**Re: Petition No. 1177 – Cellco Partnership d/b/a Verizon Wireless
Petition for a Declaratory Ruling that no Certificate of Environmental
Compatibility and Public Need is Required for the Proposed Installation of a Small
Cell Telecommunications Facility on the Roof of an Existing Commercial Building
at 67 Newtown Road, Danbury, Connecticut**

Dear Ms. Bachman:

On September 17, 2015, the Siting Council approved the above-referenced petition. Recently, Cellco's landlord at the subject property asked my client to relocate its 8' x 8' equipment area from the approved location at the southwest corner of the building to a location along the same side of the building, approximately 45' to the west. The original, approved location and the proposed relocated equipment area is shown on Sheet C-2 of the attached revised project plans. Although minor in nature, the equipment location does deviate from the plan approved by the Council.

The purpose of this letter is to notify the Council of this minor change and seek your acknowledgement that additional Council approvals are not required. I look forward to hearing from you.
