Program Director, Culture-Quality-Collaborative (CQC) and Clearview Organizational Assessments-360 (COA360)
About Us

Hopkins Center for Health Disparities Solutions

“Exploration and Intervention for Health Equality…”

Designated a “National Center of Excellence” by the National Institutes of Health, National Institute on Minority Health and Health Disparities
Cultural Competency: Overview
Video Clip: Where are you from?
NAME Exercise
Key Concepts in Cultural Competency: Definitions and Examples
Culture is an integrated pattern of human behavior which includes but is not limited to:

- Thoughts
- Customs
- Values
- Courtesies
- Expected Behaviors
- Manner of Interacting
- Beliefs
- Languages
- Practices

... of a racial, ethnic, religious, social, disability or political group; ability to transmit the above to succeeding generations; dynamic in nature.

Slide Source: National Center for Cultural Competence, 2008
Iceberg Analogy of Culture
What is Cultural Competence?

• A developmental process that evolves over an extended period of time.

• Individuals, organizations, and systems are at various levels of awareness, knowledge and skills along the cultural competence continuum.

What is Organizational Cultural Competence?

It requires organizations to:

1. Have a defined set of values and principles, and demonstrate behaviors, attitudes, policies, and structures that enable them to work effectively cross-culturally;

What is Organizational Cultural Competence?

2. Have the capacity to:
   (a) value diversity,
   (b) conduct self-assessment,
   (c) manage the dynamics of difference,
   (d) acquire and institutionalize cultural knowledge, and
   (e) adapt to the diversity and cultural contexts of communities they serve;

What is Organizational Cultural Competence?

3. Incorporate the above into all aspects of:
   (a) policymaking,
   (b) administration,
   (c) practice and service delivery,
   (d) and systematically involve consumers, key stakeholders and communities.

Federal and State Legislation, Mandates, and Regulatory Standards
Federal and State Legislation, Mandates, and Regulatory Standards

• Title VI of the Civil Rights Act of 1964

• CLAS Standards (2001; Enhanced Standards, April 2013)

• American Recovery and Reinvestment Act (ARRA) of 2009 and Meaningful Use of Electronic Health Records (EHRs)
Federal and State Legislation, Mandates, and Regulatory Standards

- NCQA Multicultural Health Care Standards: Distinction Program (effective 7/1/2010)

- The Joint Commission “Effective Communication, Cultural Competence, and Patient- and Family-Centered Care” Standards (effective 1/1/2011)

- Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Patient Experience Surveys
  - includes cultural competency and health literacy item sets

- Patient Protection and Affordable Care Act of 2010 (PPACA or ACA)
Federal and State Legislation, Mandates, and Regulatory Standards

• NCQA Patient-Centered Medical Home Recognition

• URAC Patient Centered Health Care Home Practice Achievement

• The Joint Commission Primary Care Medical Home Certification

• Accreditation Association for Ambulatory Health Care (AAAHC) Primary Care & Medical Home Accreditation
Title VI of the Civil Rights Act of 1964

• Title VI of the Civil Rights Act of 1964 considers the denial or delay of medical care due to language barriers to be discrimination.

• Any medical facility receiving Medicaid or Medicare must provide language assistance to limited English proficient (LEP) patients.
Title VI of the Civil Rights Act of 1964

- Not only applies to healthcare, behavioral health and social/human services organizations
- Memo from U.S. Department of Justice regarding “Providing Language Access in the Courts: Working Together to Ensure Justice” (March 11, 2014)
1. Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.
2. Advance and sustain organizational governance and leadership that promotes CLAS and health equity through policy, practices and allocated resources.

3. Recruit, promote and support a culturally and linguistically diverse governance, leadership and workforce that are responsive to the population in the service area.

4. Educate and train governance, leadership and workforce in culturally and linguistically appropriate policies and practices on an ongoing basis.
5. Offer language assistance to individuals who have limited English proficiency and/or other communication needs, at no cost to them, to facilitate timely access to all health care and services.

