Exploring Climate Solutions Webinar Series

Brought to you by the *Governor's Council on Climate Change (GC3)*

The GC3'S **Exploring Climate Solutions** webinar series explores innovative and successful climate change solutions across Connecticut and the nation. The series provides you with first-hand accounts of high-profile municipal climate programs, climate initiatives in the corporate world, greenhouse gas reporting frameworks, statewide sustainability programs, and low-carbon fuel initiatives.

In our upcoming **October 30th lunchtime webinar**, participants will learn about the **BGreen 2020** initiative, a public-private partnership between the **City of Bridgeport** and the **Bridgeport Regional Business Council**, a consortium of local business groups. By building on Bridgeport's existing strengths, BGreen will modernize the city's infrastructure, create wealth, intensify urban amenities, enhance environmental quality, enable revitalization without gentrification, and retain Bridgeport's historic character. Early priorities are the creation of an Energy Improvement District to support energy efficiency and production, adopting a "Transit First" policy, developing a plan for open space use and maintenance, expanding recycling, and protecting the region's waterways through enhanced stormwater management. A Green Collar Institute will train workers and act as an incubator for developing green industries.

Please join us to learn more about this innovative initiative by registering [here](#).
