Bridgeport, CT 06601-1821

RE: **PETITION NO. 809** - Extenet Systems, Inc. petition for a declaratory ruling that the Connecticut Siting Council does not have jurisdiction or, in the alternative, that no Certificate of Environmental Compatibility and Public Need is required for the proposed construction of a Distributed Antenna System along the Merritt Parkway from the New York state line to Westport, Connecticut.

Dear Attorney Kohler:

The Connecticut Siting Council (Council) requests your responses to the enclosed questions no later than July 26, 2007. To help expedite the Council's review, please file individual responses as soon as they are available.

Please forward an original and 15 copies to this office. In accordance with the State Solid Waste Management Plan, the Council is requesting that all filings be submitted on recyclable paper, primarily regular weight white office paper. Please avoid using heavy stock paper, colored paper, and metal or plastic binders and separators. Fewer copies of bulk material may be provided as appropriate.

Yours very truly,

S. Derek Phelps
Executive Director

PRE-HEARING INTERROGATORIES
PETITION NO. 809 – MERRITT PARKWAY DAS
EXTENET SYSTEMS INC.
JULY 9, 2007

1. Describe Extenet's active networks including location, type and extent of area serviced, number of nodes, design of nodes, number of base stations, number of carriers involved, and date of system operation.
2. Does a wireless provider have the option to locate on select portions of the proposed Merritt Parkway system?
3. Page 7 of the Petition states the "network can be configured to support certain state and local emergency services communications". Describe what services are compatible with the DAS. What services cannot be accommodated? Would Extenet provide lease free infrastructure to local emergency response units?
4. Page 7 of the Petition states the network can support carriers that implemented a TDOA E-911 technology. Which carriers operating in Connecticut have implemented this technology? What E-911 carrier technology is not compatible with the proposed DAS?
5. Page 9 of the Petition states coverage at -84 dBm can be attained in 90% of the network area. What specific areas would have deficient coverage? Could additional nodes provide 100% coverage? How does the DAS account for individual carrier coverage thresholds?
6. What type of analysis was conducted to determine that residences within 500 feet of the Merritt Parkway would not have visibility of the proposed DAS infrastructure?
7. Describe the existing wireless facilities between nodes 18 & 19, and north of node 16.
8. The photo-simulation of nodes 10 and 17 depict each node as consisting of two cable-mounted antennas and a single pole mounted antenna. Are these depictions correct?
9. What are the utility designated pole numbers for nodes 12, 20 and 33?
10. The DAS coverage model depicts coverage from a node identified as node 27; however, node 27 is not listed in the corresponding node location detail summary (Attachment A) or shown in the photo-simulations (Attachment E). Please provide.
