Subject: Proposed boatyard on Magee in Stamford, CT
Date: Saturday, February 16, 2013 10:01:37 AM

I am concerned as a senior (79 yrs. Old) widow living next door to the proposed boatyard. I beg you to look at the place. It is literally in my front-yard! Not a mile away – not a ½ mile away but measured in yards! Would you want this in your front yard or back yard?

Here's why you wouldn't.

1. Pollution - Environmentally it will bring much air and water pollution due to the incessant transportation of dredging materials and a very, very limited width to the channel. You must go look and imagine that you lived here or your grandparents or grandchildren, please!
2. Noise – how about noise! I know that boats must beep. When they turn and/or back up and other docking maneuvers signaling is often necessary and with the volume of ships in could be incessant. This is a residential condominium RIGHT next door.
3. Space – it's a small space that was meant for a walking path – very, very small space compared to the previous dock.

Please, please come down and look and you will then see just how inappropriate this Magee site. is and just how much you will be protecting the people (like me) from such an invasion into our homes by objecting to it.

There's so little control we have in life but hopefully this letter and others can alert you to some positive action on our behalf.

Thank you so very much,

Myrm Salko
