Information provided by the provider describing their agency:

People with developmental disabilities are 3 to 4 times more likely to experience mental health conditions than people in the general population. Our goal at Mental Health Connecticut (MHC) is to create quality services and compassionate relationships that engage, instruct and inspire. Using our expertise in the field of mental health, Mental Health Connecticut provides services and supports to address the specific needs of people who are dually diagnosed with developmental disabilities and mental health conditions.

We see every person as a contributing citizen who deserves the necessary services to live their fullest life within their community. MHC staff is highly trained to support and advocate for individuals; balancing the need for such support with personal accountability.

In addition to our extensive knowledge of mental health, MHC is recognized in the State of Connecticut as the largest provider of Mental Health Services to the deaf and hard of hearing community. We are proud to offer this area of expertise and an extensive variety of services to this group of individuals as well.
