Section 1
Title and Authority

- 1.1 The inland wetlands and watercourses of the State of Connecticut are indispensable and irreplaceable but fragile natural resource with which the citizens of the State have been endowed. The wetlands and watercourses are an interrelated web of nature essential to an adequate supply of surface and underground water; to hydrological stability and control of flooding and erosion; to the recharging and purification of groundwater; and to the existence of many forms of animal, aquatic and plant life. Many inland wetland and watercourses have been destroyed or are in danger of destruction because of unregulated use by reason of the deposition, filling or removal of material, the diversion or obstruction of waterflow, the erection of structures and other uses, all of which have despoiled, polluted and eliminated wetlands and watercourses. Such unregulated activity has had, and will continue to have, a significant, adverse impact on the environment and ecology of the State of Connecticut and has and will continue to imperil the quality of the environment thus adversely affecting the ecological, scenic, historic and recreational values and benefits of the state for its citizens now and forever more. The preservation and protection of the wetlands and watercourses from random, unnecessary, undesirable and unregulated uses, disturbance or destruction is in the public interest and is essential to the health, welfare and safety of the citizens of the State. It is, therefore, the purpose of these regulations to protect the citizens of the State by making provisions for the protection, preservation, maintenance and use of the inland wetlands and watercourses by minimizing their disturbance and pollution; maintaining and improving water quality in accordance with the highest standards set by federal, state or local authority; preventing damage from erosion, turbidity or siltation; preventing loss of fish and other beneficial aquatic organisms, wildlife and vegetation and the destruction of the natural habitats thereof; deterring and inhibiting the danger of flood and pollution; protecting the quality of wetlands and watercourses for their conservation, economic, aesthetic, recreational and other public and private uses and values; and protecting the state's potable fresh water supplies from the dangers of drought, overdraft, pollution, misuse and mismanagement by providing an orderly process to balance the need for the economic growth of the state and the use of its land with the need to protect its environment and ecology in order to forever guarantee to the people of the State, the safety of such natural resources for their benefit and enjoyment and for the benefit and enjoyment of generations yet unborn.
- 1.2 These regulations shall be known as the "Inland Wetlands and Watercourses Regulations of the Town of Windsor, Connecticut."
- 1.3 The Inland Wetlands and Watercourses Commission of the Town of Windsor was established in accordance with an ordinance adopted March 4, 1974 and shall implement the purposes and provisions of the Inland Wetlands and Watercourses Act in the Town of Windsor.

- 1.4 These regulations have been adopted and may be amended, from time to time, in accordance with the provisions of the Inland Wetlands and Watercourses Act and these regulations.
- 1.5 The Agency shall enforce all provisions of the Inland Wetlands and Watercourses Act and shall issue, issue with terms, conditions, limitations or modifications, or deny permits for all regulated activities in the Town of Windsor pursuant to Sections 22a-36 to 22a-45, inclusive, of the Connecticut General Statutes, as amended.

Section 2 Definitions

- 2.1 As used in these regulations:
 - a. **Act** means the Inland Wetlands and Watercourses Act, Sections 22a-36 through 22a-45 of the General Statutes, as amended.
 - b. **Agency** means the Inland Wetlands and Watercourses Commission of the Town of Windsor, Connecticut.
 - c. **Bogs** are usually distinguished by evergreen trees and shrubs underlain by peat deposits, poor drainage, and highly acidic conditions.
 - d. **Clear-cutting** means the harvest of timber in a fashion that removes all trees to a minimum size of 2" diameter at breast height.
 - e. **Commission member** means a member of the Inland Wetlands and Watercourses Commission of the Town of Windsor, Connecticut.
 - f. **Commissioner of Environmental Protection** means the commissioner of the State of Connecticut Department of Environmental Protection.
 - g. **Continual flow** means a flow of water which persists for an extended period of time; this flow may be interrupted during periods of drought or during the low flow period of the annual hydrological cycle, June through September, but it recurs in prolonged succession.
 - h. **Deposit** includes, but shall not be limited to fill, grade, dump, place, discharge or emit.
 - i. **Designated agent** means an individual designated by the agency to carry out its functions and purposes.
 - j. **Discharge** means emission of any water, substance, or material into wetlands or watercourses whether or not such substance causes pollution.
 - k. **Disturb the natural and indigenous character of the wetland or watercourse** means to alter the inland wetlands and watercourses by reason of removal or deposition of material, clearing the land, altering or obstructing water flow, or pollution.

- l. **Environment** means the physical, biological, social, and economic surroundings and conditions that exist within an area that may be affected by a proposed action including land, air, water, minerals, flora, fauna, and noise.
- m. **Environmental Assessment** means a process to determine if a proposed action listed under Department of Environmental Protection regulations Section 22a-1a-4(b)(2) may have a significant impact on the wetlands or watercourses.
- n. **Environmental Impact Evaluation** means a detailed written document concerning the impacts of a proposed action on the wetlands or watercourses.
- o. **Essential to the farming operation** means that the proposed activity is necessary and indispensable to sustain farming activities on the farm.
- p. **Farming** means use of land for the growing of crops, raising of livestock or other agricultural use.
- q. **Feasible** means able to be constructed or implemented consistent with sound engineering principles.
- r. **License** means the whole or any part of any permit, certificate of approval or similar form of permission which may be required of any person by the provisions of these regulations under the authority of the Inland Wetland Agency.
- s. **Management practice** means a practice, procedure, activity, structure or facility designed to prevent or minimize pollution or other environmental damage or to maintain or enhance existing environmental quality. Such management practices include, but are not limited to: erosion and sedimentation controls; restrictions on land use or development; construction setbacks from wetlands or watercourses; proper disposal of waste materials; procedures for equipment maintenance to prevent fuel spillage; construction methods to prevent flooding or disturbance of wetlands and watercourses; procedures for maintaining continuous stream flows; confining construction that must take place in watercourses to times when water flows are low and fish and wildlife will not be adversely affected.
- t. **Marshes** are areas with soils that exhibit aquatic moisture regimes that are distinguished by the absence of trees and shrubs and are dominated by soft-stemmed herbaceous plants. The water table in marshes is at or above the surface throughout the year, but seasonal fluctuations are encountered and areas of open water six inches or more in depth are common.
- u. **Material** means any substance, solid or liquid, organic or inorganic, including but not limited to: soil, sediment, aggregate, land, gravel, clay, bog, peat, mud, debris, sand, refuse or waste.
- v. **Municipality** means the Town of Windsor, Hartford County, Connecticut.
- w. **Nurseries** means land used for propagating trees, shrubs or other plants for transplanting, sale, or for use as stock for grafting.

