## Phase I Environmental Site Assessment

General Electric  
3135 Easton Turnpike  
Fairfield, Connecticut 06825

Prepared for: United Illuminating Company

### Conestoga-Rovers & Associates

45 Farmington Valley Drive  
Plainville, Connecticut 06062

October 2014 • 086111 • Report No. 1

## Executive Summary

Conestoga-Rovers & Associates (CRA) was retained by United Illuminating Company (UI) to complete a Phase I Environmental Site Assessment (ESA) of the General Electric (GE) property located on a parcel of land between 180 Hawthorne Drive and 3135 Easton Turnpike in Fairfield, Connecticut (Site). UI is considering acquisition of the Site. The purpose of the Phase I ESA is to identify recognized environmental conditions (RECs), as defined in American Society for Testing and Materials (ASTM) Standard E1527-13 (the Standard), at the Site. This ESA was conducted to assist UI in conducting all appropriate inquiries into previous ownership and use of the Site to qualify for specific landowner liability protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and to evaluate business environmental risk, as defined in the Standard, for the Site. Evaluation of business environmental risk issues may involve addressing one or more non-scope considerations, some of which may be identified herein. The Phase I ESA Site reconnaissance was conducted by CRA on September 11, 2014.

The Site consists of a vacant parcel of land comprising a total of approximately 30,000 square feet in the northern portion of Fairfield, Connecticut. The Site is currently undeveloped. Based on a review of available information, the Site was agricultural land until the early 1960's when it was utilized as a gravel pit until the early to mid-1970's. GE developed the land previously occupied by a portion the gravel pit in 1974 as the corporate headquarters; however, the referenced parcel remained undeveloped and is currently used for recreation.

## Findings and Opinion

Based on the Phase I ESA including the Site reconnaissance, database search, historical records reviewed, information provided by Site personnel, and interviews, the following potential issues were identified regarding RECs, historical RECs, controlled RECs, de minimis conditions, and business environmental risk as defined in the Standard, at the Site:

- i) **Historical Gravel Pit Operations:** Based on the review of available historical information and Site personnel, circa 1960 the Site was historically developed as a gravel pit. Gravel operations reportedly ceased in the late 1970s and the Site was purchased and developed by the GE in 1974. The parcel was allowed to become overgrown and eventually wooded, which is the current status. No evidence exists to suggest a release of hazardous substances or petroleum products associated with gravel pit operations; therefore, it is not considered an REC. However, based on a lack of information regarding the operations and subsequent source of any known or unknown fill material, the potential for Site impairment should be considered a business environmental risk.

- ii) **Historical Agricultural Chemicals:** Based on a review of historical aerial photographs, the Site was used as cultivated farmland from at least 1934 until sometime between 1951 and 1960, prior to development as a gravel pit. Agricultural chemicals such as pesticides, herbicides, and fertilizer would likely have historically been used on the Site. Information regarding historical use, storage or application rates was not available. If the chemicals were applied in accordance with manufacturer recommendations, residuals remaining in Site soils would be expected to be similar to other area properties. No information was available to determine whether residual concentrations exceeded government use or exposure criteria. Application of agricultural chemicals for intended use is not considered a release; therefore, potential residuals remaining would not be considered an REC. However, the potential presence of agricultural chemicals may have resulted in Site impairment that may have or could result in adverse impact to Site soil and groundwater. Consideration should be given to the potential presence of these chemicals when evaluating business environmental risk and future uses of the Site.

### ***Conclusions***

CRA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E1527-13 of the GE property located between 3235 Easton Turnpike and 180 Hawthorne Drive in Fairfield, Connecticut. Any exceptions to, or deletions from this practice are described in Section 1.0 of this report.

#### ***Recognized Environmental Conditions***

This assessment has revealed no evidence of RECs at this Site.

#### ***Historical Recognized Environmental Conditions***

This assessment has revealed no evidence of historical RECs at this Site.

#### ***Controlled Recognized Environmental Conditions***

This assessment has revealed no evidence of controlled RECs at this Site.

### ***Business Environmental Risk***

While not considered to be RECs, the following findings described above may have resulted in environmental impairment to the Site and should be considered when evaluating business environmental risk associated with the Site.

- **Historical Agricultural Activities**

- **Historical Gravel Pit Operations**

This summary does not contain all of the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided, and to aid in any decisions made, or actions taken, based on this information.

## Section 1.0 Introduction

Conestoga-Rovers & Associates (CRA) was retained by United Illuminating Company (UIL) to complete a Phase I Environmental Site Assessment (ESA) of General Electric (GE) parcel located between 180 Hawthorne Drive and the current GE property located at 3135 Easton Turnpike in Fairfield, Connecticut (Site). The purpose of the Phase I ESA was to identify recognized environmental conditions (RECs), as defined in American Society for Testing and Materials (ASTM) Standard E1527-13 (the Standard), at the Site. This ESA was conducted to assist UIL in conducting all appropriate inquiries into previous ownership and use of the Site to qualify for specific landowner liability protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) for the Site and to evaluate business environmental risk, as defined in the Standard, for the Site. Evaluation of business environmental risk issues may involve addressing one or more non-scope considerations, some of which may be identified herein. The Phase I ESA Site reconnaissance was conducted by CRA on September 11, 2014. A Site location map is provided on Figure 1. A Site plan is provided on Figure 2. Photographs taken during the Site reconnaissance are presented in Appendix A.

The Phase I ESA was conducted in general accordance with the ASTM Standard E1527-13 for conducting environmental assessments. The assessment included an environmental database search, historical records review, a Site reconnaissance of accessible areas, a review of relevant Site records made available to CRA, and interviews with individuals associated with the Site. This Phase I ESA was prepared by Ms. Kyle Eckert and Mr. Charles D. Kizina of CRA, both of whom are environmental professionals, as defined in the Standard. Copies of curricula vitae outlining their qualifications are contained in Appendix B.

The following terms used in this report are defined in the Standard as follows:

- REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment, under conditions indicative of a release to the environment or under conditions that pose a material threat of a release to the environment (de minimis conditions are not RECs).
- Historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (i.e., property use restrictions, activity and use limitations, institutional controls or engineering controls). HRECs are not RECs.
- Controlled REC (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place

subject to the implementation of required controls (i.e., property use restrictions, activity and use limitations, institutional controls or engineering controls).

- Business Environmental Risk (BER) means a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the Standard.
- De minimis condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs or CRECs.

The following tasks were conducted during the assessment:

- Interviews with personnel associated with the Site
- Review of Federal and State environmental databases and historical records (e.g., fire insurance maps, city directory, etc.)
- Review of historical aerial photographs of the Site
- Review of past and current property use and adjoining property occupancy
- Reconnaissance of the facilities, equipment, utility services, operations, and associated Site records
- Observations of conditions that represent releases or threatened releases of hazardous substances or petroleum products to the ground, surface waters or groundwater of the Site
- Review of chemical use and storage and spill/release incidents
- Review of the results of any prior reconnaissance conducted at the Site
- Review of waste handling, accumulation, storage, and disposal practices
- Review of air emissions and wastewater discharges
- Review of equipment that potentially contains polychlorinated biphenyls (PCBs)
- Review of aboveground and underground storage tank records
- Review of previous environmental reports prepared for the Site

CRA relied on information received from third parties and during the ESA interviews to the extent that the information was reasonably ascertainable, and also assumed the information received to be accurate unless contradicted by written documentation or field observations.