6. Inform all individuals of the availability of language assistance services clearly and in their preferred language, verbally and in writing.

7. Ensure the competence of individuals providing language assistance, recognizing that the use of untrained individuals and/or minors as interpreters should be avoided.

8. Provide easy-to-understand print and multimedia materials and signage in the languages commonly used by the populations in the service area.
9. Establish culturally and linguistically appropriate goals, policies and management accountability, and infuse them throughout the organizations’ planning and operations.

10. Conduct ongoing assessments of the organization’s CLAS-related activities and integrate CLAS-related measures into assessment measurement and continuous quality improvement activities.

11. Collect and maintain accurate and reliable demographic data to monitor and evaluate the impact of CLAS on health equity and outcomes and to inform service delivery.
12. Conduct regular assessments of community health assets and needs and use the results to plan and implement services that respond to the cultural and linguistic diversity of populations in the service area.

13. Partner with the community to design, implement and evaluate policies, practices and services to ensure cultural and linguistic appropriateness.

14. Create conflict- and grievance-resolution processes that are culturally and linguistically appropriate to identify, prevent and resolve conflicts or complaints.

15. Communicate the organization’s progress in implementing and sustaining CLAS to all stakeholders, constituents and the general public.
National Quality Forum (NQF)

• “National Voluntary Consensus Standards for a Comprehensive Framework and Preferred Practices for Measuring and Reporting Cultural Competency”
  – Published in February 2009
  – 45 best practices organized into 7 domains
National Quality Forum (NQF)

• The number of best practices associated with the domain follows in parentheses.
  1. Leadership (7)
  2. Integration into Management Systems and Operations (4)
  3. Patient-Provider Communication (10)
  4. Care Delivery and Supporting Mechanisms (6)
  5. Workforce Diversity and Training (3)
  6. Community Engagement (5)
  7. Data Collection, Public Accountability, and Quality Improvement (10)
Meaningful Use of Electronic Health Records (EHRs)

- The 2009 American Recovery and Reinvestment Act (ARRA) established the principle of meaningful use.
- The Centers for Medicare and Medicaid Services (CMS) and the Office of the National Coordinator for Health Information Technology (ONCHIT) established standards for the meaningful use of electronic health records.
Meaningful Use of Electronic Health Records (EHRs)

• During stage 1 of implementation, the minimum meaningful use standards enable a user to electronically record, modify, and retrieve patient demographic data including:
  – preferred language
  – insurance type
  – gender
  – race
  – ethnicity
  – date of birth
  – date and cause of death in the event of mortality
NCQA Multicultural Health Care (MHC) Standards: Distinction Program

- 5 broad standards consisting of multiple required elements:
  - MHC 1: Race/Ethnicity and Language Data
  - MHC 2: Access and Availability of Language Services
  - MHC 3: Practitioner Network Cultural Responsiveness
  - MHC 4: Culturally and Linguistically Appropriate Services Programs
  - MHC 5: Reducing Health Care Disparities
NCQA Multicultural Health Care (MHC) Standards: Distinction Program

• Health Partners of Philadelphia, Inc.
• Kaiser Foundation Health Plan of Georgia, Inc.
• Keystone Health Plan West, Inc.
• Kaiser Foundation Health Plan Inc. - Southern California

• AmeriHealth Mercy Health Plan
• Keystone Mercy Health Plan
• Select Health of South Carolina, Inc.
Joint Commission Standards

- The Joint Commission accredits most healthcare organizations, such as:
  - Ambulatory Health Care
  - Behavioral Health Care
  - Critical Access Hospitals
  - Home Care
  - Hospitals
  - Laboratory Services
  - Long Term Care
  - International Accreditation
Joint Commission Standards

• “Effective Communication, Cultural Competence, and Patient- and Family-Centered Care” Standards
  – Effective January 1, 2011
  – Starting in 2012, failure to comply with these standards will jeopardize a healthcare organization’s accreditation status.
Joint Commission Standards

