Re: Application of The Connecticut Light & Power Company to the Connecticut Siting Council for a Certificate of Environmental Compatibility and Public Need for the Construction of the Rood Avenue Substation in Windsor

Dear Ms. Kahkonen:

In response to the increasing peak-load demands for electricity in the Town of Windsor, The Connecticut Light & Power Company ("CL&P") is proposing to construct the Rood Avenue Substation Project. This substation will increase the capacity to transform electricity to reliably and adequately deliver power to customers. Pursuant to Connecticut General Statutes Section 16-50l(e), CL&P is submitting the enclosed the Municipal Consultation filing information with the Town of Windsor. In order to facilitate public involvement, we ask that you keep this enclosed copy and make it available for review.

Thank you.

The Connecticut Light and Power Company
