RE: **PETITION NO. 1218** – PSEG Power Connecticut LLC petition for a declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required for the construction, maintenance, and operation of a new 485 megawatt (MW) dual fuel combined-cycle electric generating facility at the existing Bridgeport Harbor Station located at 1 Atlantic Street, Bridgeport, Connecticut.

During a public hearing of the Connecticut Siting Council (Council) held on May 5, 2016, the Council ruled on the following motion:

PSEG Power Connecticut LLC Motion for Protective Order with Respect to Competitive Market Information, dated April 28, 2016.

The motion was granted.

Also during the public hearing, the Council requested the petitioner to submit, on or before May 25, 2016, the following late-filed exhibits:

1. Exhaust Plume Analysis with any inputs/assumptions and any outputs/computer printouts and associated conclusions regarding aviation safety in the vicinity of stack plumes;
2. Witness Resumes;
3. Wetland Analysis; and
4. Air Emissions comparison table for the proposed facility versus the existing facility for applicable air emissions pollutants including but not limited to carbon dioxide. The comparison, at a minimum, should be on a tons per year basis. A per megawatt-hour basis comparison can be included if available.

Upon receipt of the late-filed exhibits, the Council will issue a memorandum requesting parties and intervenors to indicate in writing whether or not further cross examination on the late-filed exhibits is necessary. If there is no written request for cross examination, the Council will close the evidentiary record of this proceeding during a future regular meeting of the Council. If there is a written request for cross examination, the Council shall continue the evidentiary hearing for the above-referenced proceeding on June 7, 2016, in Hearing Room One, Ten Franklin Square, New Britain, Connecticut, beginning at 1:00 p.m.
