

## Connecticut Agricultural Experiment Station New Haven

### REQUIREMENTS FOR TREE WORKERS IN CONNECTICUT

---

Connecticut's law requiring commercial tree workers to qualify for certificates or licenses became effective July 1, 1919. It was revised in 1929 and is now Section 2199 of the General Statutes of 1930. Certificates are issued to qualified applicants by the Tree Protection Examining Board. This circular contains the law, the rules and regulations of the Board, and a list of the present holders of active certificates.

---

#### RECOMMENDATIONS TO TREE OWNERS

The main purpose of the Connecticut law requiring all commercial tree workers to secure certificates from a Tree Protection Examining Board is to prevent inadequately trained and unscrupulous tree workers from operating in the State. It is as much for the protection of tree owners as for that of the trees themselves. The certificate holders listed in this bulletin have complied with the law of the State and have satisfied this Board that they are qualified by experience and training for the certificates granted them.

The Board cannot, however, guarantee that men or firms holding certificates will always be able to solve your tree problems in a satisfactory manner. Such problems often involve obscure and complex factors which are not readily determined by human agencies; consequently, mistakes in diagnosis are sometimes made, with incorrect treatment as the result. Such mistakes are less common among men of long experience and adequate training, so that we believe it is safer for you to intrust the care of your trees to a certificate holder than to some one not qualified under the Connecticut law.

Certificates are issued for only one year and renewal may be refused or a certificate cancelled for cause. Information regarding questionable tree work or business practice by certificate holders is requested. The Board should also be notified of any person or firm, advertising, soliciting or contracting to do tree work, whose name is not given in the current list of certificate holders. So far as possible, these cases will be investigated and such action taken as seems necessary.

Tree Protection Examining Board  
Box 1106, New Haven, Conn.

W. E. BRITTON, *Chairman*  
G. P. CLINTON, *Vice-Chairman*  
W. O. FILLEY, *Secretary-Treasurer*

## TREE PROTECTION LAW

Chapter 181, Public Acts of 1919, provided for the establishment of an examining board consisting of the Botanist, Entomologist and Forester of this Station, to examine and pass upon the qualifications of men who advertise, solicit or contract to spray, prune, fill cavities, or otherwise improve the condition of trees. This act was amended by Section 4, Chapter 76, Public Acts, 1929, and now appears in the following form as Section 2199 of the General Statutes, Revision of 1930:

**Section 2199. Tree protection examining board.** (a) No person, firm or corporation shall advertise, solicit or contract to improve the condition of fruit, shade, forest or ornamental trees, by pruning, trimming or filling cavities, or to protect such trees from damage by insects or disease, either by spraying or any other method, without having secured a certificate as specified in subsection (b) of this section. Any person, firm or corporation failing to comply with the terms of this section shall be fined not more than one hundred dollars; provided any person may improve or protect any tree on his own premises or on the property of his employer without securing such certificate. (b) The botanist, entomologist and forester of the Connecticut Agricultural Experiment Station shall constitute a board to be known as the tree protection examining board, which shall, upon application from any person, firm or corporation, examine the qualifications of the applicant to improve, protect or preserve fruit, shade, ornamental or forest trees and, if satisfied that the applicant is qualified, may issue a certificate so stating; which certificate shall be valid for one year from the date of its issue, unless sooner revoked as provided in subsection (c) of this section, and may be renewed by the board for succeeding years without further examination, upon payment of the fee hereinafter required, provided any person, firm or corporation receiving such certificate shall be responsible for the acts of all employees in the performance of such work. (c) Said board shall prepare all necessary forms and prescribe all rules and regulations governing examinations, and any certificate issued under the provisions of this section may be revoked by it upon proof that unsuitable methods have been used or for other sufficient cause. (d) Each applicant for an examination shall pay a fee of five dollars in advance and a fee of two dollars for each certificate of renewal issued. All such fees may be expended by the board for any expense incurred by it in making examinations or issuing certificates, and an account of all receipts and expenditures under the provisions of this section shall be rendered annually to the comptroller.

### EXAMINING BOARD

The Tree Protection Examining Board was organized in 1919 and consists of the following members: Chairman, W. E. Britton, Entomologist; Vice-Chairman, G. P. Clinton, Botanist; Secretary-Treasurer, W. O. Filley, Forester.

### QUALIFICATIONS OF APPLICANTS

After an experience of 16 years, during which time some 450 applicants have been considered and 405 certificates issued, with results not altogether satisfactory, the members of the Board feel that it is time to obtain a more adequate measure of an applicant's qualifications before allowing him to take the examination. Consequently, beginning with 1936, new measures will be put into practice. Each applicant will be required to fill out blanks to give certain information needed by the Board, including his formal training and experience. From these preliminary blanks the Board will decide whether or not the applicant is sufficiently qualified to warrant an examination.