- x. **Permit** means the whole or any part of any license, certificate or approval or similar form of permission which may be required of any person by the provisions of these regulations and the Act or other municipal, state and federal law.
- y. **Permittee** means the person to whom such permit has been issued.
- z. **Person** means any person, firm, partnership, association, corporation, company, organization or legal entity of any kind, including municipal corporations, governmental agencies or subdivisions thereof.
- aa. **Pollution** means harmful thermal effect or the contamination or rendering unclean or impure of any waters of the state by reason of any waste or other materials discharged or deposited therein by any public or private sewer or otherwise so as directly or indirectly to come in contact with any waters. This includes, but is not limited to, erosion resulting from any filling or excavation activity.
- bb. **Prudent** means economically and otherwise reasonable in light of the social benefits to be derived from the proposed regulated activity provided cost may be considered in deciding what is prudent and further provided a mere showing of expense will not necessarily mean an alternative is imprudent.
- cc. **Regulated Activity** means any operation within or use of a wetland or watercourse involving removal or deposition of material, or any obstruction, construction, alteration or pollution, of such wetlands or watercourses, but shall not include the specified activities in section 22a-40 of the Connecticut General Statutes. Furthermore, any clearing, grubbing, filling, grading, paving, excavating, constructing, depositing or removing of material and discharging of stormwater on the land within **150 feet** measured horizontally from the boundary of any wetland or watercourse is a regulated activity with no activity in the closest 50 feet unless by exception permitted by the Commission. The Agency may rule that any other activity located within such **upland review area** or in any other non-wetland or non-watercourse area is likely to impact or affect wetlands or watercourses and is a regulated activity.
- dd. **Regulated area** means any wetland or watercourse as defined in these regulations.
- ee. **Remove** includes, but shall not be limited to, drain, excavate, mine, dig, dredge, suck, grub, clear-cut timber, bulldoze, dragline or blast.
- ff. **Rendering unclean or impure** means any alteration of the physical, chemical or biological properties of any waters of the state, including, but not limited to, change in odor, color, turbidity or taste.
- gg. **Significant impact activity** means any activity, including, but not limited to, the following activities, which may have a major effect or significant impact.
 - 1. Any activity involving a deposition or removal of material which will or may have a major effect or significant impact

- on the regulated area or on another part of the inland wetland or watercourse system, or
2. Any activity which substantially diminishes, or could change, the natural channel or may inhibit the natural dynamics of a watercourse system, or
 3. Any activity which substantially diminishes, or could cause the diminution of, the natural capacity of an inland wetland or watercourse to support desirable fisheries, wildlife, or other biological life, prevent flooding, supply water, assimilate waste, facilitate drainage, provide recreation or open space or other functions, or
 4. Any activity which causes, or could cause, substantial turbidity, siltation or sedimentation in a wetland or watercourse, or
 5. Any activity which causes or could cause a substantial diminution of flow of a natural watercourse, or groundwater levels of the regulated area, or
 6. Any activity which causes, or has the potential to cause pollution of a wetland or watercourse, or
 7. Any activity which destroys, or could cause the destruction of, unique wetland or watercourse areas having demonstrable scientific or educational value.
- hh. **Soil Scientist** means an individual duly qualified in accordance with standards set by the Federal Office of Personnel Management.
- ii. **Swamps** are areas with soils that exhibit acquic moisture regimes and are dominated by wetland trees and shrubs.
- jj. **Submerged lands** means those lands that are inundated by water on a seasonal or more frequent basis.
- kk. **Town** means the Town of Windsor, Hartford County in the State of Connecticut.
- ll. **Upland Review Area** means the land within one hundred-fifty (150) feet measured horizontally from the boundary of any watercourse or wetland as defined in these regulations and determined by a registered soil scientist where activity may occur with the granting of a permit from the Inland Wetlands & Watercourses Commission. The Commission shall take into consideration all relevant facts and circumstances, including but not limited to: (1) the environmental impact that the proposed activity in the defined area will have on wetlands or watercourses; (2) feasible and prudent alternatives to the proposed activity that would cause less or no environmental impact to the wetlands or watercourses; (3) the relationship between the short-term and long-term impacts of the proposed activity on wetlands or watercourses and the maintenance and enhancement of long-term productivity of such wetlands or watercourses; and (4) Irreversible and irretrievable loss of wetland or watercourse resources which would be caused by

the proposed upland activity, including the extent to which such activity would foreclose a future ability to protect, enhance or restore such resources, and any mitigation measures which may be considered as a condition of issuing a permit for such activity including, but not limited to, measures to (A) prevent or minimize pollution or other environmental damage, (B) maintain or enhance existing environmental quality, or (C) in the following order of priority: Restore, enhance or create productive wetland or watercourse resources.

- mm. **Waste** means sewage or any substance, liquid, gaseous, solid or radioactive, which may pollute or tend to pollute any of the waters of the Town.
- nn. **Watercourses** means rivers, streams, brooks, waterways, lakes, ponds, marshes, swamps, bogs, and all other bodies of water, natural or artificial, vernal or intermittent, public or private, which are contained within, flow through or border upon the Town or any portion thereof not regulated pursuant to section 22a-28 through 22a-35 of the General Statutes. Intermittent watercourses shall be delineated by a defined permanent channel and bank and the occurrence of two or more of the following characteristics: (a) evidence of scour or deposits of recent alluvium or detritus, (b) the presence of standing or flowing water for a duration longer than a particular storm incident, and (c) the presence of hydrophytic vegetation.
- oo. **Wetlands** means land, including submerged land not regulated pursuant to section 22a-28 through 22a-35, inclusive, of the Connecticut General Statutes, which consists of any of the soil types designated as poorly drained, very poorly drained, alluvial and flood plain by the National Cooperative Soils Survey, as may be amended from time to time, of the Natural Resources Conservation Service of the U.S. Department of Agriculture (USDA). Such areas may include filled, graded, or excavated sites that possess an aquic (saturated) soil moisture regime as defined by the USDA Cooperative Soil Survey.

Section 3 Inventory of Regulated Areas

- 3.1 The map of regulated areas, entitled "Inland Wetlands and Watercourses Map, Windsor, Connecticut," delineates the **general** location and boundaries of inland wetlands and the **general** location of watercourses. Copies of this map are available for inspection in the office of the Town Clerk or the Agency. In all cases, the precise location of regulated areas shall be determined by the actual character of the land, the distribution of wetland soil types, and location of watercourses. The Agency may use aerial photography, remote sensing imagery, resource mapping, soils maps, site inspection observations or other information in determining the location of the boundaries of wetlands and watercourses.

- 3.2 Any owner who disputes the designation of any part of his or her land as a regulated area on the Inland Wetlands and Watercourses Map, may petition the Agency to change the designation in accordance with Section 15 of these regulations. All petitions for a map change shall be submitted in writing and shall include all relevant facts and circumstances that support the change. The petitioner shall provide proof that the designation is inapplicable. The Agency may require such an owner to provide an accurate delineation or regulated areas in accordance with Section 15 of these regulations.
- 3.3 The Agency or its designated agent(s) shall maintain a current inventory or regulated areas within the town. The Agency may amend its map as more accurate information becomes available. Any person may petition for an amendment to the map. Petitioners shall bear the burden of proof for all requested map amendments. Such proof must include delineation by a certified soil scientist or in the case of watercourses, by a qualified professional. Such map amendments are subject to the public hearing process outlined in Section 15 of these regulations.

