Re: Docket No. F-2006 – Connecticut Siting Council Review of the Ten-Year Forecast of Connecticut Electric Loads and Resources.

Dear Mr. Phelps:

The following is intended to fulfill such obligations as Connecticut Resources Recovery Authority (CRRA) may have regarding the filing of a report as described in Connecticut General Statute 16-50r. While it is our desire to be comprehensive, we can only make statements in reference to subjects for which we have first hand knowledge.

1. Tabulation of Estimated Peak Loads, Resources and Margins

CRRA owns two generating units (5U and 6U) located at the South Meadows Facility in Hartford, Connecticut. The Claimed Capability of each unit is as follows:

	Summer Claimed Capability	Winter Claimed Capability
South Meadows 5U	25.596 MW	29.230 MW
South Meadows 6U	27.113 MW	30.445 MW

2. Data on Energy Use and Peak Loads for the Five Preceding Calendar Years

CRRA's net production of electricity is as follows:

	South Meadows Combined Electricity Production (5U & 6U)
2001	455,970 MWhrs
2002	438,318 MWhrs
2003	436,542 MWhrs
2004	410,562 MWhrs
2005	411,792 MWhrs