The following report summarizes the information gathered by CRA during the Phase I ESA and identifies RECs, HRECs, CRECs, BERs, and de minimis conditions as defined in the Standard at the Site.

Evaluation of the Site for these criteria was performed for the purpose of providing a general indication of potential matters that could impact the acquisition/divestiture, operation, and/or development of the Site. This assessment does not serve as a substitute for asbestos containing material (ACM), radon gas, lead-based paint (LBP), or mold testing or survey, a wetlands delineation, a regulatory compliance audit, or a health and safety audit.

### **1.1 Exceptions**

No exceptions to the Standard were taken in completion of this ESA.

### **1.2 Limiting Conditions**

No limiting conditions were encountered during completion of this ESA.

### **1.3 Significance and Use**

This ESA was conducted in a manner consistent with that level of care and skill exercised by members of the environmental engineering and science profession currently practicing under similar conditions, and was based upon the information made available to CRA representatives at the time of this assessment. It remains important to recognize that no Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the Site. The performance of the assessment is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a Site. The User, as defined in the Standard, must recognize reasonable limits of time and cost.

The Phase I ESA has been prepared for the use of UIL and may not be relied upon by any other party without CRA's written consent. In accordance with Section 4.6 of the Standard, this Phase I ESA is viable until February 25, 2015, which is 180 days from the oldest primary component of the ESA.

## **Section 2.0 Site Description and Location**

### **2.1 Site Description**

The Site consists of an approximate 0.68-acre parcel consisting of undeveloped, wooded land. The Site is currently used by GE for a walking trail for employees. The Site was initially

developed as cultivated land from at least 1938 until sometime after 1960 and was then developed as a gravel pit from the early-1960's to the early-1970's, based on the historical information reviewed. Gravel operations ceased in the early-1970s, as evidenced by the available aerial photographs, and the Site was purchased by the GE in 1974 (as reported by GE) and used primarily for recreation.

Access to the parcel of land is provided by a paved walking trail to the north from the adjoining GE property. The GE corporate headquarters administrative buildings are located to the north and west of the Site, and a UIL substation to the south. Easton Turnpike to the east of the Site, and beyond is residential. No stressed vegetation, ponding, or indications of on-Site waste disposal were observed during the Site inspection or in the available historical aerial photographs reviewed.

## **2.2 Environmental Setting/Adjoining Properties**

The Site is located in a mixed-residential and commercial area in the northern portion of Fairfield, Fairfield County, Connecticut. General topographic gradient at the Site and surrounding area is to the west, toward the Mill River, based on the United States Geological Survey (USGS) topographic map and information provided in the database search.

The Site is bordered by the following properties:

North: By GE corporate headquarters administrative buildings

East: By Easton Turnpike and beyond residential properties

South: By UIL property and substation, and beyond Hawthorne Avenue and residential properties

West: By wooded GE undeveloped property and administrative buildings

No evidence of conditions that represent potential releases or threatened releases of hazardous substances or petroleum products to the Site from adjoining properties was observed by CRA during the Site reconnaissance. Site personnel were not aware of any releases on adjoining properties. The adjoining GE site is listed in the leaking underground storage tank (LUST) database, but has a closed status. No other adjoining properties were listed in the databases searched regarding the use or releases of hazardous substances or petroleum products. Please see Section 3.7 for additional discussion.

No information was found pertaining to possible fill materials in the gravel pit area.

No evidence of gas or oil wells, water supply wells, bulk chemical/petroleum storage, etc. was observed on properties adjoining the Site.

No surface water bodies are located on Site. The nearest surface water body to the Site is the Mill River located approximately 1,000 feet west of the Site. The Site is not listed as being in the 100-year or 500-year flood zone.

Based on the database search, soils underlying the Site are anticipated to consist of the Udorthents Series and Paxton Series. Soil surface texture consists of silt clay and silty soils, which is well-drained, with slow infiltration rates. Based on the general topographic gradient at the Site and the presence of the Mill River to the west, it is estimated that shallow groundwater beneath the Site would flow to the west.

No Site-specific information was available for review regarding Site soils, depth to groundwater or groundwater flow direction.

### **Section 3.0 Environmental Databases Search and Historical Records Review**

#### **3.1 Environmental Databases Search**

CRA contracted Environmental Data Resources, Inc. (EDR) to conduct a search of federal and state environmental databases. Based on the address of the Site and the Site boundaries, the database searches were completed to assist in the identification of RECs in connection with the Site and to assess the likelihood of an impact to the Site from migrating hazardous substances or petroleum products within the approximate minimum search distance (AMSD) specified in the Standard as follows:

<i>Database</i>	<i>Search Radius</i>
National Priority List (NPL)	1 mile
Delisted NPL Database	1 mile
NPL Liens	Site only
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	0.5 mile
CERCLIS No Further Remedial Action Planned (CERCLIS-NFRAP)	0.5 mile
Corrective Action Report (CORRACTS)	1 mile
Resource Conservation and Recovery Act Information (RCRA) Treatment, Storage or Disposal Facility (TSDF)	0.5 mile
RCRA Large Quantity Generator (RCRA-LQG)	Site/Adjoining Property
RCRA Small Quantity Generator (RCRA-SQG)	Site/Adjoining Property

<b>Database</b>	<b>Search Radius</b>
RCRA - Conditionally Exempt Small Quantity Generators (RCRA-CESQG)	Site/Adjoining Property
Emergency Response Notification System (ERNS)	Site only
Toxic Chemical Release Inventory System (TRIS)	Site only
US Engineering Controls	0.5 mile
US Institutional Controls	0.5 mile
US Brownfields List	0.5 mile
Superfund (CERCLA) Consent Decrees (Consent)	1 mile
Records of Decision (ROD)	1 mile
Department of Defense (DOD)	1 mile
CERCLA Lien Information (LIENS 2)	Site only
Inventory of Hazardous Disposal Sites (CT SHWS)	1 mile
Site Discovery and Assessment Database (CT SDADB)	0.5 mile
CT Contaminated or Potentially Contaminated Sites (CT CPCS)	0.5 mile
List of Landfills/Transfer Stations (SWF/LF)	0.5 mile
Leaking Underground Storage Tank (LUST)	0.5 mile
CT Underground Storage Tank (CT UST) Facility List	Site/Adjoining Property
Oil & Chemical Spill Database (CT Spills)	Site only
Environmental Land Use Restriction (AUL)	0.5 mile
Voluntary Remediation Sites (VCP)	0.5 mile
Brownfields	0.5 mile
Drycleaners	0.25 mile
Indian Reservations	1 mile
Indian UST	Site/Adjoining Property
Indian LUST	0.5 mile

A copy of the database search, which includes definitions for the above-referenced databases, is included as Appendix C. It should be recognized that the availability, accuracy and completeness of the record information may vary among information sources, including governmental sources. The following is a summary of the databases searched with the findings as noted.

