Exploring Climate Solutions Webinar Series

Brought to you by the *Governor's Council on Climate Change (GC3)*

The GC3'S **Exploring Climate Solutions** webinar series explores innovative and successful climate change solutions across Connecticut and the nation. The series provides you with first-hand accounts of high-profile municipal climate programs, climate initiatives in the corporate world, greenhouse gas reporting frameworks, statewide sustainability programs, materials management strategies, and low-carbon fuel initiatives.

In our upcoming **April 8th lunchtime webinar**, join us to learn about opportunities for **renewable thermal technologies in Connecticut**. What are renewable thermal technologies? Are they viable in Connecticut? Participants will learn about how renewable thermal technologies can lead to reduced energy costs and play a role in helping meet state climate goals. Air- and ground-source heat pumps, geothermal, and solar thermal are all examples of renewable thermal technologies that provide heating and/or cooling services for buildings and homes. Participants will also learn about current incentives and financing opportunities for renewable thermal technologies.

Please join us to learn more by registering [here](#).