Section 4 **Permitted Uses as a Right & Non-Regulated Uses**

- 4.1 The following operations and uses shall be permitted in inland wetlands and watercourses, as of right:
- a. Grazing, farming, nurseries, gardening and harvesting of crops and farm ponds of three acres or less essential to the farming operation, and activities conducted by, or under the authority of, the Department of Environmental Protection for the purposes of wetland or watercourse restoration or enhancement or mosquito control. The provisions of this subdivision shall not be construed to include the following: road construction or the erection of buildings not directly related to the farming operation, relocation of watercourses with continual flow, filling or reclamation of wetlands or watercourses, clear cutting of timber except for the expansion of agricultural crop land, or the mining of top soil, peat, sand, gravel or similar material from wetlands or watercourses for the purposes of sale;
 - b. A residential home (I) for which a building permit has been issued or (ii) on a subdivision lot, provided the permit has been issued or the subdivision has been approved by a municipal planning, zoning or planning and zoning commission as of the effective date of promulgation of the municipal regulations pursuant to Subsection (b) of Section 22a-42a, or as of July 1, 1974, whichever is earlier, and further provided no residential home shall be permitted as of right pursuant to this subsection unless the building permit was obtained on or before July 1, 1987. The individual claiming a use of wetlands permitted as a right under this subsection shall document the validity of said right by

providing a certified copy of the building permit and a site plan showing proposed and existing topographic contours, house and well locations, septic system, driveway, approval dates or other necessary information to document his entitlement;

- c. Boat anchorage or mooring, not to include dredging or dock construction;
- d. Uses incidental to the enjoyment or maintenance of residential property, such property defined as equal to or smaller than the largest minimum residential lot site permitted anywhere in the municipality (provided that in any town where there are no zoning regulations establishing minimum residential lot sites, the largest minimum lot site shall be two acres) and containing a residence. Such incidental uses shall include maintenance of existing structures and landscaping. Pools, additions, or accessory structures will require a permit from the Agency.
- e. Construction and operation, by water companies as defined by Section 16-1 of the General Statutes or by municipal water supply systems as provided for in Chapter 102, of the Connecticut General Statutes, of dams, reservoirs and other facilities necessary to the impounding, storage and withdrawal of water in connection with public water supplies except as provided in Sections 22a-401 and 22a-410 of the General Statutes.
- f. Maintenance relating to any drainage pipe which existed before the effective date of any municipal regulations adopted pursuant to section 22a-42a of the Connecticut General Statutes or July 1, 1974, which ever is earlier, provided such pipe is on property which is zoned as residential but which does not contain hydrophytic vegetation. For purposes of this sub-section, "maintenance" means the removal of accumulated leaves, soil, and other debris whether by hand or machine, while the pipe remains in place.

4.2 The following operations and uses shall be permitted as non-regulated use in wetlands and watercourses, provided they do not disturb the natural and indigenous character of the wetland or watercourse by removal or deposition of material, alteration or obstruction of water flow or pollution of the wetland or watercourse:

- a. Conservation of soil, vegetation, water, fish, shellfish, and wildlife. Such operation or use may include, but is not limited to, minor work to control erosion, or to encourage proper fish, wildlife and silviculture management practices.
- b. Outdoor recreation including the use of play and sporting areas, golf courses, field trials, nature study, hiking, horseback riding, swimming, skin and scuba diving, camping, boating, water-skiing, trapping, hunting, fishing and shell-fishing and cross-country skiing where otherwise legally permitted and regulated.
- c. Any dredging or any erection, placement, retention or maintenance of any structure, fill, obstruction, or encroachment, or any work incidental to such activities, conducted by a state agency, which activity is regulated under sections 22a-28 to 22a-

35, inclusive, as amended, or sections 22a-359b to 22a-363f, inclusive, as amended, shall not require any permit or approval under sections 22a-36 to 22a-45, inclusive, as amended.

- 4.3 All activities in wetlands or watercourses involving filling, excavation, dredging, clear cutting, grading and excavation or any other alteration or use of a wetland or watercourse not specifically permitted by this section shall require a permit from the Agency in accordance with Section 6 of these regulations.
- 4.4 To carry out the purposes of this section, any person proposing to carry out a permitted or non-regulated operation or use of a wetland or watercourse, which may disturb the natural and indigenous character of the wetland or watercourse shall, prior to commencement of such operation or use, notify the Agency on a form provided by it, and provide the Agency with sufficient information to enable it to properly determine that the proposed operation and use is a permitted or non-regulated use of the wetland or watercourse. The Agency or its designated agent shall rule that the proposed operation or use is a permitted or a non-regulated use or operation or that a permit is required. Such ruling shall be in writing and shall be made no later than the next regularly scheduled meeting of the Agency following the meeting at which the request was received. The designated agent for the Agency may make such ruling on behalf of the Agency at any time.

Section 5

Activities Regulated by the State

- 5.1 In addition to any permit or approval required by the Agency, the Commissioner of Environmental Protection shall regulate activities in or affecting wetlands or watercourses subject to the following jurisdiction:
 - a. Construction or modification of any dam pursuant to Sections 22a-401 through 22a-410 of the General Statutes, as amended;
 - b. Construction, encroachment, or placement of any obstruction within stream channel encroachment lines pursuant to Sections 22a-342 through 22a-349 of the General Statutes, as amended;
 - c. Construction or placement of any structure or obstruction within the tidal, coastal or navigable waters of the state pursuant to Sections 22a-359 through 22a-363 or in designated tidal wetlands pursuant to Sections 22a-28 through 22a-35 of the General Statutes, as amended;
 - d. Diversion of water including withdrawals of surface or groundwater in excess of fifty thousand (50,000) gallons per day, or any change in the instantaneous flow of any surface waters of the state where the tributary watershed area above the point of diversion is 100 acres or larger pursuant to Sections 22a-365 through 22a-378 of the General Statutes, as amended;
 - e. Discharges into the waters of the state pursuant to Section 22a-430 of the General Statutes, as amended;

- f. Discharge of fill or dredged materials into the wetlands and watercourses of the state pursuant to Section 401 of the Federal Clean Water Act, as amended, for activities regulated by the U.S. Army Corps of Engineers under Section 404 of the Federal Clean Water Act.
- 5.2 The Commissioner of Environmental Protection shall have exclusive jurisdiction over regulated activities and other activities, in or affecting wetlands or watercourses, undertaken by any department, agency or instrumentality of the State of Connecticut, except any local or regional board of education, pursuant to Sections 22a-39 or 22a-45a of the Connecticut General Statutes.
- 5.3 The Commissioner of Environmental Protection shall have exclusive jurisdiction over tidal wetlands designated and regulated pursuant to Sections 22a-28 through 22a-35 of the General Statutes.
- 5.4 The Commissioner of Environmental Protection shall have exclusive jurisdiction over activities authorized under a dam repair or removal order issued by the Commissioner of Environmental Protection under Section 22a-402 or a dam construction permit issued by the Commissioner of Environmental Protection under Sections 22a-403 or 22a-41 of the Connecticut General Statutes. Any person receiving such dam repair or removal order or dam construction permit shall not be required to obtain a permit from a municipal wetlands agency for any action necessary to comply with said dam order or to carry out the activities authorized by said dam permit.

Section 6 Regulated Activities to be Licensed

- 6.1 No person shall conduct or maintain a regulated activity without first obtaining a permit for such activity from the Inland Wetlands and Watercourses Agency of the Town of Windsor.
- 6.2 Any person found to be conducting or maintaining a regulated activity without the prior authorization of the Agency, or violating any other provisions of these regulations, shall be subject to the enforcement proceedings and penalties prescribed in Section 14 of these regulations and any other remedies as provided by law.

Section 7 Application Requirements

- 7.1 Any person wishing to undertake a regulated activity shall apply for a permit on a form entitled "Town of Windsor Inland Wetlands and Watercourses Commission - Application for Permit." An application shall include an application form and such information as prescribed by Section 7.4 and, in the case of a significant activity, by Section 7.5 of

these regulations. Application forms may be obtained in the Windsor Planning Department or the Agency.