### **3.1.1 Database Listing for the Site**

The Site address was not listed in any of the aforementioned databases searched.

### **3.1.2 Database Listings for Adjoining Properties**

The following adjoining properties were listed in the aforementioned database(s) searched with the status as noted.

<i>Property Address</i>	<i>Listed Entity</i>	<i>Listing</i>
3135 Easton Turnpike	General Electric Company	LUST/RSRs Reached SPILLS/Closed

Based on the information presented in the database search, one of the adjoining properties was identified as having potential impact to the Site based on the use or release of hazardous substances or petroleum products at the properties. See Section 3.7 for additional information.

### 3.1.3 Additional Area Properties

The following properties within the effective AMSD of the Site were listed in the aforementioned database searched with the status as noted.

<i>Property Address</i>	<i>Listed Entity</i>	<i>Listing/Status</i>
2687 Easton Turnpike (1/8 – 1/4 mile ENE)	Palumbo	LUST CPCS
2629 Easton Turnpike (1/8 – 1/4 mile E)	Sport Hill Service Center	LUST
30 Autumn Ridge Road (1/8 – 1/4 mile ENE)	Thelma Ravitz	LUST CPCS
Merrit Parkway Southbound (1/4 – 1/2 mile NW)	Mobil Service Station 06-109	SDADB
Merrit Parkway Northbound (1/4 – 1/2 mile NNW)	Mobil #01-FBH	SDADB
218 Wheeler Park Avenue (1/4 – 1/2 mile SSE)	Larry Cochman	LUST CPCS
402 Wheller Falls Avenue (1/4 – 1/2 mile S)	Mr. Dematto	LUST CPCS
583 Jefferson Street (1/4 – 1/2 mile NNW)	Lacy Residence	CPCS

Based on the distances from the Site and a review of available database information, no evidence of the potential for a hazardous substance or petroleum product release impacting the Site attributable to the above-mentioned properties was identified based on information provided in the EDR Radius Map™ report.

### 3.1.4 Unmapped Properties

In addition to the above, the database search identified a number of properties that could not be mapped by EDR based on the address information within the database system, also referred to as "orphan" sites in the database search results. A complete listing of the unmapped properties is included in Appendix C.

CRA reviewed the list of unmapped properties and confirmed that none of the listed properties are located adjoining to or in close proximity to the Site based on the available information.

### **3.2 Historical Records Review**

CRA reviewed the following information, where reasonably ascertainable, to identify the historical usage of the Site and adjoining properties.

- Sanborn Fire Insurance Maps
- Property Title Search
- Historical Aerial Photographs
- City Directories
- Historical Topographic Maps

#### **3.2.1 Sanborn Fire Insurance Maps**

Sanborn Fire Insurance maps assist in the identification of historical land use and commonly illustrate the existence and location of aboveground and underground storage tanks, structures, improvements, and facility operations. No Sanborn maps were reported to be available for the Site in the EDR Sanborn Library, LLC collection.

A copy of the Certified Sanborn Map report is presented in Appendix D.

#### **3.2.2 Property Title Search**

Property title information for the Site was not available for review. Based on information available from the Fairfield Land Records Office and GE, the Site is owned by GE.

#### **3.2.3 Historical Aerial Photographs**

Aerial photographs assist in the identification of Site features and outdoor activities of potential environmental concern. Aerial photographs of the Site for the years 1934, 1951, 1960, 1969, 1971, 1979, 1985, and 2010 were available from EDR and were reviewed by CRA. The specific details observed at the Site and adjoining properties are dependent on the scale and quality of the aerial photographs reviewed. Following is a summary of observations based on the review of the aerial photographs.

- 1934: The 1934 aerial photograph was reviewed at a scale of one inch equals approximately 500 feet and depicts the Site as cultivated land and the adjoining properties as vacant sparsely vegetated or cultivated land to the north, west, east and south.
- 1951: The 1951 aerial photograph was reviewed at a scale of one inch equals approximately 500 feet and depicts the Site as cultivated land and the adjoining properties as vacant sparsely vegetated or cultivated land to the north, west and south. Easton Turnpike and residential size buildings are observed to the east of the Site.
- 1960: The 1960 aerial photograph was reviewed at a scale of one inch equals approximately 500 feet and depicts the Site and adjoining properties to the north and west as a gravel pit. The properties to the east and south of the Site are depicted as a residential neighborhood.
- 1969: The 1969 aerial photograph was reviewed at a scale of one inch equals approximately 500 feet and depicts the Site in a similar configuration as the 1960 aerial photograph. The residential development across Easton Turnpike to the east is expanded as well as to the south of the Site.
- 1971: The 1971 aerial photograph was reviewed at a scale of one inch equals approximately 500 feet and depicts the adjoining property to the north of the Site cleared and under construction. The adjoining properties to the east and south were depicted in a similar configuration as the 1969 aerial photograph.
- 1979: The 1979 aerial photograph was reviewed at a scale of 1 inch equals approximately 500 feet and depicts the UIL substation adjoining to the Site to the south and the GE corporate headquarters administrative buildings on the adjoining property to the north. The remaining open area and the Site were depicted as sparsely vegetated or wooded. The residential neighborhoods to the south of the Site and across Easton Turnpike were depicted as more developed.
- 1985: The 1985 aerial photograph was reviewed at a scale of 1 inch equals approximately 500 feet and depicts the expansion of the GE complex to the northwest of the Site. The UIL substation to the south is shown as expanded as well. The Site appears sparsely vegetated and undeveloped.
- 2010: The 2010 aerial photograph was reviewed at a scale of 1 inch equals approximately 500 feet and depicts the Site and surrounding properties as essentially unchanged, with the exception that vegetation had filled in around the GE complex and UIL substation.

Based on a review of the available aerial photographs, the Site was agricultural land from the date of the earliest available aerial photograph until at least 1951. The Site was a gravel pit from the mid-1960's until sometime between 1969 and 1974 when adjoining properties were developed. The former use of the Site as cultivated land has potentially resulted in residual

concentrations of agricultural chemicals remaining in soils at the Site. Nothing was observed pertaining to the possible filling of the gravel pit excavation.

Copies of available aerial photographs of the Site are presented in Appendix E.

### **3.2.4 City Directories**

A city directory search was conducted by EDR from the first available directory to the present. There is no street address for the Site, so the adjoining property address of 180 Hawthorne Avenue, Fairfield, Connecticut was used to get an idea of nearby properties.

According to EDR, city directory coverage was not available for the 180 Hawthorne Avenue address. The adjoining properties were listed as residential.

### **3.2.5 Historical Topographic Maps**

Historical topographic maps were reviewed to assist in the identification of historical land use, to document the general development of the Site and properties in the vicinity of the Site, and to identify potential on-Site fill activities. Historical topographic maps of the Site and surrounding areas for the years 1893, 1943, 1951, 1960, 1971 (photo-revised from 1960), and 1975 were available from EDR and were reviewed by CRA. Following is a summary of observations based on review of the historical topographic maps.

