Petition No. 7

An inspection of the reconstructed 69 kV transmission line between Card Street substation in Lebanon and Mansfield substation in Mansfield was made by John Lombard, Economist and W.C. Joram, Exec. Director, accompanied by Jerry Thompson of Northeast Utilities on March 26, 1975.

We found the project to be completed in accordance with the specifications set forth in the applicants letter of November 17, 1972 to the Council.

A description of the completed modification with colored slides was given to the Council on April 25, 1975 by W.C. Joram.