- 8 new or revised elements of performance (EPs)
  - Addressing qualifications for language interpreters and translators (revised)
  - Identifying patient communication needs (new)
  - Addressing patient communication needs (new)
  - Collecting race and ethnicity data (revised)
  - Collecting language data (revised)
  - Patient access to chosen support individual (new)
  - Non-discrimination in patient care (new)
  - Providing language services (revised)
Since July 2007, CMS has required all hospitals (except critical access hospitals) that are subject to the Inpatient Prospective Payment System (IPPS) to collect and submit patient experience data using the HCAHPS survey.

- Note: Also does not apply to pediatric hospitals, psychiatric hospitals or other specialty hospitals.

- In the Patient Protection and Affordable Care Act of 2010, HCAHPS linked to value based purchasing (VBP).

- Penalty for non-participation (meaning not submitting quality measures including HCAHPS) equals reduction of 2% of annual payment update.
Patient Protection and Affordable Care Act of 2010 (PPACA)

- Data collection and reporting by race, ethnicity, and language
- Workforce diversity
- Cultural competence education and organizational support
Patient Protection and Affordable Care Act of 2010 (PPACA)

- Health disparities research
- Health disparities initiatives in prevention
- Addressing disparities in health insurance reforms
Sample Provisions

- Meaningful Use of Electronic Health Records
- Section 4302 of the ACA
- Section 10334 of the ACA
Section 4302 of the ACA: Race and Ethnicity Standards

Ethnicity Data Standard
Are you Hispanic, Latino/a, or Spanish origin (One or more categories may be selected)

a. ___ No, not of Hispanic, Latino/a, or Spanish origin
b. ___ Yes, Mexican, Mexican American, Chicano/a
c. ___ Yes, Puerto Rican
d. ___ Yes, Cuban
e. ___ Yes, Another Hispanic, Latino/a or Spanish origin

These categories roll-up to the Hispanic or Latino category of the OMB standard

Race Data Standard
What is your race? (One or more categories may be selected)

a. ___ White
b. ___ Black or African American
c. ___ American Indian or Alaska Native

These categories are part of the current OMB standard

d. ___ Asian Indian
e. ___ Chinese
f. ___ Filipino
g. ___ Japanese
h. ___ Korean
i. ___ Vietnamese
j. ___ Other Asian

These categories roll-up to the Asian category of the OMB standard

k. ___ Native Hawaiian
l. ___ Guamanian or Chamorro
m. ___ Samoan
n. ___ Other Pacific Islander

These categories roll-up to the Native Hawaiian or Other Pacific Islander category of the OMB standard
Section 4302 of the ACA: Gender

Sex Data Standard

What is your sex?

a. _____ Male

b. _____ Female
Section 4302 of the ACA: Primary Language

Data Standard for Primary Language

How well do you speak English? (5 years old or older)

a. ____ Very well
b. ____ Well
c. ____ Not well
d. ____ Not at all

1. Do you speak a language other than English at home? (5 years old or older)
   a. ____ Yes
   b. ____ No

For persons speaking a language other than English (answering yes to the question above):

2. What is this language? (5 years old or older)
   a. ____ Spanish
   b. ____ Other Language (Identify)
Data Standard for Disability Status

1. Are you deaf or do you have serious difficulty hearing?
   a. _____ Yes
   b. _____ No

2. Are you blind or do you have serious difficulty seeing, even when wearing glasses?
   a. _____ Yes
   b. _____ No

3. Because of a physical, mental, or emotional condition, do you have serious difficulty concentrating, remembering, or making decisions? (5 years old or older)
   a. _____ Yes
   b. _____ No

