272

Hi Jeff-

CTDOT appears to be saying that there may be an alternative crossing without going through the mitigation site? From perspective of section 404, an alternative that avoids wetlands/waters should be the way to go.

Could you align along surrounding roads/ramp to get to SS? I may have already asked the question, and you may have provided justification for the proposed crossing. Is CTDOT the constraint?

Please refresh me.-thanks- Susan

P.S. - I am in CT on 16th with CTDOT; will plan to call you that day if not before.

Susan - Are you guys reviewing this at all? We have commented that a portion of the proposed line in Norwalk goes through one of our old Mitigation sites for Route 7. I'm not sure they understand the seriousness of the issue & also we see a way they can avoid 2 River crossings as well as avoiding our site. Any way you could weigh in on this if needed?
