Petition No. 2

An inspection of the reconstructed 115 kV transmission line of approximately 1½ miles between the East Hartford-Manchester border and Route 15 in Manchester was made by John Lombard, Economist and W.C. Joram, Exec. Director, accompanied by Jerry Thompson of Northeast Utilities.

We found the project to be completed in accordance with the specifications set forth in the applicants letter of September 20, 1972.

A description of the modifications with color slides was presented to the Council on April 25, 1975 by W.C. Joram.