- 7.2 If an application to the Town of Windsor Planning, Zoning, or Planning and Zoning Commission for subdivision or re-subdivision of land involves land containing a wetland or watercourse, the applicant shall, in accordance with Section 8-3(g), 8-3c, or 8-26, as applicable, of the Connecticut General Statutes, submit an application for a permit to the Agency in accordance with this section, no later than the day the application is filed with such planning, zoning, or planning and zoning commission.
- 7.3 All applications shall include the following information in writing:
- a. The applicant's name, home and business address and telephone numbers;
 - b. The owner's name, address and telephone number and written consent if the applicant is not the owner of the property involved in the application;
 - c. Applicant's interest in the land;
 - d. The geographical location of the property which is to be affected by the proposed activity, including but not limited to a description of the land in sufficient detail to allow identification of the inland wetlands and watercourses, a computation of the area(s) (in acres or square feet) of wetland or watercourse disturbance, soil type(s) and vegetation;
 - e. The purpose and a description of the proposed activity, proposed erosion and sedimentation controls, and other management practices and mitigation measures which may be considered as a condition of issuing a permit for the proposed regulated activity including, but not limited to, measures to (1) prevent or minimize pollution or other environmental damage, (2) maintain or enhance existing environmental quality, or (3) in the following order of priority: restore, enhance and create productive wetland or watercourse resources;
 - f. Alternatives considered by the applicant and why the proposal to alter wetlands set forth in the application was chosen. An Environmental Assessment may be required by the Commission to determine if the impact of the activity is significant.
 - g. A site plan showing existing and proposed conditions in relation to wetlands and watercourses and identifying any further activities associated with, or reasonably related to, the proposed regulated activity which are made inevitable by the proposed regulated activity and which may have an impact on wetlands or watercourses;
 - h. A 1" = 1,000' scale location map, including the nearest street intersection;
 - i. Names and addresses of adjacent property owners within 100 feet of property;
 - j. Certification that the applicant is familiar with all the information provided in the application and is aware of the penalties for

- obtaining a permit through deception or through inaccurate or misleading information;
- k. Authorization for the commissioners and agents of the Agency to inspect the property, at reasonable times, both before and after a final decision has been issued and while the permit is still in effect;
 - l. Submission of the appropriate filing fee based on the fee schedule established in Section 8.8 of these Regulations; and
 - m. A completed DEP reporting form; the Agency shall revise or correct the information provided by the applicant and submit the form to the Commissioner of Environmental Protection in accordance with section 22a-39-14 of the Regulations of Connecticut State Agencies;
 - n. Any other information the Agency deems necessary to the understanding of what the applicant is proposing;
 - o. Declaratory Ruling: If the Agency finds, on the basis of the evidence before it, that a proposed activity or use does not involve a regulated activity as defined in Section 6 of these regulations, the application shall be dismissed for lack of jurisdiction. This dismissal shall be subject to review by the Agency if it is later shown that regulated activity is a consequence of that proposed activity. The Agency's decision shall be stated in writing and a copy sent to the applicant.
 - p. Summary Ruling: If the Agency finds that a proposed activity is a regulated activity not involving significant impact or major effect on the inland wetland or watercourse, as defined in Section 2.1gg. of these regulations, it may allow the activity with or without conditions after initial review.
 - q. Plenary Ruling: If the Agency finds that the activity applied for does or may involve a significant impact or major effect on the inland wetland or watercourse, as defined in Section 2.1gg. of these regulations, the Agency shall request information which may include, but is not limited to, the following:
 1. Site Plan - A map of the proposed use and the property that will be affected, drawn by a licensed surveyor, professional engineer or architect, who must be registered in the State of Connecticut. The map shall be at a scale to be determined by the Agency. Detailed information to be included on this site plan shall be requested by the Agency according to its evaluation requirements.
 2. Soil Sample Data - If the parcel lies within or partly within an area believed to contain poorly drained, very poorly drained, alluvial, or floodplain soils, the data shall show precisely where each specific soil type is found. Soil types identified must be consistent with the categories established by the National Cooperative Soil Survey of the U.S. NRCS.
 3. Biological Inventory - If the affected property is believed to include any portion of a swamp, bog or marsh, the applicant shall submit an inventory of the extent of the presence of plant species and upon native obligate species.

4. Analysis of Material to be Deposited -The applicant may be required to describe any materials to be deposited on the site in terms of volume, composition, and the possibility of erosion or leaching from deposited materials. The applicant may also be required to estimate the probable environmental impact of the deposition of materials on the affected inland wetlands and watercourses.
5. Watercourse Characteristics - If the proposed activity may effect a watercourse lying within, partly within, or flowing through or adjacent to the affected property, the applicant may be required to submit information relative to the present character and the projected impact of the proposed activity upon the watercourse.
6. A description of the proposed construction or the erection of structures on the affected property, including blueprints, engineering and architectural plans or designs, where available or reasonably attainable. Such descriptions shall include the purposes of such construction or activity.
7. A list of other property owners whose rights or interests may be or will be affected by the proposed activity.

7.4 If the proposed activity involves a significant impact activity as determined by the Agency and defined in Section 2.1 cc. of these regulations, additional information, based on the nature and anticipated effects of the activity, including but not limited to the following is required:

- a. Site plans for the proposed use or operation and the property which will be affected, which show existing and proposed conditions, wetland and watercourse boundaries, land contours, boundaries of land ownership, proposed alterations and uses of wetlands and watercourses, and other pertinent features of the development drawn to a 1" = 40' or 1"=100' scale by a licensed surveyor, professional engineer or landscape architect registered in the State of Connecticut or by such other qualified person;
- b. Engineering reports and analyses and additional drawings to fully describe the proposed project and any filling, excavation, drainage or hydraulic modifications to watercourses;
- c. Calculations for a 100-year storm in sensitive areas, (e.g., the Mill Brook watershed).
- d. Mapping of soil types consistent with the categories established by the National Cooperative Soil Survey of the U.S. Natural Resources Conservation Service; the wetlands shall be delineated in the field by a soil scientist and the soil scientist's field delineation shall be depicted on the site plans;
- e. Description of the ecological communities and functions of the wetlands or watercourses involved with the application and the effects of the proposed regulated activities on these communities and wetland functions;
- f. Description of how the applicant will change, diminish, or enhance the ecological communities and functions of the wetlands or

watercourses involved in the application, and with each alternative, and a description of why each alternative considered was deemed neither feasible nor prudent;

