### Exploring Climate Solutions Webinar Series

Brought to you by the *Governor's Council on Climate Change (GC3)*

The GC3'S **Exploring Climate Solutions** webinar series explores innovative and successful climate change solutions across Connecticut and the nation. The series provides you with first-hand accounts of high-profile municipal climate programs, climate initiatives in the corporate world, greenhouse gas reporting frameworks, statewide sustainability programs, and low-carbon fuel initiatives.

In our upcoming **December 15<sup>th</sup> lunchtime webinar**, participants will learn about the **EV Everywhere Workplace Charging Challenge**. Developed by the U.S. Department of Energy, the EV Everywhere Workplace Charging Challenge aims to achieve a tenfold increase in the number of U.S. employers offering workplace charging for plug-in electric vehicles (PEV) by 2018. Many PEV drivers do their charging primarily at home, but access to charging at the workplace can help to double their vehicles' all-electric commuting range, increasing the affordability and convenience of driving an electric vehicle. The Challenge is open to U.S. employers of all sizes whose charging stations are, or will be, primarily for employee use. The Challenge also offers benefits to employers who are considering installing charging stations as well as to employers who have already launched a charging program.

Please join us to learn more about this innovative initiative by registering [here](#).