- 1893: The 1893 topographic map was reviewed at a scale of 1:62500 and depicts the Site as vacant vegetated land. No development is depicted in proximity to the Site with the exception of Easton Road.
- 1943: The 1943 topographic map was reviewed at a scale of 1:25000 and depicts the Site as vacant partially vegetated land. The land along the northern boundary of the site is depicted as not vegetated. The Merritt Parkway is depicted to the north of the Site, and a structure is depicted to the south of the Site.
- 1951: Two 1951 topographic maps were reviewed at a scale of 1:24000. The topographic maps depict the Site as partially vegetated. Two access roads are depicted to the north and the south of the Site. Structures were depicted along Easton Road to the east and on the access road to the south of the Site.
- 1960: The 1960 topographic map was reviewed at a scale of 1:24000 and depicts the site as cleared of vegetation and as a topographical low, possibly a gravel pit. Colonese Road and residential structures are depicted to the south of the Site. The property adjoining the northern boundary the Site along Easton Road depicted a structure.
- 1971: The 1971 topographic map was reviewed at a scale of 1:24000 and depicts Hawthorne Street with a structure along the southern boundary of the Site, north of Colonese

Road, and additional structures are depicted to the east of the Site, beyond Easton Road.

1975: The 1975 topographic map was reviewed at a scale of 1:24000 and depicts the Site and adjoining properties in essentially the same configuration as the 1971 topographic map.

Nothing observed on the topographic maps was indicative of the potential presence of hazardous substances or petroleum products at or adjoining the Site. A former gravel pit is depicted on and adjoining the Site.

Copies of available historical topographic maps of the Site are presented in Appendix F.

### 3.3 Government Records Review

CRA submitted Freedom of Information Act (FOIA) requests for the Site address to:

- The Town of Fairfield Office of Land Records
- The Town of Fairfield Health Department
- The Town of Fairfield Fire Department
- The Connecticut Department of Energy and Environmental Protection (CT DEEP)
- United States Environmental Protection Agency

Environmental records associated with utilities (i.e., septic systems, wells, etc.), hazardous and solid waste, water, air, remediation, emergency responses, spills/releases, underground and aboveground storage tanks were requested. It should be noted that summarized information received from the agencies is not intended to be all inclusive of the complete files obtained from the agencies; but only to briefly summarize significant findings.

Additionally, CRA conducted a search on the U.S. EPA's MyPropertyInfo website to determine if information was available based on the two adjoining property addresses of 3135 Easton Turnpike and 180 Hawthorne Drive. The Site does not have a street address.

The U.S. EPA MyPropertyInfo website identified the adjoining GE Corporate Headquarters at the address of 3135 Easton Turnpike on the Agency Compliance and Enforcement Systems, Biennial Reporters, Air Facility System operator, Toxic Substances Control Act (TSCA), Small Quantity Generator (SQG) and RCRA Information System Databases. No violations or enforcement actions at the Site address were identified on the U.S. EPA website. Not that the EDR database did not identify 3135 Easton Turnpike as a SQG.

The Site address of 180 Hawthorne Drive, Fairfield, Connecticut was not found on the U.S. EPA MyPropertyInfo website.

CRA reviewed the Town of Fairfield's Land Office Records, which provided information regarding property ownership. According to a review of available records, the Site is owned by GE.

A review of the CT DEEP's files indicated a 10,000 gallon underground storage tank (UST) was removed from the adjoining GE property to the north, downstream of the Site, on May 2007. Soil samples collected from the bottom of the tank grave indicated concentrations of aromatic volatile organic compounds (VOCs) below applicable CT DEEP Remediation Standard Regulations (RSRs). No VOCs or lead were detected from beneath the product lines. No further action was required.

### **3.4 Recorded Environmental Clean-Up Liens**

CRA contracted EDR to conduct a search of environmental liens and activity and use limitations (AULs) associated with the ownership or occupation of the Site. Information was found at the Fairfield Land Records Office for the Site listed as 3135 Easton Turnpike parcel 22-91 and for 180 Hawthorne Drive (Parcel 22-34-A).

Based on documentation provided by EDR, GE sold the parcel associated with 3135 Easton Turnpike to National Broadcasting Company Holding, Inc. in May 2004 and then re-purchased the parcel from National Broadcasting Company Holding, Inc. in April 2012.

Based on documentation provided by EDR, UIL purchased the property at 180 Hawthorne Drive in March 1967.

The environmental lien and AUL search conducted by EDR indicated that no environmental liens or AULs were found recorded at the Fairfield Land Records Office for either address (as of August 29, 2014).

The Site address was not listed in the EDR Radius Map™ report as having any environmental liens or AULs. Site personnel were unaware of any environmental liens or AULs associated with the Site address.

A copy of the EDR Environmental Lien and AUL Search Report is provided in Appendix G.

### 3.5 User Information

A User Questionnaire was submitted to Mr. Shawn Crosbie of GE for completion to address certain User responsibilities in accordance with ASTM E1527-13. Mr. Crosbie completed the User Questionnaire, which is provided in Appendix H. Based on the answers to the questionnaire, Mr. Crosbie is not aware of any potential environmental issues that would have resulted in a potential release of hazardous substances and/or petroleum products to the Site.

### 3.6 Previous Site Investigations/ESAs

No previous environmental reports for the Site were available for CRA review.

### 3.7 Adjoining Property Issues

Based on a review of the U.S. EPA MyPropertyInfo website, the adjoining property to the north of the Site, GE, was listed in the RCRA-SQG, LUST, and SPILLS databases. Note that the EDR database did not identify this adjoining property as a RCRA-SQG (see Section 3.1.2). As indicated in Section 3.3, a review of the CT DEEP's files indicated a 10,000 gallon UST was removed from the adjoining GE property to the north, downstream of the Site, on May 2007. Soil samples collected from the bottom of the tank grave indicated trace concentrations of aromatic VOCs; however concentrations did not exceed applicable CT DEEP RSRs. No VOCs or lead were detected from beneath the product lines. Since VOC's were detected in the soil, a release was reported to the CT DEEP; however because concentrations were below applicable CT DEEP RSR's, the file was closed with no further action recommended, as reported in "Underground Storage Tank Closure Report" by Leggette, Brashears & Graham, Inc., dated June 2007. CRA was unable to obtain a copy of the report for inclusion herein, but was reviewed by the assessor.

No activities on adjoining properties were observed during the Site reconnaissance, as viewed from the Site and publicly accessible areas, which appeared to pose a concern for impacts to the Site. Individuals associated with the Site were unaware of any environmental impacts associated with the adjoining properties and indicated that prior to development by GE circa 1974 for use as the GE Corporate Headquarters, the adjoining property was a gravel pit.

No other potential impacts were identified with the other adjoining properties.

