Exploring Climate Solutions Webinar Series

Brought to you by the *Governor's Council on Climate Change (GC3)*

The GC3'S **Exploring Climate Solutions** webinar series explores innovative and successful climate change solutions across Connecticut and the nation. The series provides you with first-hand accounts of high-profile municipal climate programs, climate initiatives in the corporate world, greenhouse gas reporting frameworks, statewide sustainability programs, and low-carbon fuel initiatives.

In our upcoming **December 8th Lunchtime webinar**, participants will learn about the **California Environmental Protection Agency's State Greenhouse Gas Reduction Report Card**. As part of California's aggressive efforts to meet its medium- and long-term GHG emissions reduction goals, the California EPA is required to prepare an annual report tracking how reduction measures are being implemented by state government agencies. The State Agency Greenhouse Gas Reduction Report Card covers 13 agencies and scores of issues, from the renewable portfolio standard and LED street lighting to biofuels and landfill methane. In this webinar, Dr. William Dean, of California EPA's Climate Change Unit, provides an overview of the Report Card's origins, its coverage, and its influence on state policy and agency management.

Please join us to learn more about this innovative initiative by registering [here](#).
