compiled from annual reports submitted to the Secretary of the State by the municipality. The chart also identifies the election cycle for the Chief Executive Officer of each municipality.

INCOME

The median household income and per capita income presented in this publication are derived from the 2000 Census. The U.S. Census Bureau provides a detailed explanation on how the data is computed and the elements that make up the data. The web address for the Census Bureau is: **http://www.census.gov/**.

LONG-TERM DEBT

Long-Term Debt, as reported in this publication, includes long-term liabilities associated with governmental activities. Items included under the long-term debt category includes bonds and notes for which the municipality has pledged its full faith and credit, capital lease obligations, and the portion of Regional School District debt, if any, for which the town is responsible.

MILL RATE

The mill rate is the rate of taxation levied on property subject to taxation under Connecticut General Statutes. One mill is equal to 1/1000 of a dollar. For example, a tax rate of 20 mills is equivalent to $20.00 per $1,000 of assessed value. Generally, the mill rates of special taxing districts located within the municipalities are not included in this publication.

MUNICIPAL BOND RATING

A bond rating is an evaluation by credit-rating agencies of a municipality's credit risk. Bonds covered by municipal bond insurance are frequently assigned a rating higher than what the rating would have been had bond insurance not been provided. A rating for municipalities with insured bonds only is not shown in this publication.

A municipality's bonds may be rated by more than one rating agency. The three major rating agencies are Moody's Investor Services, Standard and Poor's Corporation, and Fitch Incorporated. The majority of CT municipalities have their bond issues rated by Moody's Investors Service. This rating is presented on the individual town page (Section D).

In Calendar Year 2010, both Moody's Investors Services and Fitch Incorporated recalibrated their credit ratings of U.S. municipal securities issues and issuers to conform with their respective global ratings scales. The end result of the recalibrations was typically an upward shift in the majority of municipal ratings. Both rating agencies have indicated that the recalibration should not be viewed as an improvement in the credit quality of the securities, but rather as a recalibration of the ratings to a different scale. The November 2011 ratings provided on the charts beginning on pages A–14 and B-8 include the recalibrated ratings.

NET CURRENT EXPENDITURES (EDUCATION)

Net Current Expenditures (NCE) represent the combination of local, state and federal dollars spent on public elementary and secondary education. NCE excludes expenditures for: regular education pupil transportation, debt service, land and capital costs, nonpublic expenditures, and expenditures supported by tuition revenue. This data is published annually by the CT Department of Education.

NET GRAND LIST

The Net Grand List is the assessed value of all taxable property in a municipality net of exemptions allowed under state statutes as of October 1.

NEW HOUSING AUTHORIZATIONS

The data presented on pages B-28 to B-30 represents increases or decreases in the authorized housing inventory and data on authorized demolitions. The data is derived from construction reports produced by the Dept. of Economic and Community Development (DECD) and refers to residential units only. For further information, see the DECD website at: http://www.ct.gov/ecd/site/default.asp.

POPULATION

The FYE 2006 through 2010 population figures used in this publication are as of July 1 following the end of each fiscal year. For instance, for the fiscal year ended June 30, 2010, the population figures are as of July 1, 2010. The July 1 figures are published annually by the Department of Public Health, as "Estimated Population in Connecticut as of July 1".

The U.S. Census Bureau has recently published the April 1, 2010 population census figures for Connecticut municipalities. That information is provided on pages A -10 and A-11.

RATIO OF DEBT TO ENGL

This ratio is calculated by dividing the long-term debt as of FYE 2010 by the October 1, 2008 equalized net grand list.

RATIO OF DEBT TO NET GRAND LIST

This ratio is calculated by dividing the long-term debt as of FYE 2010 by the October 1, 2008 net grand list.

REVALUATION DATES

The "Date of Last Revaluation" reflects the date that a municipality last implemented, or began the phased-in implementation of, a revaluation of real property as required by Connecticut General Statutes. This data is taken from reports filed by the municipality with OPM. The "Date of Next Revaluation" is determined by CT General Statues, section 12-62.

SCHOOL ENROLLMENT

School enrollment is the average daily membership, which represents pre-K through grade 12 resident students who are the educational and fiscal responsibility of the school district on October 1. This data is published annually by the CT Department of Education.

TANF

Temporary Assistance for Needy Families (TANF) is a federal program that was established as the successor to Aid to Families with Dependent Children (AFDC). This program represents the basic income assistance program for low-income families with children. The figures presented represent the monthly average number of recipients for the twelve months of the fiscal year; e.g., July 1, 2009, through June 30, 2010.

UNEMPLOYMENT

The unemployment figure listed with the individual town data is the calendar year average**.** The CT Department of Labor publishes the unemployment percentages monthly.

TAX COLLECTION RATES

The data from the three calculations listed below is derived from a municipality's Tax Collector's Report. These calculations do not include revenues derived from interest and lien fees.