4. Do you have serious difficulty walking or climbing stairs? (5 years old or older)
   a. _____ Yes
   b. _____ No

5. Do you have difficulty dressing or bathing? (5 years old or older)
   a. _____ Yes
   b. _____ No

6. Because of a physical, mental, or emotional condition, do you have difficulty doing errands alone such as visiting a doctor’s office or shopping? (15 years old or older)
   a. _____ Yes
   b. _____ No
Section 4302 of the ACA: LGBT Data Collection

- **Status update**

- Federal public health surveys collecting sexual orientation and/or gender identity
  - National Health Interview Survey (NHIS) – sexual orientation in 2013
  - Behavioral Risk Factor Surveillance System (BRFSS) – 25 states include at least 1 question on sexual orientation
Section 4302 of the ACA: LGBT Data Collection

• Suggested data collection
  – Williams Institute
  – The Fenway Institute, Center for Population Research in LGBT Health
  – Institute of Workshop (IOM)
    • Workshop Description
    • Workshop Summary
Section 10334 of the ACA

- Elevation of the NIH, National Center on Minority Health and Health Disparities to the National Institute on Minority Health and Health Disparities
- Creation of Offices of Minority Health in all of the federal health agencies
  - Department of Health and Human Services (DHHS)
  - Agency for Healthcare Research and Quality (AHRQ)
  - Centers for Disease Control and Prevention (CDC)
  - Centers for Medicare and Medicaid Services (CMS)
  - Food and Drug Administration (FDA)
  - Health Resources and Services Administration (HRSA)
  - Substance Abuse and Mental Health Services Administration (SAMHSA)
HHS Action Plan to Reduce Racial and Ethnic Health Disparities

A NATION FREE OF DISPARITIES IN HEALTH AND HEALTH CARE
National Stakeholder Strategy for Achieving Health Equity
Aims

- **Awareness** - *Increase awareness of the significance of health disparities, their impact on the nation, and the actions necessary to improve health outcomes for racial, ethnic, and underserved populations.*

- **Leadership** - *Strengthen and broaden leadership for addressing health disparities at all levels.*

- **Health System and Life Experience** - *Improve health and healthcare outcomes for racial, ethnic, and underserved populations.*
Aims

• **Cultural and Linguistic Competency** - Improve cultural and linguistic competency and the diversity of the health-related workforce.

• **Data, Research, and Evaluation** - Improve data availability and coordination, utilization, and diffusion of research and evaluation outcomes.
Federal and State Legislation, Mandates, and Regulatory Standards

• NCQA Patient-Centered Medical Home Recognition

• URAC Patient Centered Health Care Home Practice Achievement

• The Joint Commission Primary Care Medical Home Certification

• Accreditation Association for Ambulatory Health Care (AAAHC) Primary Care & Medical Home Accreditation
State Legislation on Cultural Competency Training

Blue - denotes legislation requiring (WA, CA, CT, NJ, NM) or strongly recommending (MD) cultural competence training that was signed into law.

Red - denotes legislation that was referred to committee and/or is currently under consideration.

Yellow - denotes legislation that died in committee or was vetoed.

https://www.thinkculturalhealth.hhs.gov/Content/LegislatingCLAS.asp
Health Equity: A Quality Issue
Learning Objectives

• Define health and healthcare disparities as well as health equity

• Discuss changing U.S. and state demographics

• Describe federal and state legislation, mandates and regulatory standards related to health equity and quality

• Identify the business case for health equity

• Understand the National Healthcare Quality and National Healthcare Disparities Reports as resources to identify health disparities
Definitions
What are Health Disparities?

• “A particular type of health difference that is closely linked with social, economic, and/or environmental disadvantage. Health disparities adversely affect groups of people who have systematically experienced greater obstacles to health based on their racial or ethnic group; religion; socioeconomic status; gender; age; mental health; cognitive, sensory, or physical disability; sexual orientation or gender identity; geographic location; or other characteristics historically linked to discrimination or exclusion.”

Healthy People, 2020
Health Disparities Result from Complex Interactions among Multiple Factors

- Biologic factors
- Cultural factors
- Socioeconomic factors
- Environmental factors
- Psychosocial factors
- Health risk behavior
- Access to healthcare
- Quality of healthcare

Myths About Racial and Ethnic Health Disparities

• Caused by race differences in income/education
• Caused by lack of access to health care
• Caused by biological or genetic differences among race groups
What are Healthcare Disparities?

• “Racial or ethnic differences in the quality of healthcare that are not due to access-related factors or clinical needs, preferences, and appropriateness of intervention” (Unequal Treatment: Confronting Racial and Ethnic Disparities in Health Care, 2003)

• “Differences or gaps in care experienced by one population compared with another population” (Agency for Healthcare Research and Quality, National Healthcare Disparities Report, 2009).
What is Health Equity?

• “Attainment of the highest level of health for all people. Requires valuing everyone equally with focused and ongoing societal efforts to address avoidable inequalities, historical and contemporary injustices, and the elimination of health and health care disparities.”

Healthy People, 2020
Unequal Treatment (2003)
Unequal Treatment: Ten Years Later

(March 2014)
U.S. and State Demographics

Source: National Center for Health Statistics, 2002
As of July 1, 2011, the U.S. Census Bureau estimated that 50.4% of the population younger than 1 was minority.
• In 2008, four states—Hawaii (77.1%), California (60.3%), New Mexico (59.8%), and Texas (55.2%)—plus the District of Columbia (64.7%) were already majority minority.
• In the rest of the U.S., minorities constitute 36.6% of the population.

Source: U.S. Census, 2000 and 2012 American Community Survey
Changing Demographics: Language Proficiency

- Increased number of foreign born residents
  - 12.7% of U.S. residents
  - 13.5% of Connecticut residents

- Increased numbers speak a language other than English at home
  - 20.6% of U.S. residents
  - 21.0% of Connecticut residents

- Increased numbers speak English less than "very well" and are considered limited English proficient (LEP)
  - 8.7% of U.S. residents

Source: 2010 U.S. Census and 2012 American Community Survey
Changing Demographics: Language Proficiency

• Between 1990 and 2010, the U.S. LEP population increased 80%.

• Between 1990 and 2010, the 10 states experiencing the greatest growth in their LEP populations were:
  • Nevada (398.2%), North Carolina (395.2%), Georgia (378.8%), Arkansas (311.5%), Tennessee (281.4%), Nebraska (242.2%), South Carolina (237.2%), Utah (235.2%), Washington (209.7%), and Alabama (202.1%).

Changing Demographics: Language Proficiency

• In 8 states, at least 10% of the overall population is already LEP.
  – California (19.8%), Texas (14.4%), New York (13.5%), New Jersey (12.5%), Nevada (12.3%), Florida (11.9%), Hawaii (11.8%), and Arizona (9.9%)

Number of Languages Spoken in Each State

U.S. Total = 322 languages
The Business Case
The Business Case: Economic Burden of Health Inequalities

- Direct Medical Care Costs $229.4 billion for the years 2003-2006.
- Indirect Costs of disability and illness $50.3 billion
- Cost of Premature Deaths were $957.5 billion
- Total $1.24 trillion (in 2008 inflation-adjusted dollars).
The Business Case: Influence on Healthcare Costs

• Poorer patient experience expressed on HCAHPS = reduced reimbursement

• Avoidable readmissions due to lack of culturally competent and health literate care
National Healthcare Quality and National Healthcare Disparities Reports
Exhibit 1. Number and Proportion of All Quality Measures that Are Improving, Not Changing, or Worsening, Overall and for Select Populations

Note: For each measure, the earliest and most recent data available to our team were analyzed; for the vast majority of measures, this represents trend data from 2000–2002 to 2009–2010.
Key: n = number of measures
Improving = Quality is going in a positive direction at an average annual rate of greater than 1% per year.
No Change = Quality is not changing or is changing at an average annual rate of less than 1% per year.
Worsening = Quality is going in a negative direction at an average annual rate of greater than 1% per year.

