Subject: NDDDB Request #201204140 (Updated)
Somers Solar Center, 488 South Road
Somers, CT

Dear Don Lussier,

I have reviewed Natural Diversity Data Base (NDDDB) maps and files regarding the area delineated on your updated request form. Based on our current records, we do not anticipate negative impacts to State-listed species (RCSA Sec. 26-306) resulting from the proposed activity at the site.

Natural Diversity Data Base information includes all information regarding critical biologic resources available to us at the time of the request. This information is a compilation of data collected over the years by the CT Department of Energy & Environmental Protection, Bureau of Natural Resources and cooperating units of DEEP, private conservation groups and the scientific community. This information is not necessarily the result of comprehensive or site specific field investigations. Consultations with the Data Base should not be substituted for on-site surveys required for environmental assessments. Current research projects and new contributors continue to identify additional populations of species and locations of habitats of concern, as well as, enhance existing data. Such new information is incorporated into the Data Base as it becomes available. If the proposed work has not been initiated within 12 months of this review, contact the NDDDB for an updated review.

Please contact me if you have any questions (nelson.debarros@ct.gov; 860-424-3585). Thank you for consulting the Natural Diversity Data Base and continuing to work with us to protect State-listed species.

Sincerely,

Nelson B. DeBarros
