Handling Elevator Emergencies

Class Time: 0830-1630 Fee: \$125.00

This course is designed for the trained professionals that respond to emergencies involving stalled elevators. Emergency personnel with inadequate training in Handling Elevator Emergencies are exposed to an increased risk of injury or death to both the victim and themselves. This comprehensive course will provide emergency responders with intensive classroom and hands-on training on how to safely and effectively remove passengers from stalled elevators.

Topics include: nomenclature, safety, how an elevator functions, construction, outside hoists, elevator safety devices, possible equipment needed, initial response steps, restarting a stalled elevator, lock/out – tag/out procedures, elevator doors, use of hoistway door keys/pick tools, poling, removal of passengers from stalled elevators, and fireman service (phase 1/phase2).

This course features a dynamic PowerPoint presentation accompanied by realistic hands-on skill stations. The combination of the picture filled PowerPoint program and state-of-the-art props, built from actual elevator and escalator parts, enable the presenters to bring the elevator to the classroom. Day 1 spent in the classroom with a dynamic PPT lecture. Day 2 incorporates a tour of hydraulic and traction elevators, use of door keys/pick tools, lowering a hydraulic elevator, top escape hatch removal.

Course instructor: Michael A. Dragonetti

PPE required: Helmet, Gloves, Boots, Eye protection

Class hours: **2 days**

CLASS SIZE IS LIMITED TO 12 STUDENTS. * APPLY NOW*
