# Lowe's Partnering with GE to Sell WattStation Residential Charging Stations

# EV Charging Stations at Blue Back Square

Installed by Connecticut Electric Car, a Division of  
Newington Electric Company, <http://ctelectriccar.com/>

# IRP Considerations

- Track electric car adoption and use
- Encourage off-peak charging
- If adoption becomes widespread, consider load impact in light of possible generator retirements
- Consider how to create a regulatory framework which encourages market development while providing necessary consumer protections
