Trumbull Substation Project

Opening Statement
Connecticut Siting Council Docket 317
Public Hearing
October 24, 2006
Agenda

• Need
• Overview of the Project
• Schedule
• Cost
• Compliance
• More Information
Need

• Growth
  – From 1995 to 2005 Trumbull’s residential electrical use has increased 38%, commercial use has increased 45%.
  – In 2006 New England saw peak loads that were not predicted to occur until 2010.

• Substation Capacity
  – Trumbull currently has no bulk substation. The town is served primarily by Old Town Substation in Bridgeport and Trap Falls Substation in Shelton
  – During the summer peak in August 2006, both of these substations were loaded to 107%.
  – Failure of a major piece of equipment while operating over the rating will require UI to reduce the load to the rating through rolling blackouts.
Trumbull Substation
Proposed Project Overview

• Construction of a 58 MVA, 115 kV to 13.8 kV Substation on a UI owned 4.85 acre parcel at 3-7 Wildflower La, Trumbull CT
Trumbull Substation Proposed Site
3 - 7 Wildflower La, Trumbull CT