### Time and Place of Examinations

Examinations will be held at the Connecticut Agricultural Experiment Station, 123 Huntington Street, New Haven. Since members of the Board are busy with other kinds of work, they cannot hold examinations at the request of every applicant, but plan to hold four during 1936. Although exact dates have not been fixed, these examinations will occur near the middle of February, May, August and November. Qualified applicants will be notified of the date of the next examination.

### Knowledge Expected of an Applicant

1. Ability to identify cultivated and native trees by their common names.
2. An understanding of the processes and reactions that take place in the normal life and growth of a tree.
3. Proper methods of pruning, bracing and filling cavities.
4. A fundamental understanding of spray materials, chemical reactions of spray mixtures and the effect of each class of mixtures on both pests and trees.
5. A general familiarity with insects, particularly those that injure trees, with control measures for each.
6. A general familiarity with plant diseases, particularly those that injure trees, with control measures for each.

### RULES and REGULATIONS

#### Certificates

Certificates shall be of two kinds, regular and limited.

1. **Regular** certificates shall be issued to those authorized to do all types of work mentioned in Section 2199 of the Statutes, namely: Pruning, trimming, filling cavities, and protecting trees from damage by insects and plant diseases by spraying or other methods.
2. **Limited** certificates (indicated by the word "Limited" in red ink across the face) shall be issued to those authorized to do only such types of work as are specified in each certificate.

#### Examination

1. Each person, firm or corporation required to secure a certificate under Section 2199 of the General Statutes, Revision of 1930, shall be examined as follows:

When a firm is under control of one person who is solely responsible for the contracts, methods and oversight of each piece of work, this person alone may be required to pass the examination; but when more than one person is responsible for the methods of work and oversight of same, each shall be required to take the examination. When foremen or others are given complete charge of recommending and applying treatments, they may also be required to take the examination, in so far as it relates to their work. The Examining Board shall decide in each case who shall be required to take the examination.

2. Examinations may be oral, written, or both, as shall be determined by the Board and, in general, shall cover tree species, tree life and growth, diseases and insect pests of trees with treatment for same, pruning and tree surgery.

3. All candidates for certificates will be required to fill out a preliminary examination paper and return it to the Board at least two weeks prior to the examination date. No fee will be required for this preliminary examination. On the basis of the preliminary paper, the Board will determine whether or not the applicant is qualified for further examination.

4. Final examinations will be held at the Connecticut Agricultural Experiment Station four or more times during each year, definite dates to be set by the Board and notices sent to qualified applicants at least one week in advance. The statutory fee of \$5.00 will be required from each applicant for the final examination.

5. After final examination, if satisfied with the qualifications of the applicant, the Board will issue a certificate good for the succeeding 12 months (unless revoked for cause), and subject to renewal for a further term of 12 months, as provided hereafter, on payment of the statutory fee of \$2.00.

6. Upon evidence of unfitness in training or improper business methods, the Board may refuse to issue a certificate, or cancel one that has been issued. Complaints may be made to the Board on these points, and if deemed desirable by the Board, private hearings of the interested parties will be held.

#### Renewals

The provision of Section 2199, General Statutes of 1930, regarding renewal of certificates shall be construed by this Board as meaning the continuous possession of a certificate and not an attempt to obtain a new certificate after a long period during which the old certificate has lapsed. The following rules are hereby adopted:

1. Renewals for one year may be granted by the Board without further examination or, at its discretion, the Board may require further examination before granting such renewal. Application for a renewal must be accompanied by the statutory fee of \$2.00 per annum.

2. The Secretary shall notify each certificate holder at least two weeks before his certificate expires and again within two weeks after date of expiration, unless previously renewed. If a certificate has not been renewed one month after date of expiration, it then becomes invalid and the holder shall be notified to that effect.

3. An invalid certificate may be revalidated at the discretion of the Board for the full renewal period or the unexpired portion thereof, if request for such action is received within three years after expiration date and if all renewal fees for the intervening period, as well as the renewal period, are paid in full.

4. If application is made within one month following the expiration date of a certificate, a demit or respite covering a period of three years may be issued without charge, entitling the holder to obtain a renewal certificate for one year on payment of the statutory fee of \$2.00, with or without examination as the Board may decide.

5. If a certificate has not been renewed after three years with or without a demit, a new application with a fee of \$5.00 shall be necessary, and another examination may be required by the Board.
