In the Invasive Aquatic Plant Program,
we look for bad plants in lakes. Can
you find the words hidden in this
lake?

Who am I, a bee or a wasp?

G. Ridge

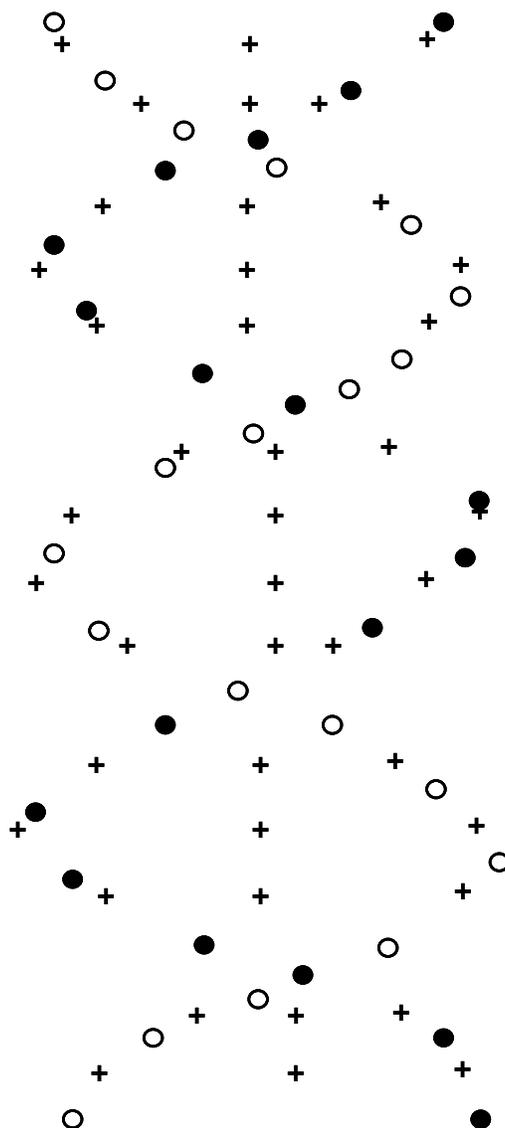

Answer: A wasp. I am not fuzzy and have bright black and yellow stripes.

Properly applied
mulch can be
your tree's best
friend.

"Volcano" mulches
are harmful to
trees.

Connect the dots.

