RE: **DOCKET NO. 338** – SBA Towers IV, LLC Certificate of Environmental Compatibility and Public Need for the construction, maintenance and operation of a telecommunications facility located at 160 West Street, Cromwell, Connecticut (Middletown North CT46122-A).

Dear Ms. Bachman:

The Connecticut Siting Council granted a 120-day extension of time to March 24, 2015 for SBA to develop methods to conceal Verizon's installation in a manner consistent with the approved Development and Management Plan for the facility.

In response to the aforementioned, SBA proposes to use "Stealth Antenna Socks" in attempt to be more aesthetically pleasing to the surroundings. SBA has successfully used this product at a monopine located at 477 U.S. 7, Sharon, CT, see enclosed photos for reference. To date, the durability of this product, made by STEALTH CONCEALMENT SOLUTIONS, INC, has been effective without any issues or complaints. Regarding a spec sheet from the manufacturer, one does not exist as this was a specific product made for SBA at our Sharon 3 site mentioned above.

If the Council is willing to accept this method of concealment, SBA will promptly rectify the condition.

Should there be any questions or the need for further information, please feel free to contact me.

Regards,

Stephen Roth