### 3.8 Vapor Encroachment Screening

A Tier I vapor encroachment screen (VES) as described in ASTM E2600-10 was completed to identify any vapor encroachment conditions (VECs) associated with the Site. No VECs associated with the Site were identified by CRA due to the following information:

- The Site is currently a wooded vacant lot with no buildings
- The Site is planned to be used for an electrical substation
- The surrounding area consists of residential properties to the south and east, wooded land to the west, and the GE Corporate Headquarters to the north
- According to available information, the Site has been historically used as agricultural land and/or a gravel pit
- No information was found to determine the materials used to backfill the gravel pit.
- No information from the database search identifies potentially contaminated sources on or near the Site
- No historical records related to prior use of the Site and surrounding properties indicate potentially contaminated sources on or near the Site
- The general physical setting information reviewed has no impact on vapor migration potential
- No significant natural or man-made conduits that may provide a direct path for vapors to enter structures on the Site were identified
- No user specified knowledge regarding potential issues at the Site or surrounding properties regarding sources of contamination was made available to CRA

Based on the VES conducted for the Site, no VECs are likely to exist at the Site. However, no information was available for review to determine if any materials used to backfill the former on-Site and adjoining off-Site gravel pit would possible cause VECs.

### Section 4.0 Site Inspection

On August 11, 2014, Ms. Kyle Eckert of CRA completed a reconnaissance of the vacant parcel that comprised the Site. The visit included a reconnaissance of the Site, review of relevant Site records available to CRA, visual observations of adjoining properties as viewed from the Site and surrounding roadways, and interviews with individuals associated with the Site. Interviews were conducted using a prepared questionnaire covering environmental and other Site-related topics. CRA employs a systematic approach to the Site reconnaissance process that seeks to obtain information indicating the likelihood of identifying RECs in connection with the Site.

CRA was accompanied during the Site reconnaissance by:

<i>Site Personnel</i>	<i>Position</i>	<i>Years Familiar with the Site</i>
Mr. William O'Brien	Manager Headquarter Facilities	16+

Site personnel provided information regarding Site operations and historical Site use. Mr. O'Brien, as the Manager of Headquarter Facilities, was identified as the key Site manager to be interviewed.

#### **4.1 Utility Services**

No structures are currently located at the Site and no utility service is provided to the Site.

#### **4.2 Underground Storage Tanks (USTs)**

According to Site personnel, no USTs are currently or have historically been located at the Site. CRA observed no evidence of current or former USTs during the Site inspection. The Site was not listed in the UST or LUST databases searched as having any USTs or releases therefrom.

#### **4.3 Aboveground Storage Tanks (ASTs)**

According to Site personnel, no ASTs are currently or have historically been located at the Site. CRA observed no evidence of current or former ASTs during the Site inspection.

#### **4.4 Raw Material and Chemical Use and Storage**

No chemicals are currently used or stored at the Site. No staining was observed at the Site and no evidence of a release of chemical or petroleum products from the Site was observed by CRA during the Site inspection. Mr. O'Brien stated that to his knowledge, no chemical or petroleum spills or releases from former Site gravel operations have occurred at the Site.

#### **4.5 Non-Hazardous Waste**

According to Mr. O'Brien, no non-hazardous wastes are generated or managed at the Site. Based on CRA field observations, no non-hazardous wastes are currently generated, treated, stored, or disposed on Site. The Site was not listed in the databases searched as a non-hazardous waste generator or management facility. No information was available to determine if any non-hazardous waste was used to backfill the former on-Site gravel pit.

#### **4.6 Hazardous/Universal Waste**

According to Mr. O'Brien, the Site does not generate any hazardous or universal wastes. No evidence of the on-Site generation or management of hazardous waste was observed by CRA during the Site inspection. The Site is not listed in the database search as a hazardous waste generator or management facility. No information was available to determine if any hazardous waste was used to backfill the former on-Site gravel pit.

#### **4.7 Wastewater/Sewers**

No wastewater is currently generated at the Site and no evidence of catch basins, dry wells, or sewers was observed by CRA during the Site inspection. No information was available to determine if any wastewater or sewer utilities are present on the Site.

#### **4.8 Storm Water**

Stormwater runoff from the Site includes infiltration into unpaved areas, overland flow onto the adjoining GE property and municipal stormwater catch basins or to surrounding scrub or woodland.

No outdoor industrial activity or chemical/raw material storage that has the potential to adversely impact stormwater quality was observed by CRA on the Site at the time of the Site inspection.

#### **4.9 Air Emissions**

According to Site personnel and based on CRA's observations, there are no regulated air emissions sources present at the Site.

#### **4.10 Polychlorinated Biphenyls (PCBs)**

No potential PCB-containing equipment was observed by CRA during the Site inspection. The Site is currently undeveloped.

#### **4.11 Spills/Releases**

According to Site personnel, no reportable spills or releases of hazardous substances or petroleum products have occurred at the Site. No evidence of any significant spills or releases of hazardous substances or petroleum products was observed by CRA during the Site reconnaissance. The Site was not listed in the database search for any release incidents.

#### 4.12 CERCLA Liability Potential

The Site is not listed on the NPL or in the State Hazardous Waste Site Database. According to Site personnel, the Site has never received notification from any government agency or third party of liability as a potential responsible party in any hazardous waste storage, treatment, or disposal Site. The Site has never defended any environmental-related claims or litigation asserted by any governmental agency or third party and no potential claims or litigation presently exist to the best knowledge of Mr. Crosbie.

### Section 6.0 Summary of Identified Environmental Issues

#### 6.1 Findings and Opinion

Based on the Phase I ESA including the Site reconnaissance, database search, historical records reviewed, information provided by Site personnel, and interviews, the following potential issues were identified regarding RECs, HRECs, CRECs, de minimis conditions, and business environmental risk as defined in the Standard, at the Site:

- i) **Historical Gravel Pit Operations:** Based on the review of available historical information and Site personnel, circa 1960 the Site was historically developed as a gravel pit. Gravel operations reportedly ceased in the late 1970s and the Site was purchased and developed by the GE in 1974. The parcel was allowed to become overgrown and eventually wooded, which is the current status. No evidence exists to suggest a release of hazardous substances or petroleum products associated with gravel pit operations; therefore, it is not considered an REC. However, based on a lack of information regarding the operations and subsequent source of any known or unknown fill material, the potential for Site impairment should be considered a business environmental risk.
- ii) **Historical Agricultural Chemicals:** Based on a review of historical aerial photographs, the Site was used as cultivated farmland from at least 1934 until sometime between 1951 and 1960, prior to development as a gravel pit. Agricultural chemicals such as pesticides, herbicides, and fertilizer would likely have historically been used on the Site. Information regarding historical use, storage or application rates was not available. If the chemicals were applied in accordance with manufacturer recommendations, residuals remaining in Site soils would be expected to be similar to other area properties. No information was available to determine whether residual concentrations exceeded government use or exposure criteria. Application of agricultural chemicals for intended use is not considered a release; therefore, potential residuals remaining would not be considered an REC. However, the potential presence of agricultural chemicals may have resulted in Site impairment that may have or could result in adverse impact to Site soil and groundwater. Consideration should be given to the potential presence of

these chemicals when evaluating business environmental risk and future uses of the Site.

