11	WHAT YOU'LL NEED

## INTRODUCTION AND OVERVIEW

The Office of Education and Data Management (OEDM), in cooperation with the Office of the State Building Inspector, is responsible for administering building code official licensure procedures. This includes the development and administration of training and building code enforcement licensure examinations.

The **Licensure Training Program with Examination** was developed to assist qualified candidates prepare for the state of Connecticut licensure examination. The requirements for Building Code Enforcement Licensure are established under Section 29-262 of the Connecticut General Statutes and the Department of Public Safety Administrative Regulations. There is no student fee for this training. This program is made possible through the Code Training and Education Fund.

Satisfactory completion of all required training classes, maintenance of a passing cumulative grade-point average for the licensure classification being sought, and a passing score on the final examination are required for issuance of a license.

The following licensure information and application form are provided to assist individuals interested in becoming licensed in the state of Connecticut under one of the following nine classifications:

- Building Official
- Assistant Building Official
- Residential Building Inspector
- Plan Review Technician
- Mechanical Inspector
- Electrical Inspector
- Plumbing Inspector
- Heating & Cooling Inspector
- Construction Inspector

## APPLICATION PROCESS

The **application form and supporting documentation** must be submitted to OEDM by the application deadline. Municipal employees meeting the requirements for building code enforcement licensure will be given preference for admittance into the licensure program.

The State Building Inspector and the Director of Education & Data Management review the application and determine admittance into the program.

Applicants accepted into the program will receive a written letter of acceptance from OEDM. This letter will include class dates, times, directions and required code books.

**Contact Doug Schanne, OEDM Training Program Supervisor, at 860-713-6432 with application questions.**

Send the signed Application Form with required documentation to:

**Email:**  
**maria.baez@ct.gov**  
**Subject: Licensure Application**

**Fax:**  
**860-713-7426**  
**Attention: Licensure Application**

**Mail:**  
**Department of Administrative Services**  
**Office of Education and Data Management**  
**165 Capitol Avenue, Room 431**  
**Hartford, CT 06106**  
**Attention: Licensure Application**

## 2015 APPLICATION FOR LICENSURE TRAINING PROGRAM

Please type or print clearly. Complete application in its entirety, sign the form, and include copies of licenses and certificates requested in this application. Incomplete applications may result in delay or denial of admittance to the program.

## COURSE DESCRIPTIONS

The **Residential Module** is based on the International Residential Code portion of the State Building Code & references the National Electrical and Energy Conservation Codes.

Session	Days	Course Description
1-101	1	<b>Program Introduction, State Building Code Administration</b> - This session is an introduction to the Pre-Licensure Training Program and the State Building Code Administration focusing on the ICC 2012 International Residential Code (IRC). This session is delivered to students of all Code enforcement disciplines and provides a firm base for the correct use and application of the IRC.
1-102	7	<b>Building Planning and Construction</b> - This session provides code training and compliance exercises on Part III of the IRC covering Chapters 3 through 10. Topics include building planning, foundations, floors, wall construction, wall covering, roof-ceiling construction, roof construction, chimneys and fireplaces.
1-103	4	<b>Residential Mechanical Provisions</b> - This session provides code training and compliance exercises on Parts V and VI of the IRC covering Chapters 12 through 24. Topics include mechanical system requirements, heating and cooling equipment and appliances, exhaust systems, duct systems, combustion air, chimneys and vents, special appliances, boilers, water heaters, hydronic piping, special piping, storage systems, solar energy systems and fuel gas.
1-104	3	<b>Residential Plumbing Provisions</b> - This session provides code training and compliance exercises on Parts VII of the IRC covering Chapters 25 through 33. Topics include plumbing requirements, fixtures, water heaters, water supply and distribution, sanitary drainage, vents, traps and storm drainage.
1-105	3	<b>Residential Electrical Provisions of the IRC</b> - Based on Part VIII of the 2012 IRC, training will cover code compliance for installations of electrical systems in new one and two family dwellings.
1-106	4	<b>Residential Electrical Provisions of the NEC</b> - This session introduces students to Articles 90 through 490 (Chapters 1 through 4) of the 2014 National Electrical Code (NEC) and covers the requirements for residential electrical systems to be in compliance with the NEC.
1-107	1	<b>Residential Energy Conservation Provisions</b> - This session provides procedures for the review of residential building plans, specifications, and inspections in light of residential applications of the International Energy Conservation Code (IECC).
1-108	1	<b>Residential Standards and Code Appendices</b> - This session provides an overview of the reference standards in Chapter 44 of the IRC, highlighting key residential code appendices and how they apply to residential buildings and associated structures.
1-109	2	<b>Residential Plan Review</b> - This session provides a procedure for reviewing residential building plans and specifications.
Exam	1	Residential Module Exam

The **Building and Companion Code Module** is based on the International Building Code portion of the State Building Code and references the Plumbing, Mechanical, Electrical and Energy Conservation Codes.

Session	Days	Course Description
1-201	1	<b>Administration, Use &amp; Occupancy Classifications</b> - This session introduces code administration with the Connecticut Supplement to the International Building Code (IBC) by properly identifying the use and occupancy of buildings and structures in Connecticut.
1-202	1	<b>Types of Construction, Building Height and Area</b> - This session is an introductory overview providing a basis for using the code to identify types of construction and determine limitations on building height and area.
1-203	1	<b>Fire Protection Systems, Interior Finishes</b> - This session discusses the requirements contained in Chapter 9 and other sections of the IBC relating to fire protection systems (Sprinkler & Alarms). This session also presents and explanation of the requirements and limitations associated with interior finishes.
1-204	2	<b>Means of Egress</b> - This session focuses on Chapter 10 of the IBC, explaining means of egress requirements in buildings and structures. Discussion includes, but is not limited to, the code requirements for exit access, exits, exit discharge, occupant loads, stairways, doors, and hardware.
1-205	2	<b>Accessibility</b> - This session explains the IBC Chapter 11 and American National Standards Institute (ANSI) standards which enable people with disabilities to use buildings of all types.

