**LEGAL NOTICE**

**Notice of Application by The Connecticut Light and Power Company to the Connecticut Siting Council for Certificate of Environmental Compatibility and Public Need for the Rood Avenue Substation, 264 Rood Avenue and 25 Shelley Avenue, Windsor, Connecticut**

Pursuant to the provisions of §§ 16-50f(b) of the General Statutes of Connecticut, §§ 16-50f-1-(e) of the Regulations of the Connecticut Siting Council and the Application Guidelines for Electric Substation Facilities of the Connecticut Siting Council (adopted June 2007), notice is hereby given that The Connecticut Light and Power Company ("CL&P") will on or about November 7, 2007, submit an application to the Connecticut Siting Council seeking a Certificate of Environmental Compatibility and Public Need for a new substation in Windsor, Connecticut, located on property owned by CL&P, at 264 Rood Avenue and 25 Shelley Avenue in Windsor, Connecticut.

CL&P's application to the Connecticut Siting Council is for a Certificate of Environmental Compatibility and Public Need for the Rood Avenue Substation, which consists primarily of the construction of the Rood Avenue Substation, in the Town of Windsor. Alternative sites and system alternatives will also be discussed in the application.

The purpose of the new Rood Avenue Substation is to improve electric reliability and to increase the capacity to transform electricity from 115 kilovolts ("kV") to 23 kV in order to deliver power to customers, in response to the increasing peak-load demands for electricity in the Town of Windsor.

If the project is approved by the Connecticut Siting Council, construction is projected to begin by summer 2008, with the facility in service by June 2009.
