RE: Status Update Request for **PETITION NO. 1067** – The Hartford Steam Company declaratory ruling that no Certificate of Environmental Compatibility and Public need is required for the proposed construction, maintenance and operation of a 1.4 MW Fuel Cell combined heat and power cogeneration facility at Hartford Hospital located at 19 Jefferson Street, Hartford, Connecticut.

Dear Ms. Bachman,

I am writing this letter in response to your letter dated April 5, 2016 requesting communication regarding the construction status for the above-referenced facility. Construction was completed and the facility began electrical generation on June 3, 2014. Per stipulation of the City of Hartford, the fuel cell facility was screened from view using a combination of decorative wrought iron fencing and evergreen trees.

If you have any questions or need any additional information, please let me know.

Sincerely,

Derek H. Rudd, P.E.
President & COO