- g. Analysis of chemical or physical characteristics of any fill material;
 - h. Measures that mitigate the impact of the proposed activity. Such measures include, but are not limited to, plans or actions which avoid destruction or diminution of wetland or watercourse functions, recreational uses and natural habitats, which prevent flooding, degradation of water quality, erosion and sedimentation and obstruction of drainage, or which otherwise safeguard water resources.
- 7.5 The applicant shall certify whether:
- a. Any portion of the property on which the regulated activity is proposed is located within 500 feet of the boundary of an adjoining municipality;
 - b. Traffic attributable to the completed project on the site will use streets within the adjoining municipality to enter or exit the site;
 - c. Sewer or water drainage from the project site will flow through and impact the sewage or drainage system within the adjoining municipality; or,
 - d. Water run-off from the improved site will impact streets or other municipal or private property within the adjoining municipality.
- 7.6 Two (2) copies of all application materials and 10 copies of the engineered drawings reduced to 11" x 17" for Commission review shall be submitted to comprise a complete application or as is otherwise directed, in writing, by the Agency.
- 7.7 Any application to extend the expiration date of a previously issued permit or amend an existing permit shall be filed with the Agency at least sixty-five (65) days prior to the expiration date for the permit in accordance with Subsections 8.4 through 8.7 of these Regulations. Any application for amendment, renewal or extension shall be made in accordance with this Section provided:
- a. The application may incorporate by reference the documentation and record of the original application;
 - b. The application shall state the reason why the authorized activities were not initiated or completed within the time specified in the permit;
 - c. The application shall describe any changes in facts or circumstances involved with or affecting wetlands or watercourses or the property for which the permit was issued;
 - d. The Agency may accept an untimely application to extend the expiration date of a permit if the authorized activity is ongoing and allow the continuation of work beyond the expiration date if in its judgment, the permit is likely to be extended and the public interest or environment will be best served by not interrupting the activity. The application shall describe the extent of work

completed at the time of filing and the schedule for completing the activities authorized in the permit.

- e. The Agency shall evaluate the application pursuant to Section 10 of these Regulations and grant the application as filed, grant it with any terms or limitations, or deny it.
- 7.8 Any application to renew a permit shall be granted upon request of the permit holder unless the Agency finds that there has been a substantial change in circumstances which requires a new permit application or an enforcement action has been undertaken with regard to the regulated activity for which the permit was issued provided no permit may be valid for more than ten years.

Section 8 Application Procedures

- 8.1 All petitions, applications, requests or appeals shall be submitted to the Inland Wetlands and Watercourses Agent of the Town of Windsor, Connecticut.
- 8.2 When an application to conduct or cause to be conducted a regulated activity upon an inland wetland or watercourse is filed and any portion of such wetland or watercourse is within 500 feet of the boundary of another municipality, the applicant shall give written notice of the application by certified mail, return receipt requested, on the same day to the inland wetlands agency of such other municipality.
- 8.3 The Agency shall, in accordance with Connecticut General Statutes sections 8-7b(f) and 22a-42b, notify the clerk of any adjoining municipality of the pendency of any application, petition, appeal, request or plan concerning any project on any site in which:
 - a. any portion of the property affected by a decision of the agency is within five hundred feet of the boundary of the adjoining municipality;
 - b. a significant portion of the traffic to the completed project on the site will use streets within the adjoining municipality to enter or exit the site;
 - c. a significant portion of the sewer or water drainage from the project on the site will flow through and significantly impact the drainage or sewerage system within the adjoining municipality; or
 - d. water runoff from the improved site will impact streets or other municipal or private property within the adjoining municipality.

Such notice shall be made by certified mail, return receipt requested, and shall be mailed within seven days of the date of receipt of the application, petition, appeal, request or plan.

- 8.4 When an application is filed to conduct or cause to be conducted a regulated activity upon an inland wetland or watercourse, any portion of which is within the watershed of a water company as defined in section 16-1 of the Connecticut General Statutes, the applicant shall provide written notice of the application to the water company provided such water company has filed a map showing the boundaries of the watershed on the land records of the municipality in which the application is made and the inland wetlands agency of such municipality. Such notice shall be made by certified mail, return receipt requested, and shall be mailed within seven (7) days of the date of application. The water company, through a representative, may appear and be heard at any hearing on the application. Documentation of such notice shall be provided to the Agency.
- 8.5 The date of receipt of a petition, application, request or appeal shall be the day of the next regularly scheduled meeting of the Agency immediately following the day of submission to the Agency or its Agent of such petition, application, request or appeal or thirty-five days after such submission, whichever is sooner.
- 8.6 At any time during the review period, the Agency may require the applicant to provide additional information about the regulated area or regulated activity that is the subject of the application, or wetlands or watercourses affected by the regulated activity. Requests for additional information shall not stay the time limitations as set forth in Section 11.2.
- 8.7 All applications shall be open for public inspection.
- 8.8 Incomplete applications may be denied.

Section 9 Public Hearings

- 9.1 The Agency shall not hold a public hearing on an application unless the inland wetland agency determines that the proposed activity may have a significant impact on wetlands or watercourses or a petition signed by at least twenty-five persons who are

eighteen years or older and who reside in the municipality in which the regulated activity is proposed, requesting a hearing is filed with the Agency not later than fourteen days after the date of receipt of such application or the Agency finds that a public hearing regarding such application would be in the public interest. An applicant may also request that the Agency hold a public hearing on an application submitted by the applicant. The Agency may issue a permit without a public hearing provided no petition provided for in this section is filed with the agency on or before the fourteenth day after the date of receipt of the application. Such hearing shall be held no later than sixty-five days after the receipt of such application. All applications and maps and documents relating to thereto shall be open for public inspection. At such hearing, any person may appear and be heard and may be represented by agent or attorney.

- 9.2 Notice of the public hearing shall be published at least twice at intervals of not less than two days, the first not more than fifteen days and not fewer than ten days, and the last not less than two days before the date set for the hearing in a newspaper having a general circulation in each town where the affected wetland and watercourse is located.
- 9.3 Notice of the public hearing shall be mailed, **by the applicant**, to the owner(s) of record within one hundred (100) feet of the property line no less than fifteen days prior to the day of the hearing. Such notice shall be made by certified mail, return receipt requested or a stamped certificate of mailing from the U.S. Postal Service. Documentation of such notice shall be provided to the Agency.
- 9.4 In the case of any application which is subject to the notification provisions of Section 8.3 of these Regulations, a public hearing shall not be conducted until the clerk of the adjoining municipality(ies) has received notice of the pendency of the application. Proof of such notification shall be entered into the hearing record.

Section 10

Considerations for Decision

- 10.1 The Agency may consider the following in making its decision on an application:
- a. The application and its supporting documentation.
 - b. Public comments, evidence and testimony.
 - c. Reports from other agencies and commissions, including but not limited to the Town of Windsor:
 1. Conservation Commission
 2. Planning, Zoning, or Planning or Zoning Commissions
 3. Building Official

4. Health Officer
5. Town Engineer
- d. The Agency may also consider comments on any application from the North Central Connecticut Conservation District, the Capitol Region Council of Governments, or other regional organizations (i.e., Connecticut River Watershed Council); agencies in adjacent municipalities that may be affected by the proposed activity, or other technical agencies or organizations that may undertake additional studies or investigations.
- e. Non-receipt of comments from agencies and commissions listed in subsections 10.1c and d above within the prescribed time shall neither delay nor prejudice the decision of the Agency.