## **6.2 Conclusions**

CRA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E1527-13 of the GE property located between 3235 Easton Turnpike and 180 Hawthorne Drive in Fairfield, Connecticut. Any exceptions to, or deletions from this practice are described in Section 1.0 of this report.

### **6.2.1 Recognized Environmental Conditions**

This assessment has revealed no evidence of RECs at this Site.

### **6.2.2 Historical Recognized Environmental Conditions**

This assessment has revealed no evidence of HRECs at this Site.

### **6.2.3 Controlled Recognized Environmental Conditions**

This assessment has revealed no evidence of CRECs at this Site.

## **6.3 Business Environmental Risk**

While not considered to be RECs, the following findings described above may have resulted in environmental impairment to the Site and should be considered when evaluating business environmental risk associated with the Site.

- **Historical Agricultural Activities**
- **Historical Gravel Pit Operations**

## **6.4 Data Gaps/Data Failure**

A data gap, as defined in the Standard, is an absence of information that affects the ability of the environmental professional to identify RECs. Data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. No data gaps/failures were identified.

## Section 7.0 Environmental Professional Statement

This Phase I ESA was completed by or under the direct supervision of an Environmental Professional (EP), who to the best of our professional knowledge and belief, meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. The EP has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed all appropriate inquiries (AAI) in conformance with the standards and practices set forth in 40 CFR Part 312. Under the final AAI Standard, certain aspects of the Phase I ESA (interviews, on-site visual reconnaissance, the historical records review, and the search for environmental liens) may require an update if the timeframe between their completion and acquisition of the Site exceeds 180 days.

### **Assessor Qualifications**

**EDUCATION**

B.A.Sc.            Civil Engineering, Minor in Environmental Engineering, University of Connecticut, 2000

**EMPLOYMENT HISTORY**

2011-Present    Conestoga-Rovers & Associates, Plainville, CT  
2008             Vanasse, Hangen & Brustlin, Middletown, CT  
2003-08         AARON Environmental, LLC, Plantsville, CT  
2002-03         Consulting Environmental Engineers, West Hartford, CT  
2000-02         Fuss & O'Neill, Inc., Manchester, CT

**PROFESSIONAL REGISTRATIONS/AFFILIATIONS**

Registered Professional Engineer: Connecticut  
Member, American Society of Civil Engineers  
Member, Society of Women Engineers

**PROFILE OF PROFESSIONAL ACTIVITIES**

**Environmental Investigation**

- Project coordinator for multi-disciplinary projects for clients and sites in Connecticut. Experience and expertise includes the following areas:
  - Whole facility environmental compliance which includes environmental permitting and plans required by the state and federal agencies
  - Various document and technical report preparation, including work plans, contract documents, and health and safety plans
  - Liaison with local, state, and federal agencies
  - Data management and analysis

**Environmental Assessments and Assistance**

- Performed environmental compliance assistance and assessments at the following facilities:
  - Abrasives and ceramics manufacturing facility - Massachusetts
  - Fertilizer blending facility - Massachusetts
  - Telecommunication company - Connecticut
  - Dock-side fuel terminal - New York
  - Industrial forging facility - Connecticut
  - International software company - Connecticut, New York, and Massachusetts
  - State university system - Connecticut
  - Gravel and asphalt manufacturing facility - Connecticut

- International consumer gasoline filling station – Connecticut and New York

## **Structural Building Inspections**

- Structurally inspected residential homes impacted by flood waters.
- Provide expert opinion on integrity of structure and assessed damage.

## **Greenhouse Gas Verifications**

- Verify Facility greenhouse gas reporting following The Climate Registry's General Reporting Protocol.

## **Project Experience**

- Environmental compliance manager for fertilizer blending facility in Massachusetts.
- Inspected over 30 residential homes in New England to assess damage due to flood waters.
- Act as co-lead verifier for verification of greenhouse gas reporting for multiple facilities in Massachusetts.
- Preparation of SPCC Plans at various sites in Connecticut, New York and Massachusetts.
- Project coordinator for registering a large software company in the Connecticut storm water program, which included preparing Storm Water Pollution Prevention Plan, provide training to facility employees and coordinate storm water sampling.
- Project coordinator for quarterly waste water and storm water sampling at a forging company in Middletown, Connecticut. Responsibilities include performing aforementioned sampling, submitting reports to the State and addressing exceedances.
- Project coordinator for environmental compliance services for large fuel terminal in New York. This included preparing and submitting environmental compliance documentation such as Form R, TRI and Title V bi-annual compliance.
- Project coordinator for the deliverance of annual oil spill prevention training as required by 40 CFR 112 for a large software manufacturer's employees in New York and a local State university's employees in Connecticut.
- Project coordinator for the development of spill response matrix for software company in Arizona. The matrix assisted employees on steps to take and agencies to notify in the event of a chemical or oil spill.
- Project coordinator for air emissions compliance for large manufacturing facility. Generated air emissions tracking spreadsheets for company's individual pieces of equipment (i.e., generator, boiler) for compliance with the Clean Air Act.
- Project coordinator for the inspection of state-wide gasoline stations to inspect for indicators of soil or groundwater contamination. Summarized findings in letters to the State and client, which were the used in litigation.
- Project coordinator for the development of several site-specific health and safety plans for large projects in Connecticut.

**EDUCATION**

B.Sc.                Geology, University of Pittsburgh, 1989

**Other Training**

FEMA ICS-100, FEMA IS-700, FEMA ICS-210, USCGAUX Instructor, USCGAUX Vessel Safety Inspector, PADI Master Scuba Diver Trainer, DAN Instructor, EFR Instructor, USCG Licensed Captain, Certified Crematory Operator, NFPA certified Fire-fighter, First Aid and CPR instructor

**EMPLOYMENT HISTORY**

2011-Present    Conestoga-Rovers & Associates, Atlanta, GA  
2005-11        President, Eternal Reefs, Inc., Atlanta, GA  
1994-05        Alderwoods Group, Inc., Toronto, Canada  
                  Named Vice President, Compliance, 2000  
                  Named Vice President, Personnel Administration, Environment & Safety, 1999  
                  Named Director of Environmental Affairs, 1996  
1991-94        Project Engineer, Corporate Division, Gould Electronics, Inc., Eastlake, OH  
1989-91        Staff Geologist, NTH Consultants - Exton, PA - Farmington Hills, MI  
1988            Geologist, STS Consultants, Falls Church, VA

**PROFESSIONAL REGISTRATIONS/AFFILIATIONS**

Past Flotilla Commander, US Coast Guard Auxiliary  
USCG Licensed Captain, Master 50GT, OUPV Great Lakes & Offshore  
Member, Society of Corporate Compliance and Ethics

**PROFILE OF PROFESSIONAL ACTIVITIES**

**Environmental Assessments/Auditing**

- Developed and implemented a business and industry specific compliance assessment program providing annual assessment of over 1,300 operating locations by a team of industry specific auditors employing standardized checklist format and comparative analysis auditing tools. Results were effectively communicated to operating units indicating specific areas of non-compliance as well as comparisons with other regions and facilities. The program produced significant year over year compliance improvements.
- Vice president of compliance for the Alderwoods Group serving as Chairman of the Corporate Compliance Committee and responsible for the company's compliance and internal audit functions. Responsible for the management and assessment of the company's environmental liabilities.
- Managed over 3,200 environmental site assessments and provided expertise and environmental management to assist an aggressive M&A program operating in the United States, Canada, UK, Mexico, and Puerto Rico.

