

NORTHERN PIKE decent fish reported from Mansfield Hollow Reservoir, Quaddick Reservoir, and CT River.

CATFISH – Good fishing is ongoing in our [Catfish Management Lakes](#) including; Keeney Park Pond (Hartford), Black Pond (Middlefield), Spaulding Pond (Norwich) and Silver Lake (Meriden).

PANFISH has been excellent this season so far. For some great summer time fun try shore fishing in shallow areas. This simple and inexpensive method is the best way to get into them, small grubs, worms or shiners and bobber will put fish in your creel. Both small local ponds and larger waters work great. Areas reporting action include Wood Creek Pond, Tyler Lake, Lake Hayward, Morey Pond, Peck Pond, Crescent Lake (Southington), West Side Pond, Freshwater Pond, Dog Pond and Zeiner Pond.

TROUT-LAKES & PONDS - Some lakes are still producing fair to good fishing, with reports from Lake McDonough (orange/silver Flash Kings at 7 colors, near outlet), East Twin Lake (Thinfish Copper; Moselook Wobbler blue/silver at 30 feet), Beach Pond (Kobra 114, 18 or 5, rigger at 23' feet), Long Pond (streamers), West Hill Pond (south end), Crystal Lake (Ellington, at 7-8 colors, 40 feet of water) and Highland Lake (second bay, 25-30 feet).

TROUT- RIVERS & STREAMS - Conditions should be fair again this weekend. This week's rain provided a quick "pulse" but with no significant rain in the forecast, flows will drop quickly – *see stream flow graphic on page 3*). Fishing mornings and early evening in the "cooler" trout waters is the best option.

Farmington River - Fishing has been good on the West Branch and conditions should be good for the weekend. Water temperatures are in the mid 60's°F in the upper part of the River and mid to upper 70's in the Collinsville/Unionville section. Flows are clear and moderate (currently 60 CFS at Riverton, with the Still River adding an additional 15 CFS).

Thermal Refuges are Critical

Thermal refuges are places where cold groundwater seeps or drains into a waterbody. These areas have much lower water temperature than the surrounding main waterbody.

Between June 15 and September 15 mainstem water temperatures can be above lethal limits for trout. Refuge area in medium to large rivers like the Naugatuck, Salmon, Housatonic, and Shetucket, are critical for trout to survive the summertime warm water temperatures.

To protect the trout, all fishing is prohibited in and around all refuges as indicated by signage (below). Please do not disturb the trout that are seeking refuge within these areas and report any violations immediately 860-424-3333.

NEW - On Thursday, August 18, due to high water temperatures and low flows, eight thermal refuges where all fishing is prohibited were established on the West Branch Farmington River and the Farmington River. These areas are at the mouths of the following tributaries to the West Branch Farmington and Farmington rivers: East Mountain Brook (Hallock Brook, New Hartford), Cherry Brook (Canton), Rattlesnake Hill Brook (Canton), Burlington Brook (Burlington), Hawley Brook (Avon), Unionville Brook (Unionville), Hyde Brook (Unionville), and Pequabuck River (Farmington) (see page 4 for more details).

Hatches/patterns are a mixed bag of a variety of patterns including Tricos (*Tricorythodes* #22-24 in the morning; started in the mid-section of the river), *Ephemerella needhami* (#22-26, early morning), Leading Coachman (*Isonychia bicolor*, #12-14, fast water, afternoon/evening), Blue Wing Olives (*Drunella* sps. & *Baetis* sps.; #18, 22-24, mid-late afternoon), Caddis (tan #16-20, all day; green #22-26, evening; summer pupa #18-20 morning), Cahills/Summer (*Stenonema ithaca*, #12-14, early morning),