Session	Days	Course Description
1-206	2	<b>Interior Environment, Exterior Walls, and Roof</b> - This session covers the code requirements from Chapters 12, 14 and 15 of the IBC. Topics include interior environments, exterior walls, roof assemblies, and rooftop structures.
1-207	1	<b>Structural Design, Special Inspections and Tests</b> - Based on IBC Chapters 16 and 17, this session provides code information governing structural design, including construction documents and how to account for various loads that affect the design criteria. Discussion also includes inspections and tests to verify compliance of the structure to building codes and engineering designs.
1-208	1	<b>Soils and Foundations, Concrete</b> - Exploring Chapters 18 and 19 of the IBC, this session introduces the code requirements associated with soils and foundation systems. Building on the prior session, it expands into allowable bearing pressures, allowable stresses, and associated design formulas for soils and foundations to handle structural loads. Code requirements for Concrete are presented as well.
1-209	1	<b>Masonry, Steel, and Wood</b> - This session covers the code requirements of Chapters 21, 22, and 23 of the IBC for materials and portions of structures built with masonry, steel, and wood, highlighting sections associated with the use and application of these materials within the building structure.
1-210	1	<b>Glazing, Gypsum, Plaster, Plastic</b> - Referencing Chapters 24, 25, and 26 of the IBC, this session covers the code requirements for glazing, gypsum, plaster, and plastic materials used in portions of structures, highlighting sections associated with the use and application of these materials.
1-211	1	<b>Elevators, Special Construction, Encroachments</b> - This session covers the requirements of Chapters 30, 31 and 32 of the IBC and associated Connecticut Regulations, addressing the design and construction of elevators and conveying systems, special building construction including membrane structures, and encroachment of structures into the public right of way.
1-212	2	<b>Safeguards and Existing Structures</b> - Examining Chapter 33 of the IBC, this session looks at code requirements governing safety during construction and the protection of public and private properties. Turning to Chapter 34, the session explores code provisions controlling the alteration, repair, addition, and change of occupancy for existing buildings and structures.
1-213	1	<b>Review of the International Building Code Provisions</b> - This session is a comprehensive review of the building code requirements covered in the IBC.
1-214	2	<b>Existing Structures and the International Existing Building Code</b> - This session explores how to apply the provisions of the International Existing Building Code (IEBC) as an alternative to compliance with IBC Chapter 34, controlling the alteration, repair, addition and change of occupancy of existing buildings.
1-215	3	<b>Plumbing Code Provisions</b> - This session is based on the 2012 International Plumbing Code (IPC) and provides a chapter by chapter review to assist code officials in locating, describing, and applying code requirements of the IPC when determining compliance or noncompliance.
1-216	3	<b>Mechanical Code Provisions</b> - This session is based on the 2012 International Mechanical Code (IMC) and provides a chapter by chapter review to assist code officials in locating, describing, and applying code requirements of the IMC when determining compliance or noncompliance.
1-217	3	<b>National Electrical Code for Commercial and Special Applications</b> - Based on the 2014 NEC, this session explains the installation requirements for electrical equipment for special occupancies, special equipment, special conditions, and communication systems in new and existing structures.
1-218	2	<b>Energy Conservation Provisions</b> – This session is based on the 2012 IECC and provides a chapter by chapter explanation for the application of the IECC to commercial applications. An overview of the <i>COMcheck</i> software used to show design and engineering compliance to the code also is provided.
1-219	4	<b>Plan Review</b> - This session provides step by step procedures for reviewing construction documents for code compliance.
Exam	1	<b>Final Licensure Examinations</b>

**There is no student fee for this training. This program is made possible through the Code Training and Education Fund.**

## STATUTORY AND REGULATORY REQUIREMENTS

To verify the requirements for and responsibilities of building code official licensure, please refer to the following statute and regulations:

### CONNECTICUT GENERAL STATUTES

**Sec. 29-261 Qualifications of building officials and assistant building officials.**

### REGULATIONS REGARDING BUILDING OFFICIAL LICENSURE

**Sec. 29-262-1b. Classes of Licensure**

**Sec. 29-262-2b. Building Official**

**Sec. 29-262-3b. Provisional Building Official**

**Sec. 29-262-4b. Assistant Building Official .**

**Sec. 29-262-5b. Residential Building Inspector**

**Sec. 29-262-6b. Plan Review Technician**

**Sec. 29-262-7b. Mechanical Inspector**

**Sec. 29-262-8b. Electrical Inspector**

**Sec. 29-262-9b. Plumbing Inspector**

**Sec. 29-262-10b. Heating and Cooling Inspector**

**Sec. 29-262-11b. Construction Inspector**

**Sec. 29-262-12b. System of Control and Reporting Continuing Educational Programs**

## WHAT YOU'LL NEED

Class notes will be provided in electronic format, so it is advisable for students to bring a laptop (with USB port) to class. **Students must purchase their own code books.** Once you are admitted to the program, you will receive a list of the books you'll need relative to the type of license sought.