10.2 Criteria of Decision.In carrying out the purposes and policies of Sections 22a-36 to 22a-45, inclusive, of the Connecticut General Statutes, including matters relating to regulating, licensing and enforcing of the provisions thereof, the Agency shall take into consideration all relevant facts and circumstances, including but not limited to:

- a. The environmental impact of the proposed regulated activity on wetlands or watercourses.
- b. The applicants' purpose for, and any feasible and prudent alternatives to, the proposed regulated activity which alternatives would cause less or no environmental impact to wetlands or watercourses.
- c. The relationship between the short-term, long term and cumulative impacts of the proposed regulated activity on wetlands and the maintenance and enhancement of long term productivity of such wetlands or watercourses .
- d. Irreversible and irretrievable loss of wetland or watercourse resources which would be caused by proposed regulated activity, including the extent to which such activity would foreclose a future ability to protect, enhance or restore such resources, and any mitigation measures which may be considered as a condition of issuing a permit for such activity including, but not limited to, measures to (1) prevent or minimize pollution or other environmental damage, (2) maintain or enhance existing environmental quality, or (3) in the following order of priority: restore, enhance and create productive wetland or watercourse resources;
- e. The character and degree of injury to, or interference with, safety, health, or the reasonable use of property, including abutting or downstream property, which would be caused or threatened by the proposed activity, or the creation of conditions which may do so. This includes recognition of potential damage from erosion, turbidity, or siltation, loss of fish and wildlife and their habitat, loss of unique habitat having demonstrable natural, scientific or educational value, loss or diminution of beneficial aquatic organisms and wetland plants, the dangers of flooding and pollution, and the destruction of the economic, aesthetic,

recreational and other public and private uses and values of wetlands and water- courses to the community.

- f. Impacts of the proposed regulated activity on wetlands or watercourses outside the area for which the activity is proposed and future activities associated with or reasonably related to, the proposed regulated activity which are made inevitable by the proposed regulated activity and which may have an impact on wetlands or watercourses.
- 10.3 In the case of an application that received a public hearing pursuant to a finding by the Agency that the proposed activity may have a significant impact on wetlands or watercourses, a permit shall not be issued unless the Agency finds on the basis of the record that a feasible and prudent alternative does not exist. In making this finding the Agency shall consider the facts and circumstances set forth in Subsection 10.2 of this section. The finding and the reasons therefore shall be stated on the record in writing.
- 10.4 In the case of an application which is denied on the basis of a finding that there may be feasible and prudent alternatives to the proposed regulated activity which have less adverse impact on wetland or watercourses, the Agency shall propose on the record in writing the types of alternatives which the applicant may investigate provided this subsection shall not be construed to shift the burden from the applicant to prove that he is entitled to the permit or to present alternatives to the proposed regulated activity.
- 10.5 For purposes of this section, (1) “wetlands or watercourses” includes aquatic, plant or animal life and habitats in wetlands or watercourses, and (2) “habitats” means areas or environments in which an organism or biological population normally lives or occurs.
- 10.6 A municipal inland wetlands agency shall not deny or condition an application for a regulated activity in an area outside wetlands or watercourses on the basis of an impact or effect on aquatic, plant or animal life unless such activity will likely impact or affect the physical characteristics of such wetlands or watercourses.
- 10.7 In reaching its decision on any application after a public hearing, the Agency shall base its decision on the record of that hearing. Documentary evidence or other material not in the hearing record shall not be considered by the Agency in its decision. A conclusion that a feasible and prudent alternative does not exist does not create a presumption that a permit should be issued. The applicant has the burden of demonstrating that this application is consistent with the purposes and policies of these regulations and

Sections 22a-36 to 22a-45, inclusive, of the Connecticut General Statutes.

Section 11

Decision Process and Permit

- 11.1 The Agency, or its duly authorized agent acting pursuant to Section 12 of these regulations, may, in accordance with Section 10 of these regulations, grant the applications as filed or grant it upon other terms, conditions, limitations or modifications of there regulated activity designed to carry out the purposes and policies of the Act, or deny the application. Such terms may include any reasonable measures which would mitigate the impacts of the regulated activity and which would (a) prevent or minimize pollution or other environmental damage, (b) or enhance existing environmental quality, or (c) in the following order of priority: restore, enhance, and create productive wetland or watercourse resources.
- 11.2 No later than sixty-five (65) days after receipt of an application, the Agency may hold a public hearing on such application. At such hearing any person or persons may appear and be heard and may be represented by agent or attorney. The hearing shall be completed within thirty-five (35) days of its commencement and action shall be taken on applications within thirty-five (35) days after completion of a public hearing. In the absence of a public hearing, action shall be taken on applications within sixty-five (65) days from the date of receipt of the application. The applicant may consent to one or more extensions of the periods specified in this subsection provided the total extension of any such period shall not be for longer than sixty-five (65) days or may withdraw such application. The failure of the Agency to act within any time period specified in this subsection, or any extension thereof, shall not be deemed to constitute approval of the application. An application deemed incomplete by the Agency must either be withdrawn by the applicant or denied by the Agency.
- 11.3 The Agency shall state upon its record the reasons and bases for its decision and, in the case of any public hearing, such decision shall be based fully on the record of such hearing and shall be in writing and shall incorporate a statement relative to the consideration of feasible and prudent alternatives.
- 11.4 The Agency shall notify the applicant and any named parties to the proceeding of its decision within fifteen (15) days of the date of the decision by certified mail, return receipt requested, or a stamped certificate of mailing from the U.S. Postal Service, and the agency shall cause notice of its order in the issuance or denial of the permit, in a newspaper having general circulation in the Town of Windsor. In any

case in which such notice is not published within such fifteen-day (15) period, the applicant may provide for the publication of such notice within ten days thereafter.

- 11.5 If an activity authorized by the inland wetland permit also involves an activity which requires a zoning or subdivision approval, special zoning permit, or variance or special exception, under Sections 8-3(g), 8-3(c), or 8-26 of the Connecticut General Statutes, the Agency shall file a copy of the decision and report on the application with the Town of Windsor Planning, Zoning, or Planning and Zoning Commission within fifteen days of the date of the decision thereon.
- 11.6 Any permit issued by the Agency for the development of land for which an approval is required under Section 8-3, 8-25 or 8-26 of the Connecticut General Statutes shall be valid for five years provided the Agency may establish a specific time period within which any regulated activity shall be conducted. Any permit issued by the Agency for any other activity shall be valid for not less than two (2) years and not more than five (5) years.
- 11.7 If the Agency denies a permit, the application shall not be resubmitted unless the proposal is modified in a fashion that substantially changes the impacts which resulted in the denial. Such submittal shall take the form of a new application.
- 11.8 No permit shall be assigned or transferred without the written permission of the Agency.
- 11.9 If a bond or insurance is required in accordance with Section 13 of these regulations, no permit shall be issued until such bond or insurance is provided.
- 11.10 General provisions in the issuance of all permits:
 - a. The Agency has relied in whole or in part on information provided by the applicant and if such information subsequently proves to be false, deceptive, incomplete or inaccurate, the permit may be modified, suspended or revoked.
 - b. All permits issued by the Agency are subject to and do not derogate any present or future rights or powers of the Agency or the Town of Windsor, and convey no rights in real estate or material nor any exclusive privileges, and are further subject to any and all public and private rights and to any federal, state, and municipal laws or regulations pertinent to the subject land or activity.
 - c. If the activity authorized by the Agency's permit also involves an activity which requires zoning or subdivision approval, special permit, variance or special exemption under Sections 8.3(g), 8-3(c), or 8-26 of the Connecticut General Statutes, no work pursuant to the wetland permit may begin until such approval is obtained.

- d. In constructing the authorized activities, the Permittee shall implement such management practices consistent with the terms and conditions of the permit as needed to control storm water discharges and to prevent erosion and sedimentation and to otherwise prevent pollution of wetland and watercourses.
- e. Permits are not transferable without the prior written consent of the Agency.