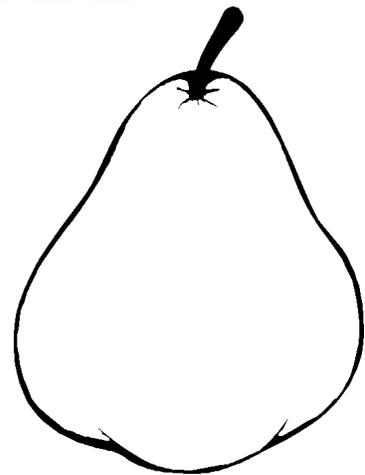

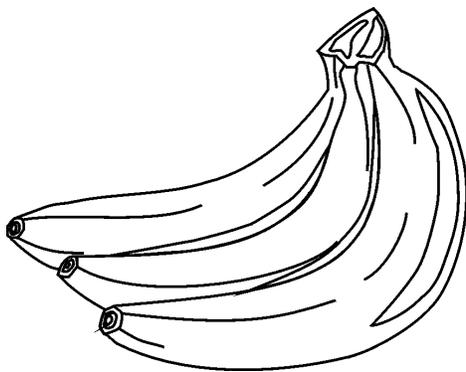

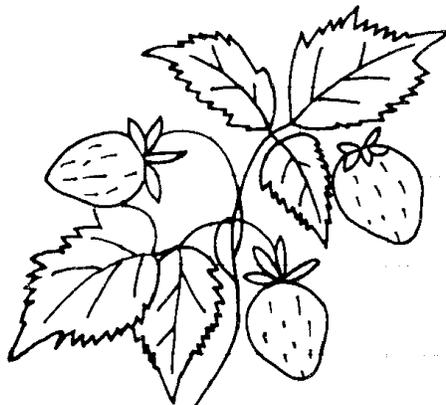

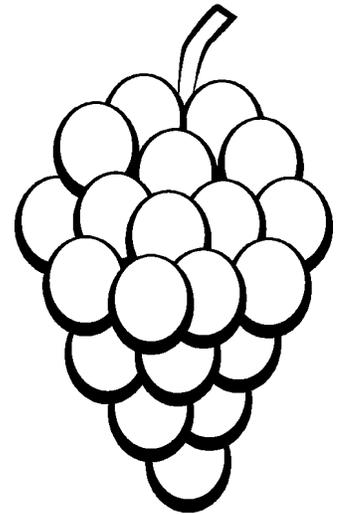

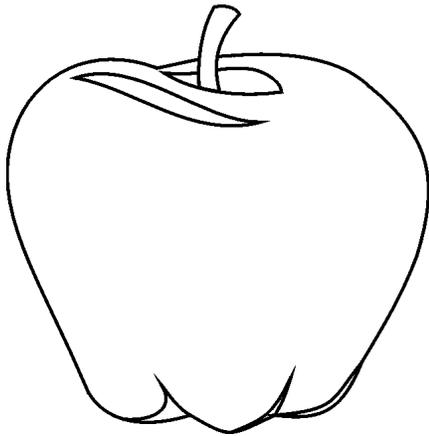

Connect all the open dots ○

