Petition No. 127
108 Radio Company
Bridgeport, Ct.

The 108 Radio Company of South Norwalk, Connecticut, is seeking a declaratory ruling from the Siting Council that its proposed installation of an FM transmission antenna on a United Illuminating (UI) smokestack is not a facility, is not a telecommunication tower owned or operated by the state or a public service company, and that this proposed installation would not have a substantial adverse environmental impact.

The proposed FM antenna would be attached to the north side of the existing Unit #3 smokestack, and three receiving antennas would be attached to the east side of this smokestack's middle catwalk. UI's Bridgeport Harbor Unit #3 was the subject of the Council's hearing in Docket No. 27.

Staff conferred with Dave Damer of UI, who indicated that the reflective screen would be painted to match the existing smokestack. Mr. Damer also confirmed that UI is presently negotiating an agreement with 108 Radio Company on this matter, and that the information included in this petition is substantially correct.