CURRENT YEAR COLLECTED AS A % OF CURRENT LEVY

This is a measure of the collection rate of taxes levied for the fiscal year. This percentage is calculated by dividing current tax collections by the adjusted tax levy for the fiscal year.

TOTAL COLLECTED AS A % OF CURRENT LEVY

This is a measure of the rate of taxes collected on all outstanding grand lists compared to the amount levied for the current fiscal year. This percentage is calculated by dividing current and prior years tax collections by the adjusted tax levy for the current fiscal year.

TOTAL COLLECTED AS A % OF TOTAL OUTSTANDING

This is a measure of the rate of taxes collected on all outstanding grand lists compared to the amount of all taxes still outstanding. This percentage is calculated by dividing current and prior years tax collections by the tax outstanding on all grand lists.

POST-EMPLOYMENT BENEFITS

Post-employment benefits are typically provided by municipalities to former employees or their beneficiaries as compensation for services rendered while these employees were still active. In essence, post-employment benefits are really just another form of employee compensation; much like salaries and wages, however this type of compensation is not provided until after a municipality's employees have completed their active service.

Post-employment benefits are typically divided into two broad categories – pension benefits (retirement income) and Other Post-employment Benefits (post-employment benefits other than pensions, referenced as OPEB). Under GAAP, healthcare benefits are always categorized as OPEB. Other forms of OPEB may include disability and life insurance and other benefits provided outside of the pension plan.

Most Connecticut municipalities participate in one or more of three types of retirement plans. They are defined benefit, defined contribution and cost-sharing plans. The State of Connecticut administers a cost-sharing defined benefit plan, the Municipal Employees Retirement Fund (MERF). ***Of these three types of pension plans, defined benefit plans are the most common for municipalities in Connecticut, as evidenced in the chart beginning on page A-17.***

Municipalities that offer post-employment benefits other than pensions typically offer these benefits through a defined benefit plan arrangement. For this reason a chart is not presented to indicate the type of plan from which OPEB are provided.

In a defined contribution plan employees are promised that an agreed upon amount will be regularly contributed to their account. In a defined benefit plan, employees are promised specific benefits upon their separation or retirement. A key difference between the two type of plans as it relates to pensions, is that a defined benefit plan offers a fixed income during retirement, whereas a defined contribution plan provides a fixed contribution toward the employee's retirement plan.

FUNDING STATUS DATA FOR DEFINED BENEFIT PLANS

The benefits promised by a municipality in a defined benefit plan are at times based on a predetermined benefit formula that takes into account certain items such as an individual employee's years of service and salary level. The estimated present value of the benefits promised to employees based on service already rendered is known as the **actuarial accrued liability (AAL)**. This is an actuarial liability rather than an accounting liability, and is not reported on the financial statements of the municipality.

The **annual required contribution (ARC)** is the amount the municipal employer would be required to contribute to the defined benefit plan for the year, calculated by an actuary in accordance with certain parameters, in order to fund the actuarial accrued liability over time. Again the ARC is not reported directly on the financial statements.

Information related to both the Actuarial Accrued Liability and the Annual Required Contribution (ARC) is typically considered important in assessing the financial health of a defined benefit plan, whether it is related to pension or other post-employment benefits. ***The charts beginning on pages A-19 and A-36 provide funding information for defined benefit plans related to pensions and OPEB, respectively.*** The information was derived from the notes to the financial statements or required supplementary information included in a municipality's financial audit report.

Unique factors, such as the issuance of pension obligation bonds or other funding practices regarding a municipality's defined benefit plan, may affect the funding information reported for a particular plan; such factors may only be apparent through a detailed review of the pension or OPEB plan.

The data listed below is derived from the General Fund of the municipalities' audited financial statements.

EXPENDITURES

EDUCATION EXPENDITURES

Education expenditures represent amounts expended from the General Fund for education, including payments made to regional school districts.

OPERATING EXPENDITURES

Operating expenditures consist of total expenditures less education expenditures.

TOTAL EXPENDITURES

Total expenditures are all expenditures as reported in the General Fund.

FUND BALANCE

TOTAL FUND BALANCE

Total fund balance is the excess of fund assets and resources over fund liabilities. The total fund balance of the General Fund, and its three separate components, (as defined below), are presented on each individual town page (Section D).

DESIGNATED FUND BALANCE

The designated fund balance represents a portion of the fund balance that is intended for specific uses.

RESERVED FUND BALANCE

The reserved fund balance represents a portion of the fund balance that is legally segregated for a specific future use and is not available for appropriation.

UNDESIGNATED FUND BALANCE

The undesignated fund balance represents a portion of the fund balance that is expendable and available.

NET CHANGE IN FUND BALANCE

This is the difference between revenues (including other financing sources) and expenditures (including other financing uses), net of any special and extraordinary items reported by a municipality for the fiscal year.