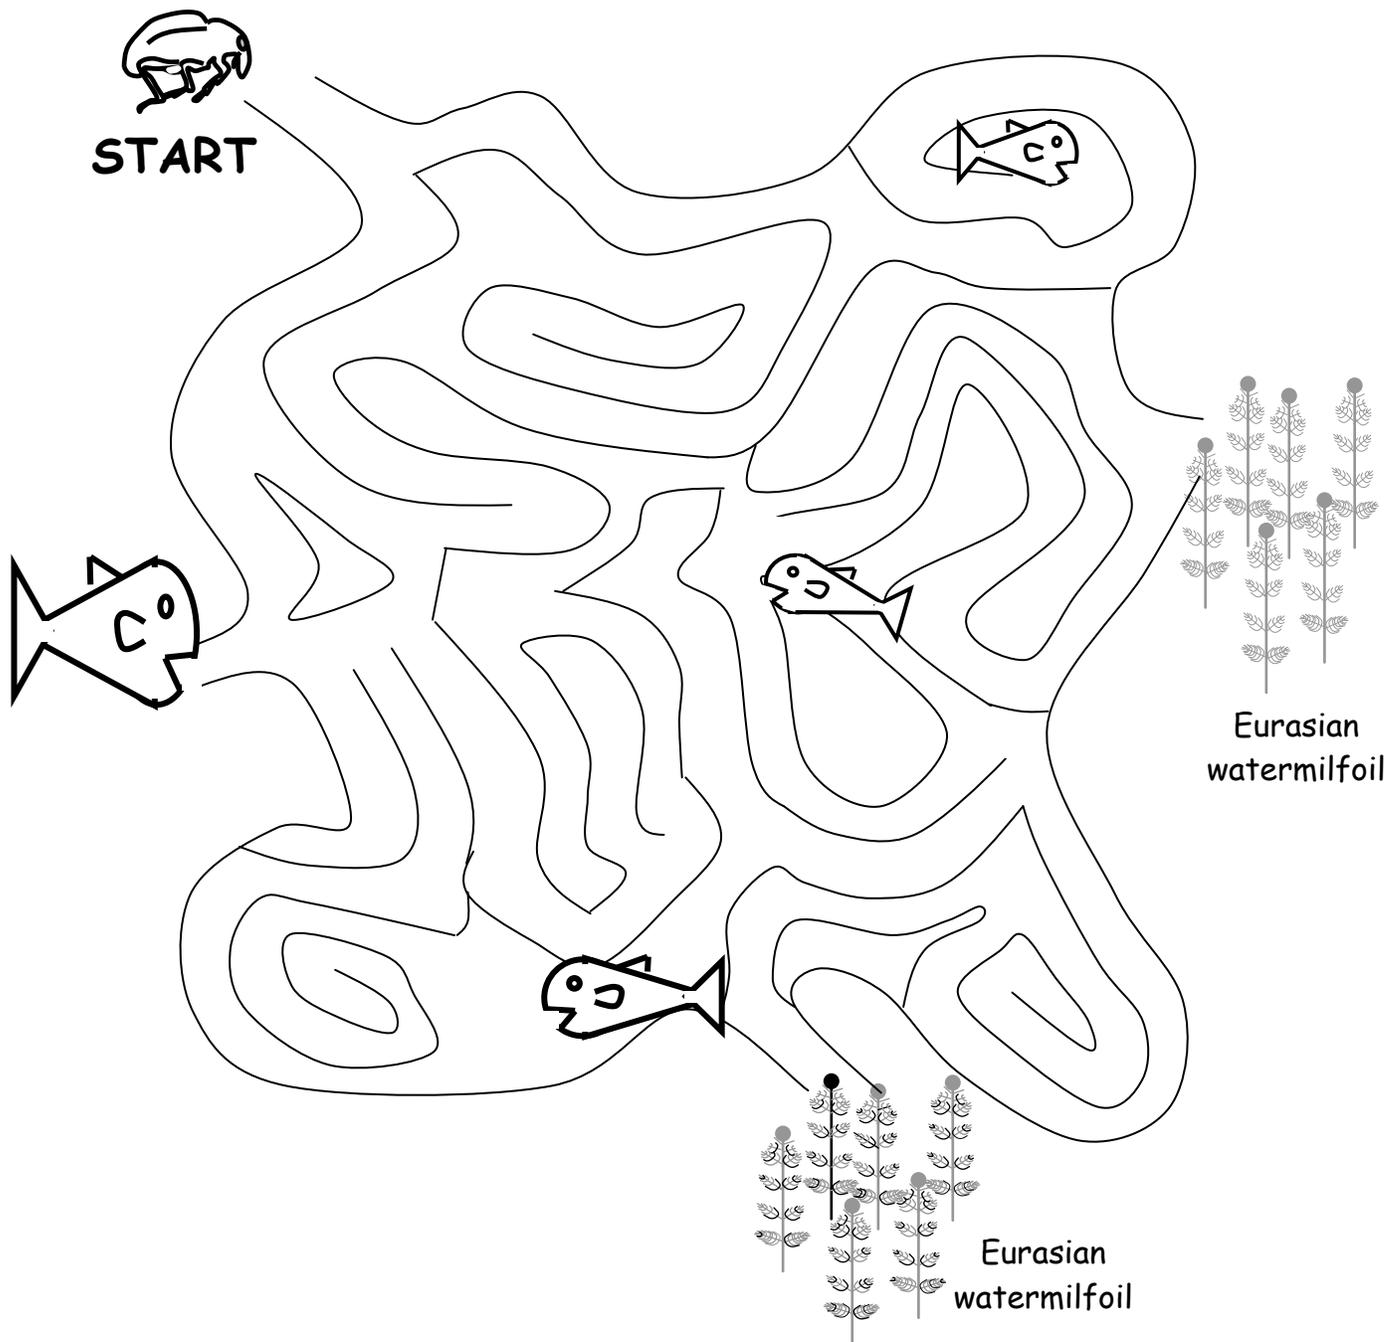

Connect all the filled dots ●

Connect all the crosses with a straight line across (horizontally) +

What molecule have you made?

Name each fruit and put a circle around the fruit that isn't grown in Connecticut.

