Re: Docket 396, Certificate Application for Proposed Telecommunications Facility at 49
Brainard Road, East Lyme, Connecticut – Comments Regarding Proposed Findings of Fact dated
October 21, 2010

Dear Ms. Roberts:

In regards to the subject Findings of Fact I wish to revise my testimony (T4. 4, pp. 18-20), item number 98, in light of subsequent testimony by SBA which proposed an alternate location for the Facility on the Samuelson property to a so-called hybrid site located approximately between my proposed alternate location Options 1 and 2 and approximately 300 feet south of the originally proposed location. Accordingly, I propose that item 98 in the subject Findings of Fact be revised to read as follows:

“If the tower is approved at the subject property, Mr. Brown’s first preference for the Facility’s location is at the SBA’s newly proposed hybrid location (at approximately 300 feet south of their originally proposed location), second preference is his Option No. 1 location with minor southwesterly footprint adjustments made to accommodate non-impingement on the identified wetlands and the third preference would be his Option No. 2.”

Respectfully submitted,

A handwritten signature in cursive script that reads "Russell L. Brown".

Russell L. Brown
