

Seminar Series presentations are considered a supplement to firefighter and Fire Officer classes offered by the Connecticut Fire Academy. Classes provided by the Connecticut Fire Academy comply with NFPA standards and best practices of the fire service. Seminar Series are also based on these standards and practices but can and often do include opinions of the subject matter experts that are delivering the presentation. Attending any number of the Seminar Series will allow the student to, not only add to their existing training; but also encourage the student to choose from the opinions of different speakers to develop their own style of strategies and tactics at emergency scenes, as well as inspire them to acquire more knowledge on fire service subjects.

An Upcoming Seminar Speaker for 2012, you won't want to miss.

Alternative Tool Evolutions for Today's Vehicles

A primer for rescuers on today's techniques with today's tools and concepts

At an extrication incident have you encountered a vehicle your tools couldn't cut, spread or break? If you haven't yet, guess what, more than likely it's going to happen. Unfortunately, it is only going to get more difficult as time marches along. The more options you have in your mental "toolbox" the better off you are and so are your patients. There really is no easy solution to all the newer vehicle material and construction issues. Have the best, strongest cutting force power hydraulic cutter. Have a reciprocating saw with good rescue blades and/or a good rescue air chisel with sharp, long bits. Also, your power hydraulic spreader and rams will come in handy in ways you might not be accustomed to yet. In this seminar he will share with you some alternative tool evolutions from rescuers around the globe to try out on the training ground. Mixed into this presentation is a review of the latest vehicle materials and construction relevant to vehicle technologies that face rescuers today.

Instructor Biography - David Dalrymple, AIEtecRI

David Dalrymple, is a career EMS provider for the RWJUH Emergency Medical Services in New Brunswick, New Jersey, and a volunteer FF/EMT/rescue technician for Clinton EMS/Rescue in Clinton, New Jersey.
