

## Using IE8, IE9, and IE10 with OBTS

---

IE8, IE9 and IE10 are suitable for use with OBTS when the following options are selected. IE11 should also work with the settings below, however it is not considered a stable release for OBTS.

1. The Internet Explorer browsing history setting of “**Check for newer versions of stored pages**” should be set to “**Every time I visit the webpage**”. To do this, go to **Internet Explorer > Tools > Internet Options > General > Settings**.
2. Select the **Temporary Internet Files** tab and select **Every time I visit the webpage**.

In addition to the above it would be good to clear the browsing history as well as the browser cache.

3. Press F12, and then press Ctrl-R.

4. Users can set the Compatibility View by going to the OBTS Login Page. When on that page, select **Tools>Compatibility View Settings**.
5. Enter the OBTS URL to the “**Add this Website**” box.
6. Select **Add**.
7. Select **Close**.
