

CREW RESOURCE MANAGEMENT: FROM THE FLIGHT DECK TO THE FIREHOUSE

March 26, 2009
6:30 P.M.—10:00 P.M.

State of Connecticut
Commission on Fire
Prevention & Control
Connecticut Fire
Academy
34 Perimeter Road
Windsor Locks, CT
06096

Following several tragic and preventable airline accidents, the aviation industry sought to find a way to reduce pilot error and reduce the airliner accident rate. The resulting program drastically reduced accidents and fatalities in commercial aviation, led aviation to become one of the safest industries in the world, and came to be known as Crew Resource

Passengers await rescue after a US Airway plane landed in the Hudson River

Management. Now CRM has come to the fire service, and with it the potential to improve safety for firefighters in the manner that the use of SCBA did a generation ago. This class, both through a review of how CRM works and case studies of selected air-

line accidents and firefighter

Line-of-Duty-Deaths, will introduce you to the potential of CRM and how adopting it can help you and your fire department to greatly improve the level of safety in our workplace.

Course # 09194

Course fee: \$15.00 **Class hours:** 4

March 26, 2009— 6:30 p.m.-10:00 p.m.

Location: Southington Fire Headquarters
310 North Main Street
Southington, CT. 06489
