

## NFIRS 5.0 Design Documentation Changes

Change Number	Change Date	Documents Affected	Location In Design Document	Description of Problem	Correction Description
<b>The following changes will be applied in the 2015.1 cycle of the Design Specification effective January 1, 2015.</b>					
359	09/10/14	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Incident Module Rule 19, Page 112	Needed to allow the Hazmat module to be completed when the Incident Type was 244 (Dust explosion)	Updated Incident module rule 19 to allow the Hazmat module for dust explosion incidents
360	09/10/14	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Relational Edit Rule 181, Fire Module, Page 111	The rule that required equipment involved in ignition be entered if the incident is not a vehicle fire and the heat source or factors contributing to ignition is heat from operating equipment is removed due to conflicts in some situations when vehicles are involved in the fire. This reverts the rules validation for Equipment Involved in Ignition to the state prior to introduction of Relational Edit 181.	Removed/deactivated relational edit 181
361	09/10/14	SPEC-TABLE.XLS, Design Documentation	Design Documentation, Relational Edit Rule 14, Basic Module, Page 102	Forcible entry is a valid action taken for animal rescue incidents and relational edit 14 needed to be modified to reflect that.	Allowed the Action Taken of 52 (Forcible entry) for Incident Type 542 (Animal rescue)
362	09/10/14	CRG	CRG, Basic Module, Page 3-29	The definition of Intersection was duplicated on page 3-10 of the CRG.	Removed the duplicate section of text.
363	09/10/14	CRG	CRG, Basic Module, Page 3-5	The section for state codes needed to be revised to reflect non-state entities that are reporting to NFIRS	Added the 'NA' state code for the Native American Tribal Authority fire departments in a separate table with the "special" state-like entities that are reporting
364	09/10/14	CRG	CRG, Basic Module, Page 3-24	Previous specification change #345 was not reflected in the CRG.	Added the Incident Type 244 - Dust explosion (no fire) to the Incident Type codes list.
