Petition No. 307
Bell Atlantic Metro Mobile
West Hartford, Connecticut
August 23, 1993

At a public meeting on June 29, 1993, the Connecticut Siting Council (Council) ruled that the construction of the equipment room contemplated in this Bell Atlantic Metro Mobile (BAM) petition could proceed; however, the Council tabled a decision on the installation of antennas on the cupola pending submission of information regarding the historic significance of the building.

At the request of Council Chairman Gelston, BAM sought consultation of the Connecticut Historic Preservation Commission (CHPC). After consultation and a site review by Susan Chandler of the CHPC and BAM personnel, BAM is now proposing to replace the panel antennas originally proposed with cylindrical Celwave Model PD10188 antennas. The proposed cylindrical antennas would blend with the cupola, be less visually obtrusive, and have been determined by the CHPC to have no effect on the site.
