

DSF Services

The State of Connecticut standardized on the Dynamic Site Framework (DSF) portal platform for building out all Agency/Office web sites within the Executive branch of Connecticut State Government. This ongoing initiative is spearheaded by Department of Information Technology, Portal Management Group. More information can be found at <http://www.ct.gov/cpi/>

PPT, the creator of the DSF portal platform, is pleased to offer the State of Connecticut a list of services that we are authorized to perform for State Agencies to assist in their migration to the State's Enterprise Portal Platform. PPT has the expertise and experience of implementing DSF for the Commonwealth of Pennsylvania, Washington DC and many other government entities (see list on following page for examples.)

The following is a list of roles that comprise a DSF project team. Each role is followed by a brief description of what tasks the role performs during a DSF project. PPT would be glad to provide a detailed DSF implementation proposal on request.

- **PPT Account Managers** have vast web development project management experience and focus on delivering a quality product on time and on budget. Task performed include: project management, project plan and client communication, time line management, navigation design, client requirements review and DSF feature alignment.
- **Site Framework Specialists** are seasoned in building, implementing, maintaining PPT's DSF product. They have solid experience with internet and intranet development for large and small enterprises. Tasks performed include: content migration from current web sites into the DSF platform, content cleaning to provide a consistent look and feel for all site content, UI installation, DSF feature implementation and administrative design.
- **User Interface Developers** are responsible for the layout and interface design for all DSF clients. Their crisp and efficient web designs translate into intuitive, usable and visually appealing interfaces. They have the unique ability to interact at any level with client, agencies and developers to achieve an optimal web experience for DSF users. Tasks performed include: graphic design concepts and revisions, site style guide, navigation consulting and custom application user interface design.
- **Quality Assurance Technicians** diligently inspect every site prior to PPT's delivery to clients. Tasks include: review of clients DSF site for consistency of appearance, accessibility compliance (section 508), functional compliance and browser compliance.
- **DSF Trainers** are experts with the DSF software and conduct training for content and site administrators. Tasks performed include:
 - Site administrator training – this training is provided to top level site administrators and covers details about site settings and application level settings.
 - Content administrator training - DSF content administrators are trained on the creation and management of content, calendar events and web forms.
- **DSF Developers** are skilled at leveraging the DSF environment in the creation of eGovernment applications and integrating legacy applications. Tasks performed include: application integration, application development and developer training.

PPT is comprised of committed, energetic, technically excellent professionals who seek to implement the latest in software technology for their clients. Because of the staff's credentials and their proven solutions, PPT has become a Microsoft Gold Certified Partner for Collaborative Solutions. This highly sought-after, nomination-only relationship was initiated by Microsoft Corporation as a direct result of solutions unmatched by most software development and systems integration firms. PPT's strong team model has allowed the firm to consistently deliver high-caliber projects while facilitating the professional growth of each employee.

Sample DSF Site Migration Client List

PPT's DSF product is being utilized as the web presence for more than 1,800 sites. Very few of these sites were developed from scratch and in most cases, content needed to be integrated into the new technology. Below is a small listing of some of those sites:

Marketplace for the Mind.....	www.marketplaceforthemind.com
Pennsylvania PowerPort.....	www.state.pa.us
Pennsylvania Department of Education.....	www.pde.state.pa.us