- Restructured and managed an internal audit department to provide better, more relevant coverage and timely reporting during Chapter 11 and CCAA restructuring of the Alderwoods Group.
- Ocean environment assessments for artificial reef placements – Florida, Texas, Alabama.
- Chicken Processing Facilities – Georgia and Alabama.
- Metal Fabricating Facilities – Atlanta, Georgia.
- Various undeveloped properties – various States.
- Assisted Living Facilities – various States.
- Funeral Homes and Cemeteries – various States and Puerto Rico.
- Food Processing Facility – Little Rock, Arkansas.
- Feed mill and kiln dust disposal site - Rockmart, Georgia.
- Entertainment industry – various locations.

### **Remedial Investigations/Site Investigations/RCRA/CERCLA**

- Managed Projects related to current activities as well as historic concerns:
  - Battery plant decommissioning – Freeport, Illinois
  - DNAPL recovery system – Copper foil plant – Bridgeport, Ohio
  - Soil remediation for lead and cadmium – Throop, Pennsylvania
  - Dredging contaminated sediments in Hudson River – Foundry Cove, New York
  - Municipal landfill PRP group and technical committee– Guernsey County, Ohio
  - Solid waste investigation and negotiation – Puerto Rico
  - Lead-acid battery recycling facility landfill remediation – Thompson, Illinois
  - Battery chip landfill and groundwater remediation – Portland, Oregon
  - DNAPL recovery and PRP group– El Monte, California
  - Various solid waste site excavation and disposal actions – 23 States
  - Copper foil manufacturing plants – Zanesville and Cleveland, Ohio
  - Chlorinated solvents in aquifer – Ft. Lauderdale, Florida
  - Metals in soil investigation and remediation – Detroit, Michigan
  - Cement kiln waste disposal– Dundee, Michigan
  - Private dump – Los Angeles, California
  - Computer manufacturer plant decommissioning – Marathon, Florida
  - Corporate office decommissioning – Schaumberg, Illinois
  - Facility decommissioning – Marysville, Washington
  - RI/FS studies for soil remediation within residential area – Granite City, Illinois
  - UST Removals – various States
  - PCB contaminated soil remediations - Detroit, Michigan

### **Compliance and Technical Support**

- Developed and maintained appropriate auditing systems for the Loewen Group, Alderwoods Group and various clients to evaluate compliance with appropriate laws, regulations, and rules as well as with facility specific policies and procedures. Developed industry specific corporate code of conduct

and business ethics programs including key policies and operational procedure manuals including distribution and training. Provided technical assistance on a variety of projects.

- Developed and managed whistleblower hotline program
- Managed human resources at program level during Chapter 11 and CCAA restructuring
- Developed comprehensive compliance program for medium-sized operator of Funeral Homes and Cemeteries - Various locations, Texas, Nevada, Louisiana
- Preparation of NPDES permits for industrial applications
- Waste manifesting - various States
- ADA technical support - various States
- OSHA technical support - various States
- Asbestos management plans and abatements - various States
- Mold Abatements - various States
- Project involving NJ ISRA process resulting in De Minimis Exemption
- SARA Title III compliance assessments - various States
- Endangered species assessment - Whittier, California
- Cement batch plant compliance - various States
- Air emissions permitting assistance - various States
- Developed and implemented cremator training and certification program - Various States
- Artificial reef permitting and regulatory support - various States/Counties
- XRF Field laboratory management - Illinois, Pennsylvania, Michigan

### **Construction Supervision and Geotechnical Support**

- Field technical support, coordination and management of many site investigations and long term remediation projects specializing in lead and cadmium, using field portable XRF technology as well as contaminated materials solidification/mineralization remediation solutions.
  - Funeral home design and construction technical support - various States
  - Dredging of marina basin - Lake Lanier, Georgia
  - Storm debris recovery - Lake Allatoona, Georgia
  - Marina construction - Lake Lanier, Georgia
  - Artificial reef placements - New Jersey, Florida, Texas, Maryland, North Carolina, Alabama
  - Geotechnical investigations as field support - various States
  - Concrete, soil density, asphalt masonry, and steel inspection - Washington DC, Virginia, Maryland

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***State- and tribal - equivalent CERCLIS***

SDADB: Site Discovery and Assessment Database.

A review of the SDADB list, as provided by EDR, and dated 04/23/2010 has revealed that there are 2 SDADB sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MOBIL # 01-FBH	MERRIT PARKWAY NORTHBON	NW 1/4 - 1/2 (0.424 mi.)	8	33
MOBIL SERVICE STA.06-109	MERRIT PARKWAY SOUTHBO	NW 1/4 - 1/2 (0.448 mi.)	10	58

#### ***State and tribal leaking storage tank lists***

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's Leaking Underground Storage Tank List.

A review of the LUST list, as provided by EDR, and dated 04/24/2014 has revealed that there are 6 LUST sites within approximately 0.5 miles of the target property.

#### ***State and tribal registered storage tank lists***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's "Town Inventory" UST Listing.

A review of the UST list, as provided by EDR, and dated 06/03/2014 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### ***Other Ascertainable Records***

CPCS: A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

A review of the CPCS list, as provided by EDR, and dated 01/30/2014 has revealed that there are 5 CPCS sites within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