Section 12

Action by Duly Authorized Agent

- 12.1 The Agency may delegate to its duly authorized agent the authority to approve or extend an activity that is not located in a wetland or watercourse when such agent finds that the conduct of such activity would result in no greater than a minimal impact on any wetlands or watercourses provided such agent has completed the comprehensive training program developed by the Commissioner of Environmental Protection pursuant to Section 22a-39 of the Connecticut General Statutes. Requests for such approval shall be made on a form provided by the Agency and shall contain the information listed under Section 7.3 of these regulations and any other information the Agency may reasonably require. Notwithstanding the provisions for receipt and processing applications prescribed in Sections 8, 9, and 11 of these regulations, such agent may approve or extend such an activity at any time.
- 12.2 Any person receiving such approval from such agent shall, within ten days of the date of such approval, publish, at the applicant's expense, notice of the approval in a newspaper having a general circulation in the town wherein the activity is located or will have an effect. Any person may appeal such decision of such agent to the Agency within fifteen days after the publication date of the notice and the Agency shall consider such appeal at its next regularly scheduled meeting provided such meeting is no earlier than three business days after receipt by such Agency or its agent of such appeal. Any person may appear and be heard at the meeting held by the Agency to consider the subject appeal. The Agency shall, at its discretion, sustain, alter, or reject the decision of its agent or require an application for a permit in accordance with Section 7 of these regulations.

Section 13

Bond and Insurance

- 13.1 Upon approval of the application and prior to the issuance of a permit, the applicant may, at the discretion of the Agency, be required to file a bond with such surety in such amount and in a form approved by the Agency.

- 13.2 The bond or surety shall be conditioned on compliance with all provisions of these regulations and the terms, conditions and limitations established in the permit.
- 13.3 The Agency may require the applicant to certify that it has public liability insurance against liability which might result from the proposed operation or use of the wetlands or water- courses covering any and all damage which might occur within two (2) years of completion of such operations, in an amount to be determined by the Agency commensurate with the regulated activity.

Section 14 Enforcement

- 14.1 The Agency may appoint an agent or agents to act in its behalf with the authority to inspect property except a private residence, and issue notices of violation or cease and desist orders and carry out other actions or investigations necessary for the enforcement of these regulations.
- 14.2 As a condition of a permit, the Agency or its agent may make regular inspections, at reasonable hours, of all regulated activities for which permits have been issued under these regulations.
- 14.3 If the Agency or its duly authorized agent finds that any person is conducting or maintaining any activity, facility or condition which is in violation of the Act or these regulations, the Agency or its duly authorized agent may:
 - a. Issue a written order by certified mail, return receipt requested, to such person conducting such activity or maintaining such facility or condition to immediately cease such activity or to correct such facility or condition. Within ten (10) calendar days of the issuance of such order, the Agency shall hold a hearing to provide the person an opportunity to be heard and show cause why the order should not remain in effect. The Agency shall consider the facts presented at the hearing and within ten (10) days of the completion of the hearing notify the person by certified mail that the original order remains in effect, that a revised order is in effect, or that the order has been withdrawn. The Agency shall publish notice of its decision in a newspaper having general circulation in the municipality. The original order shall be effective upon issuance and shall remain in effect until the agency affirms, revises or withdraws the order. The issuance of an order pursuant to this section shall not delay or bar an action pursuant to Section 22a-44(b) of the General Statutes, as amended;
 - b. Suspend or revoke a permit if it finds that the applicant has not complied with the terms, conditions or limitations set forth in the permit or has exceeded the scope of the work as set forth in the application, including application plans. Prior to revoking any

permit, the Agency shall issue notice to the Permittee, personally or by certified mail, return receipt requested, setting forth the facts or conduct which warrants the intended action. At the public hearing, the Permittee shall be given an opportunity to show that it is in compliance with its permit and any and all requirements for retention of the permit. The Permittee shall be notified of the Agency's decision to suspend, revoke, or maintain a permit by personal service or certified mail within fifteen (15) days of the date of its decision;

- c. Issue a notice of violation to such person conducting such activity or maintaining such facility or condition, stating the nature of the violation, the jurisdiction of the Agency, and prescribing the necessary action and steps to correct the violation including, without limitation, halting work in wetlands or watercourses. The Agency may request that the individual appear at the next regularly scheduled meeting of the Agency to discuss the unauthorized activity, and/or provide a written reply to the notice or filing a proper application for the necessary permit. Failure to carry out the action(s) directed in a notice of violation may result in issuance of the order provided in Subsection a. of this section or other enforcement proceedings as provided by law.

Section 15 Amendments

- 15.1 These regulations and the Inland Wetlands and Watercourses Map for the Town of Windsor, Connecticut may be amended from time to time, by the Agency in accordance with changes in the Connecticut General Statutes or regulations of the State Department of Environmental Protection, or as new information regarding soils and inland wetlands and watercourses becomes available.
- 15.2 An application filed with the Agency which is in conformance with the applicable inland wetlands regulations as of the date of the receipt of such application shall not be required thereafter to comply with any change in inland wetland regulations, including changes to setbacks and buffers, taking effect on or after the date of such receipt and any appeal from the decision of such Agency with respect to such application shall not be dismissed by the Superior Court on the grounds that such a change has taken effect on or after the date of such receipt. The provisions of this section shall not be construed to apply (1) to the establishment, amendment or change of boundaries of inland wetlands or watercourses or (2) to any change in regulations necessary to make such regulations consistent with the provisions of the Act as of the date of such receipt.
- 15.3 These regulations and the Town of Windsor Inland Wetlands and Watercourses Map shall be amended in the manner specified in Section 22a-42a of the Connecticut General Statutes, as amended. The Agency

shall provide the Commissioner of Environmental Protection with a copy of any proposed regulations and notice of the public hearing to consider any proposed regulations or amendments thereto, except determinations of boundaries, at least thirty-five days before the public hearing on their adoption. Application forms and fee schedules shall be considered as part of the Agency regulations.

- 15.4 Petitions requesting changes or amendments to the "Inland Wetlands and Watercourses Map, Windsor, Connecticut" shall contain at least the following information:
 - a. The applicant's name, address and telephone number;
 - b. The owner's name (if not the applicant), address, telephone number, and a written consent to the proposed action set forth in the application;
 - c. Applicant's interest in the land;
 - d. The geographic location of the property involved in the petition including a description of the land in sufficient detail to allow identification of the disputed wetland or watercourse areas;
 - e. The reasons for the requested action;
 - f. The names and addresses of adjacent property owners;
 - g. A map showing proposed development of the property; and
 - h. A 1"=2000' scale map showing existing conditions as well as the proposed change in the wetland boundary.

- 15.5 Any person who submits a petition to amend the Inland Wetlands and Watercourses Map, Windsor, Connecticut shall bear the burden of proof for all requested map amendments. Such proof may include, but is not limited to, professional interpretation of aerial photography and remote sensing imagery, resource mapping, soils mapping, or other information acceptable to the Agency. If such person is the owner, developer or contract purchaser of the land which is the subject of the petition, or if such person is representing the interests of such an owner, developer or purchaser, in addition to the information required in subsection 15.4, the petition shall include:
 - a. the name, mailing address and telephone number of there owner(s) of such land and owner(s) agent or other representative;
 - b. the names and mailing addresses of the owners of abutting land;
 - c. documentation by a soil scientist of the distribution of wetland soils on said land. Such documentation shall at a minimum include the report of the soil scientist documenting the location of wetland soils on the land and a map of the said land indicating the flag locations set by the soil scientist and defining the boundaries of wetland soil types; and
 - d. map(s) showing any proposed development of the land in relation to existing and proposed wetland and watercourse boundaries.