REVENUES

INTERGOVERNMENTAL REVENUES

Intergovernmental revenues include all revenue received by a municipality from federal and state sources**.**

PROPERTY TAX REVENUES

Property tax revenues are the total revenues, including interest and lien fees, generated from real and personal property taxes.

TOTAL REVENUES

Total revenues are the revenues a municipality receives from all sources, as reported in the General Fund.

SOURCES AND USES (OTHER FINANCING)

OTHER FINANCING SOURCES (OFS)

An increase in the General Fund's resources not classified as revenues. GAAP limits the use of this category to certain specified situations. A component of OFS is "transfers in". **Transfers In** are interfund transactions received by the General Fund from other funds of the municipality.

OTHER FINANCING USES (OFU)

A decrease in the General Fund's resources not classified as expenditures. GAAP limits the use of this category to certain specified situations. A component of OFU is "transfers out". **Transfers Out** are interfund transactions received by other funds of the municipality from the General Fund.

Further details on other financing sources and uses can be found in a municipality's financial statements.

SPECIAL/EXTRAORDINARY ITEMS

Special items are transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence. Extraordinary items are transactions or other events that are both unusual in nature and infrequent in occurrence.

Special and extraordinary items are required under GAAP to be reported separately from other financing sources and uses and are reflected in this publication as a component of "net change in fund balance".

***** The following is a list of municipalities and their related pension plans for which pension bonds have been issued as of June 30, 2010**

Municipality	Name of Plan	Date Bond Issued	Amount of Bond Issued
Bridgeport	Public Safety Plan A	August 2000	$350,000,000
Naugatuck	Employee Plan, Fire Plan	October 2003	$49,000,000
New Britain	Policemen's Fund, Firemen's Fund	February 1998	$105,000,000
Stratford	Stratford Employees Retirement Plan	August 1998	$95,000,000
Waterbury	Waterbury Retirement Fund	September 2009	$313,000,000
West Haven	West Haven Police Pension Fund	September 2002	$67,000,000

This chart beginning on page A-19 is derived from a database of information compiled from the June 30, 2010 audit reports of Connecticut municipalities. The database includes information for those entities which sponsor or participate in single-employer or agent defined benefit pension plans and whose audit reports include sufficient information regarding the actuarial accrued liability and pension assets to determine the funding status of the pension plan.

Note: For municipalities with multiple defined benefit plans, the data is sorted by AAL (highest to lowest).

See Page A-35 for plans denoted with "***"

* A checkmark for "closed plan" indicate that the pension plan is closed and does not accept new entrants.

** All = All Eligible, T = Town Employees, PS = Public Safety (Police or Fire, etc.), O = Other (Other specified groups not listed above)

SECTION D

INDIVIDUAL TOWN DATA

Addendum 1 **Effects on Fiscal Year Ended 2008 Revenue and Expenditure Trend Data of Muncipalities Due to Pension Obligation Bond (POB) Proceeds Deposited by the State of Connecticut to the Connecticut State Teachers' Retirement System**

The State of Connecticut annually makes deposits to the Connecticut State Teachers' Retirement System (CSTRS) on behalf of municipal governments for the current and retired teachers and other certified education staff of these municipalities. Such annual deposits are referred to as “on-behalf payments” and are normally reported in the audited financial statements of municipalities as a revenue (intergovernmental) and expenditure (education expenditure) item of the General Fund. Each municipality determines its portion of the aggregate contribution made by the State on its behalf and reports that amount in its financial statements.

The State contributed an additional two billion ($2 billion) to the CSTRS during the fiscal year ended June 30, 2008 on behalf of municipal governments. This contribution was in addition to the annual deposit made by the State (approximately $518,560,000) towards the plan in fiscal year 2008. The “excess” two billion ($2 billion) contribution was made under Public Act 07-186. This Act authorized the sale and issuance of $2 billion in bonds by the State of Connecticut, for which the proceeds were to be used to fund the unfunded liability of the CSTRS.

The municipality's allocated portion of the additional two billion ($2 billion) contributed by the State was also reported in the audited financial statements as a revenue (intergovernmental) and an expenditure (education) of the General Fund by most participating governments for fiscal year 2007-08. This resulted in certain revenue and expenditure line items of the General Fund for fiscal year end 2008 being significantly higher than in other years, which has an affect on various trend analysis and other fiscal measures. As both the revenue and expenditure reported would be for the same amount, there is no effect on the fund balance of the General Fund.

The chart below represents the estimated amount of the on-behalf payment from the $2 billion POB issuance that was reported as a component of each municipality's General Fund revenues and expenditures for FY 2008 based upon an analysis by OPM. The information may be useful when making comparisons using the revenue and expenditure data provided on the individual town pages as presented in Section D.

The City has elected to report its Board of Education expenditures outside of the General Fund. Certain figures have therefore been reclassified for comparative purposes to reflect the amount transferred from the General Fund to the Board of Education Fund as education expenditures of the General Fund.