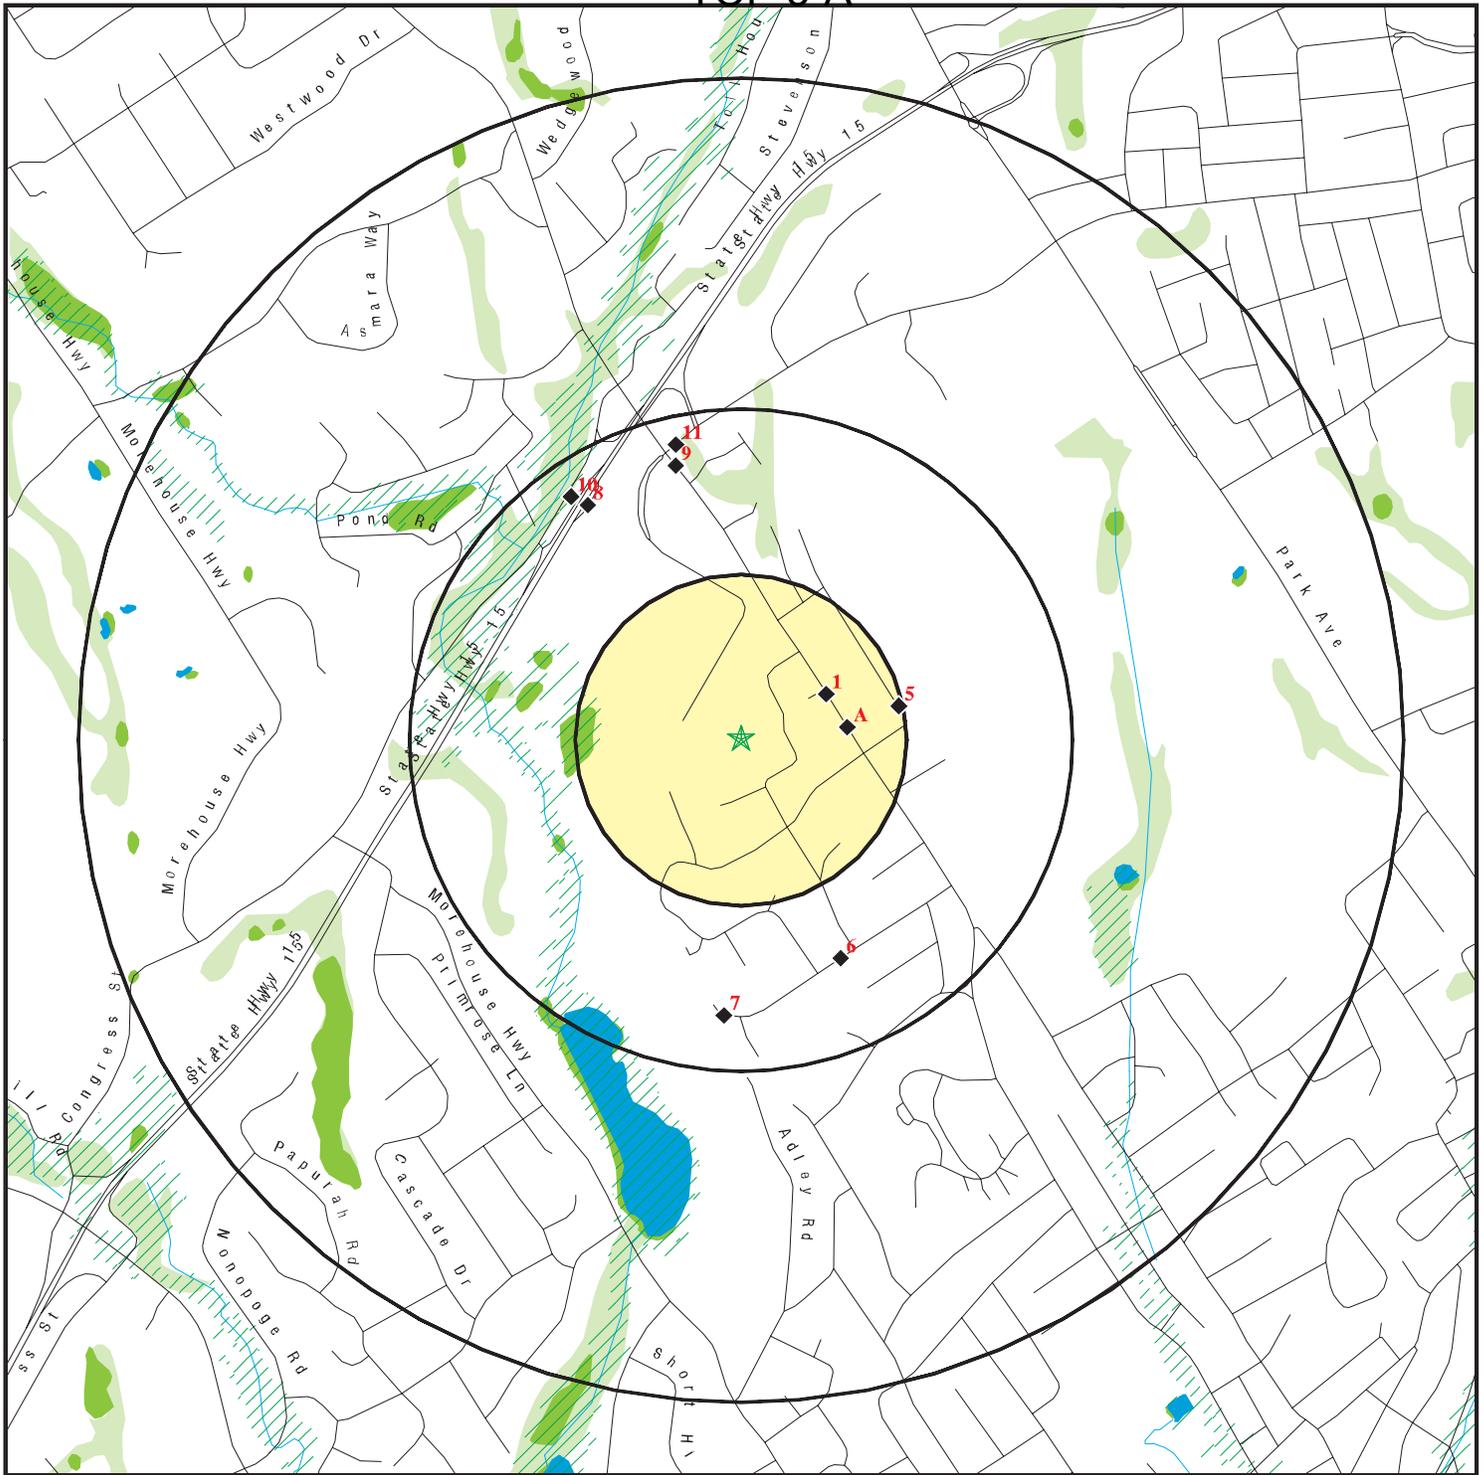

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	2629 EASTON TPKE	E 1/8 - 1/4 (0.162 mi.)	A4	20

Comments:	937 notified.18:12: Fairfield FD responding.DEEP Communications is receiving media inquiries. GE's Corporate HQ in Fairfield had a 500-1500 gallons of ethylene glycol (30 percent) and water (70 percent) release to a catch basin network that is tributary to a retention pond on their property. This is non-toxic to humans and aquatic life. The catch basins will be flushed and the waste will be captured with a vac-truck. ERC LeClerc is on site.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 08/28/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 12/08/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2014	Telephone: 703-603-8704
Date Made Active in Reports: 08/22/2014	Last EDR Contact: 07/08/2014
Number of Days to Update: 45	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Varies

***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 08/28/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 12/08/2014
	Data Release Frequency: Quarterly

***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

***Federal RCRA non-CORRACTS TSD facilities list***

**RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Data Release Frequency: Quarterly

***Federal RCRA generators list***

**RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014  
Date Data Arrived at EDR: 03/13/2014  
Date Made Active in Reports: 04/09/2014  
Number of Days to Update: 27

Last EDR Contact: 07/02/2014  
Next Scheduled EDR Contact: 10/13/2014  
Data Release Frequency: Quarterly

**RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2014  
Date Data Arrived at EDR: 03/13/2014  
Date Made Active in Reports: 04/09/2014  
Number of Days to Update: 27

Data Release Frequency: Quarterly

**RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