SOCIAL DETERMINANTS OF HEALTH: WHY IS YOUR ZIP CODE SUCH A STRONG PREDICTOR OF YOUR HEALTH?
Social Determinants of Health

• “The social determinants of health are the circumstances in which people are born, grow up, live, work and age, and the systems put in place to deal with illness. These circumstances are in turn shaped by a wider set of forces: economics, social policies, and politics.”

World Health Organization (WHO). “Commission on Social Determinants of Health: Key Concepts.”
2011 Baltimore City Avertable Deaths by CSA

Legend
Avertable Deaths by CSA
- 50.9 - 70.1
- 43.1 - 50.8
- 34.6 - 43.0
- 21.9 - 34.5
- -31.2 - 21.8

Ranked into quintiles

Prepared by: Baltimore City Health Department
2011 Baltimore City Life Expectancy by CSA

Life Expectancy

Legend
Life Expectancy by CSA
- Red: 62.86 - 66.77 (Lowest)
- Orange: 66.78 - 70.72
- Yellow: 70.73 - 72.74
- Light Yellow: 72.75 - 74.99
- Green: 75.00 - 83.13 (Highest)

Ranked into quintiles

Prepared by: Baltimore City Health Department
2008 World Life Expectancy Rankings

We spend twice as much per person on health care. Yet our life expectancy is among the worst compared to other rich countries.

INTERACTIVE EXERCISE:
HEALTH EQUITY QUIZ
African American males in Harlem have a shorter life expectancy from age five than which of the following groups?

A. Japanese
B. Bangladeshis
C. Cubans
D. Algerians living in Paris
E. All of the above
The biggest killers of African American males in many poor, segregated urban neighborhoods are not violence nor drugs nor AIDS, but heart disease, stroke and other chronic diseases that cut men down in middle age.
On average, how many more supermarkets are there in predominantly white neighborhoods compared to predominantly Black and Latino neighborhoods?

A. About the same
B. 2 times as many
C. 4 times as many
D. 6 times as many
ANSWER:
C. 4 times

Predominantly Black and Latino neighborhoods have more fast-food franchises and liquor stores, yet often lack stores that offer fresh, affordable fruits and vegetables.
Generally speaking, which group has the best overall health in the U.S.?

A. Recent Latino immigrants
B. Native-born whites
C. Native-born Latinos
D. Native-born Asian Americans
Recent Latino immigrants have better health outcomes than other U.S. populations despite being, on average, poorer. However, the longer they live here, the worse they fare.
The most important factor behind the 30 year increase in U.S. life expectancy during the 20th century was:

A. New drugs (like penicillin)
B. Social reforms (like wage and labor laws, housing codes, etc.)
C. The development of the modern hospital system
D. Migration from the countryside to the cities
E. More exercise and less smoking
ANSWER:
B. Social Reforms

Researchers attribute much of our increase in life expectancy to social changes--better wages, housing, job security and working conditions, civil rights laws, sanitation and other protections that improved our health by improving our lives.
Ireland, Sweden, France, Spain, Portugal and the other western European nations all mandate by law paid holidays and vacations of 4 to 6 weeks.

How many days of paid vacation are mandated by law in the U.S.?

A. None
B. 10
C. 12
ANSWER: A. None

The United States is the only rich country that does NOT guarantee any paid vacation NOR any paid sick days by law.

47% of private sector employees must choose between going to work sick and staying home and losing a day’s pay.
Between 1980 and 2000 the gap in life expectancy between the most and least deprived counties in the U.S:

A. Declined by 12%
B. Remained the same
C. Widened by 60%
As economic inequality grew after 1980, so did the life expectancy gap between the rich and the rest of us.

In contrast, a recent study (Krieger et al) showed that premature death and infant mortality gaps narrowed between 1966 and 1980.