- 15.6 Watercourses shall be delineated by a soil scientist, geologist, ecologist or other qualified individual.

- 15.7 A public hearing shall be held on petitions to amend the Inland Wetland and Watercourses Map. Notice of the hearing shall be published in a newspaper having general circulation in the municipality where the land that is the subject of the hearing is located at least twice at intervals of not less than two days, the first not more than fifteen days nor less than ten days, and the last not less than two days, before the date of such hearing. All materials including maps and documents relating to the petition shall be open for public inspection.
- 15.8 The Agency shall hold a public hearing on a petition to amend the regulations and the Inland Wetlands and Watercourses Map within sixty-five (65) days after receipt of such petition. The hearing shall be completed within thirty-five (35) days after commencement. The Agency shall act upon the changes requested in such petition within sixty-five(65) days after completion of such hearing. At such hearing, any person or persons may appear and be heard and may be represented by agent or attorney. The petitioner may consent to one or more extensions of any period specified in this subsection provided the total extension of all such periods shall not be for longer than sixty-five (65) days or may withdraw such petition. Failure of the agency to act within any time period specified in this subsection or any extension thereof, shall not be deemed to constitute approval of the petition.
- 15.9 The Agency shall make its decision and state, in writing, the reasons why the change in the Inland Wetlands and Watercourses Map was made.

Section 16 Appeals

- 16.1 Appeal on actions of the Agency shall be made in accordance with the provisions of Section 22a-43 of the General Statutes, as amended.
- 16.2 Notice of such appeal shall be served upon the Agency and the Commissioner of Environmental Protection.

Section 17 Conflict and Severance

- 17.1 If there is a conflict among the provisions of these regulations, the provision that imposes the most stringent standards for the use of wetlands and watercourses shall govern. The invalidity of any word, clause, sentence, section, part, subsection, subdivision or provision of

these regulations shall not affect the validity of any other part which can be given effect without such invalid part or parts.

- 17.2 If there is a conflict between the provisions of these regulations and the provisions of the Act, the provisions of the Act shall govern.

Section 18 Other Permits

- 18.1 Nothing in these regulations shall obviate the requirements for the applicant to obtain any other assents, permits or licenses required by law or regulation by the Town of Windsor, the State of Connecticut or the Government of the United States including any approval required by the Connecticut Department of Environmental Protection and the U.S. Army Corps of Engineers. Obtaining such assents, permits or licenses is the sole responsibility of the applicant.

Section 19 Application Fees

- 19.1 Method of Payment. All fees required by these regulations shall be submitted by check or money order payable to the Town of Windsor at the time the application is filed with the Agency.
- 19.2 No application shall be granted or approved by the Agency unless the correct application fee is paid in full or unless a waiver has been granted by the Agency pursuant to subsection 19.7 of these regulations.
- 19.3 The application fee is not refundable.
- 19.4 Definitions. As used in this section:
“Residential Uses” means activities carried out on property developed for permanent housing or being developed to be occupied permanent housing.
“Commercial Uses” means activities carried out on property developed for industry, commerce, trade, recreation, or business or being developed to be occupied for such purposes, for profit or nonprofit.
“Other Uses” means activities other than residential uses or commercial uses.
- 19.5 The agency shall collect the following fees to help defray the costs and expenses of carrying out its duties under these regulations:

Summary Ruling:

Residential: \$100/lot bordering or containing, or draining into a regulated area.

Agricultural or Recreational: \$100/acre of regulated area effected by the proposed activity.

Commercial, Industrial, Residential Multi-Family, or Other Use: \$300, plus \$100 for each lot/acre of wetland or other regulated area.

Plenary Ruling:

Residential: \$200/lot bordering or containing, or draining into a regulated area.

Agricultural or Recreational: \$200/acre of regulated area effected by the proposed activity.

Commercial, Industrial, Residential Multi-Family, or Other Use: \$600, plus \$100 for each lot/acre of wetland or other regulated area.

State Reporting Fee: - \$30.00

Permit Revisions or Modification: - \$90.00

Wetlands Permit Renewal: - \$70.00

Amendments to the Wetlands Map: - \$250.00

Cease and Desist Order: - \$250 minimum

Public Hearing Fee: - \$250.00

Violations:

- Failure to appear before the Commission when directed: \$25.00
- Second Notice of Violation: \$50.00
- Failure to comply with regulations within given timeframe: minimum \$25.00 per day from date of notice and maximum \$1,000.00 per day, based on type of activity, until violation is remedied.
- Carrying on activities without a permit, or carrying on activities not authorized by a permit in the upland review area, which do not pose an immediate danger to a wetland or watercourse: \$75.00.
- Carrying on activities without a permit, or carrying on activities not authorized by a permit in the upland review area, which may pose an immediate danger to a wetland or watercourse: \$150.00.
- Carrying on activities without a permit, or carrying on activities not authorized by a permit in a wetland or watercourse which

cause limited and/or correctable damage to the wetland or watercourse: \$200.00

- Excavating in, filling or draining of any portion of a wetland or watercourse without a permit: \$750.00
- Carrying on activities without a permit, or carrying on activities not authorized by a permit, which cause sediment to flow into any wetland or watercourse or otherwise cause the pollution of any portion of a wetland or watercourse: \$750.00
- Carrying on without a permit or outside the authorization of a permit, any regulated activities in a regulated area not listed above: \$250.00

Compliance Inspections: Upon discovery of a violation of the approved wetlands plan or of an illegal wetlands activity, it may be necessary for additional inspections to be conducted by the Wetlands Agent or other technical staff in order to correct the violations noted. In such cases, the owner of the land or the person causing the violation will be charged for the additional inspection services conducted by the town. Fees for such services will be determined based on actual salary costs, fringe benefits, and any compliance with the wetland regulations.

- 19.6 Exemption. Boards, commissions, councils and departments of the Town of Windsor are exempt from all fee requirements.
- 19.7 Waiver. The applicant may petition the Agency to waive, reduce or allow delayed payment of the fee. Such petitions shall be in writing and shall state fully the facts and circumstances the Agency should consider in its determination under this subsection. The Agency may waive all or part of the application fee if the Agency determines that:
- a. The activity applied for would clearly result in a substantial public benefit to the environment or to the public health and safety and the applicant would reasonably be deterred from initiating the activity solely or primarily as a result of the amount of the application fee, or
 - b. The amount of the application fee is clearly excessive in relation to the cost to the Town for reviewing and processing the application.
- The Agency shall state upon its record the basis for all actions under this subsection.

Section 20

Records Retention and Disposition

- 20.1 The Agency and the Town Clerk for the Town of Windsor shall retain complete administrative records of Agency actions and dispose of such records in accordance with the retention/disposition schedules set for in subsection 20.2.

20.2 The public records administrator of the Connecticut State Library established the following new records retention/disposition schedules for municipal Inland Wetlands and Watercourses Agencies effective April 24, 1989:
