9. AT&T CONNECTIVITY SERVICE (CCS)

Host Connect is part of Cingular's wireless services that provides flexible configurations for reliable Customer's network to Cingular's network connections for remote wireless access to enterprise data resources.

The Wireless IP (OSI Layer 3) transport service enables mobile access by Customer's employees to Customer's private IP network, using Provider's GPRS / EDGE access network via a dedicated Access Point Name (APN) - the virtual routing instance in the Provider network - and a dedicated connection to the Customer's network. This connection will be made via an - Internet Virtual Private Network (VPN) and/or Frame Relay connection. The mobile device connection to the GPRS / EDGE network must be initiated by the mobile device. Customer may opt to use a Short Message Service ("SMS") message to notify a mobile device that the mobile device needs to activate the GPRS / EDGE connection provided their application and mobile devices support such a notification SMS notification message. Traffic addressed to any other destinations will be silently discarded by the CW Providers network.

SERVICE AVAILABILITY/LIMITATIONS:

Refer to coverage map to see where user will be roaming when not in home footprint. Data connect plans are available only for activation of service on select equipment and will work only with select AT&T features, billing services and other service offerings.

AT&T Connectivity Service

The connection shall not be utilized for the sending of SMS messages, except for the use of such message solely as a signal to activate an end user data device application. Except for use as an activation signal, no data or content shall be passed via an SMS message, either from the host application to a mobile device or from a mobile device to the host application.

The connection is restricted to facilitating the exchange of data between subscribers of Provider data services and the Customer. Providers Host Connection Service must be used with the Provider's data services as found on the Services Product Schedule.

The connection is restricted to a single connection into the Provider Facilities. Each additional connection into the Provider Facilities must serve the identical Host Application as the original connection into the Provider Facilities. Requests for additional Host Applications must be reviewed and agreed to in order to prevent any adverse impacts on the performance of the AT&T Wireless network.

Provider will provide customer support and trouble analysis within layers one, two and three of the OSI Stack as defined in [IS7498:84] OSI, Open Systems Interconnection - basic reference model, International Standard OSI 7498 Part 1, 1984.

All user traffic above OSI layer 2 will be billed according to the Customer's particular rate plan as set out in the Service Product Schedule attached to the Master Agreement.

The Host Connection does not include:

- the cost of procuring, implementing, operating, and maintaining the facilities (including, but not limited to leased lines, frame relay services and the like) necessary to interconnect the Provider Facilities and the Host.

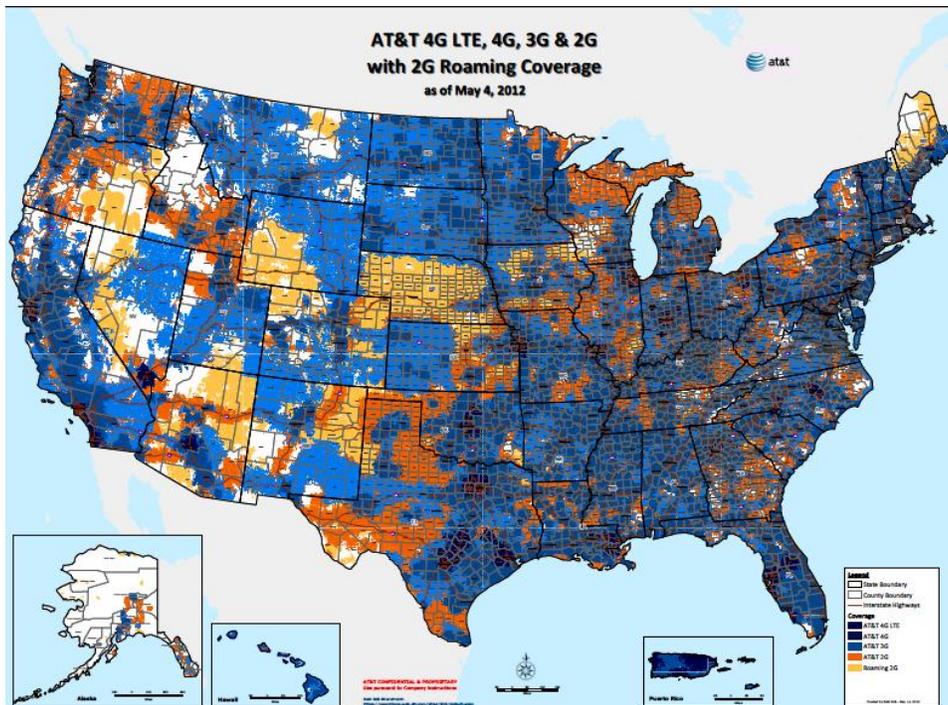

- the costs for ordering and paying for Customer's end of the physical connection to a public provider network.
- the Provider paying for the cost of the Provider's physical connection to a public provider network.
- any usage / traffic transport charges levied by a 3rd party public network provider for dedicated links such as Frame Relay PVC usage on this dedicated connection.