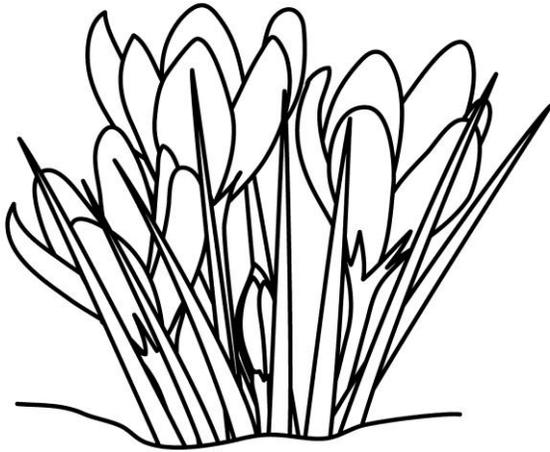

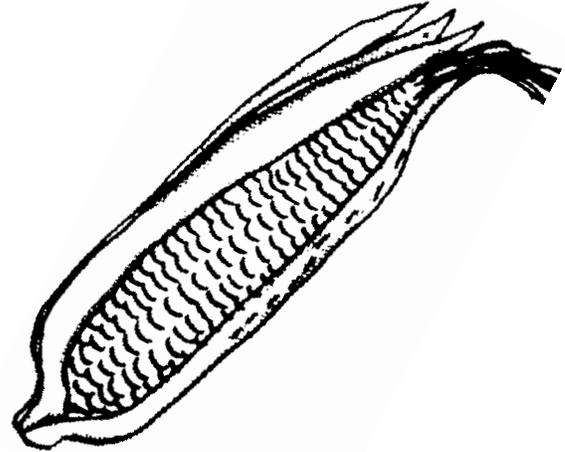

Eurasian watermilfoil is a weed that hurts lakes and ponds. The milfoil weevil is an insect that eats Eurasian watermilfoil. Help protect our lakes and ponds by helping the milfoil weevil find the Eurasian watermilfoil. **Watch out for the fish!** Fish eat the weevil.

Plants that help us celebrate the seasons.

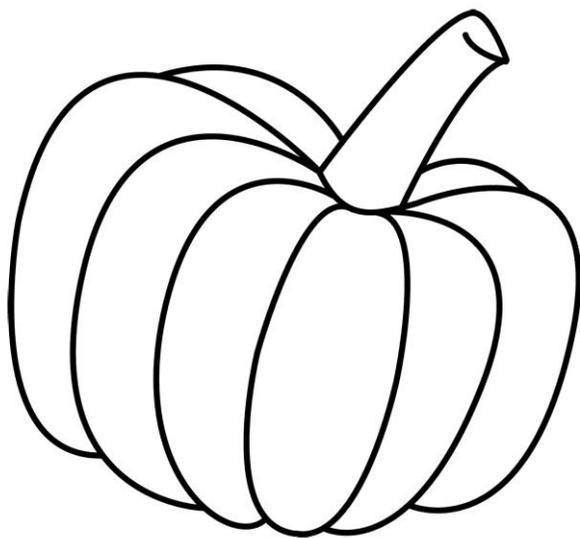

Spring

Summer

Fall

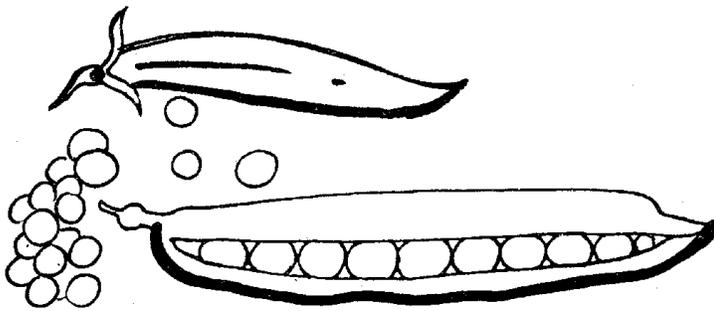

Winter

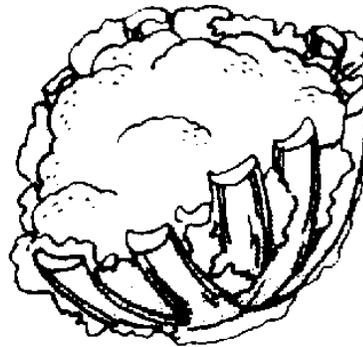

What parts of plants do we eat?

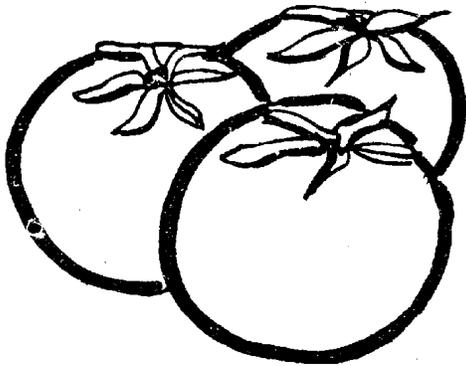

Draw a line from the plant part to an example of the vegetable.

Root

Fruit

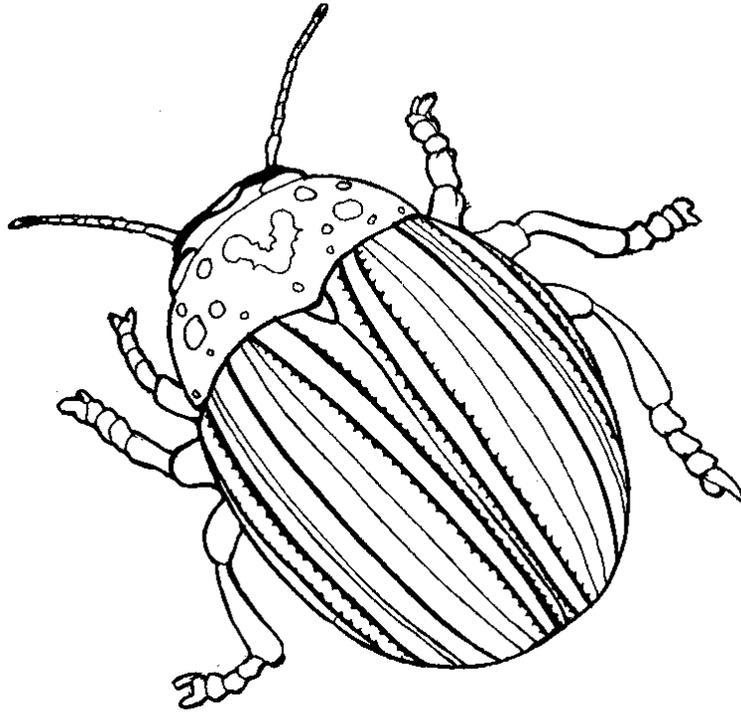

Seed

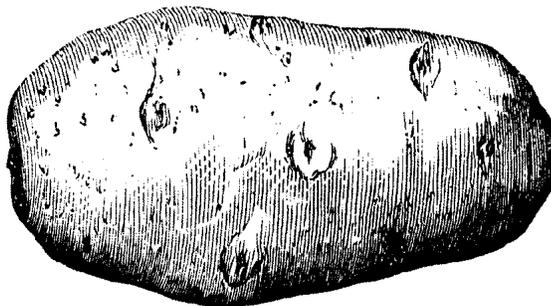

Flower

I am an important insect
pest in Connecticut.

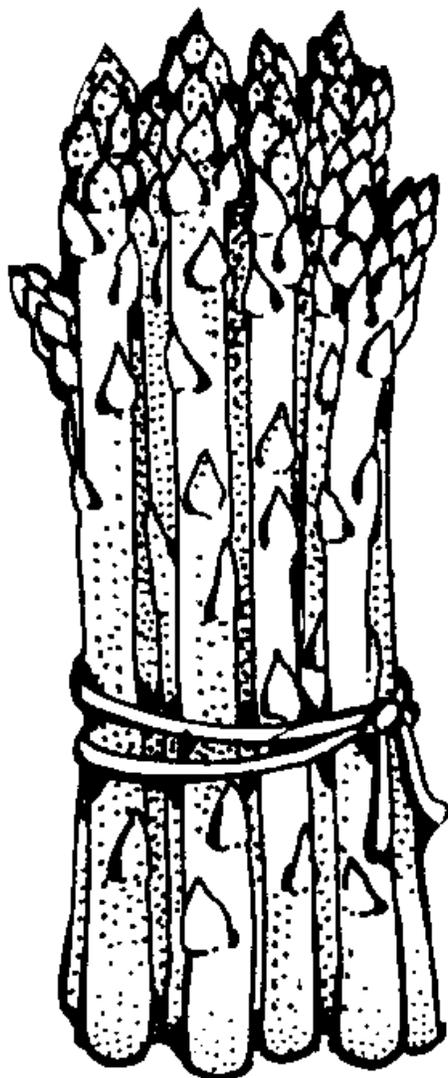

Can you figure out my name?

Colorado

beetle