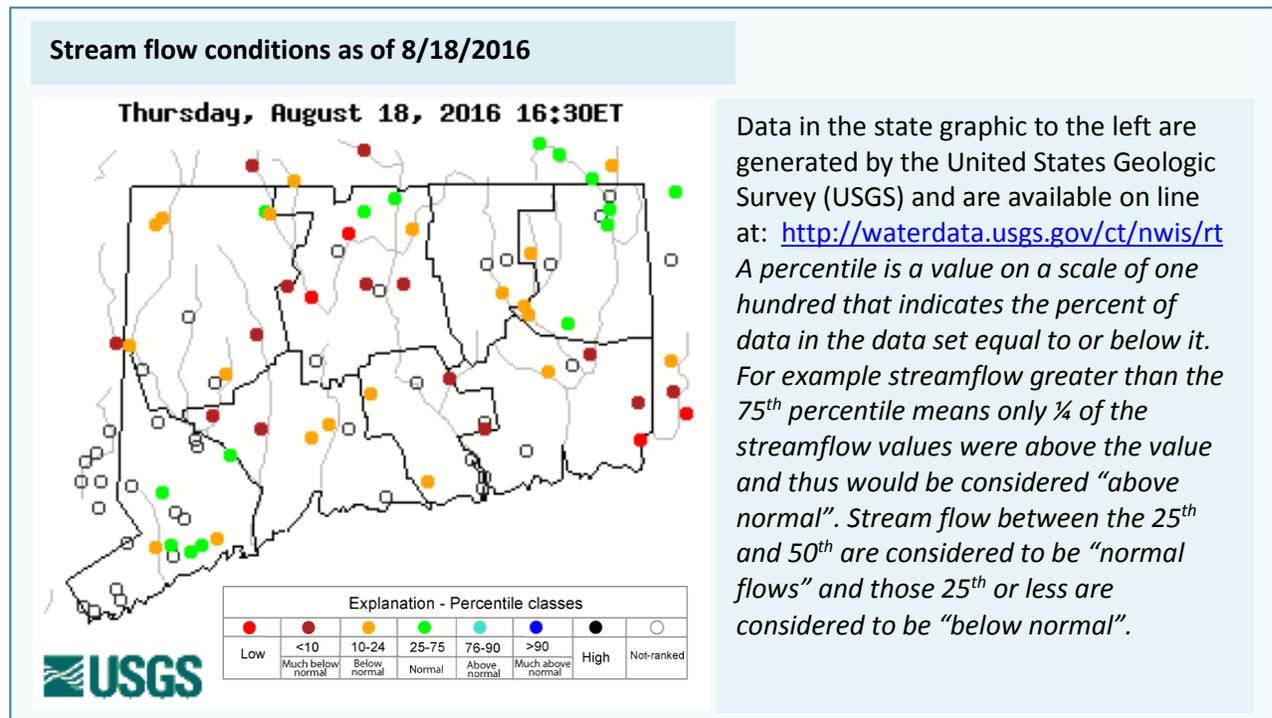

Midges (#22-28, morning), Black Ants (#12-18, mid day in fast water), Black Beetles (#16-18, midday), Flying Ants (#18-22, midday, when windy/humid), Stone Hopper (#8-12, mid-day).

Housatonic River – Overall fishing has been good, and conditions for the weekend should be remain good, especially for Smallmouth Bass. Flows are clear and have increased a bit thanks to this week’s rain, and remain very good for fishing (currently 209 CFS at Falls Village and 255 CFS at Gaylordsville). Morning water temperatures are currently in the mid 70’s °F (and rising through the day).

Light Cahill (#12-14, evening), Isonychia (#10-12), Sulfur (#16-18) and Black caddis (#14-18, early morning & evening). Don’t forget poppers and streamers (morning & evening). Patterns to try include White Zonkers, Wooly Buggers, Muddlers, Grey or Black Ghosts (#4-10). Also try brown crayfish like streamers, they are effective right now.

CONNECTICUT RIVER

LARGEMOUTH BASS are being taken in the coves in the mid to lower river. Last week, **SMALLMOUTH BASS** were caught in the northern river (Windsor & Enfield area). Small to medium size bait were working well. Try 3-4 inch rubber worms on 3/8 ounce football jigs or 2.5 inch paddle tail worms. Surface poppers in that size range can also be effective. **CARP** are being caught in the upper and lower river on pre-baited ‘swims’. Anglers are finding **CATFISH** by night angling in the Hartford to Middletown stretch. Try from just north of Hartford on downstream, fish the outside bends (deep holes are producing as well, try cut bait).

NOTES & NOTICES:

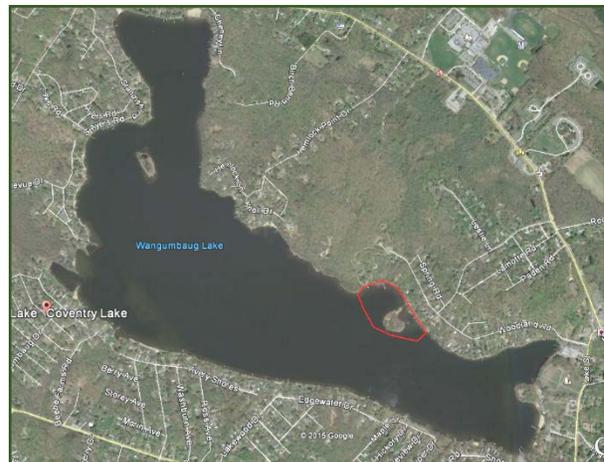

BASHAN LAKE (drawdown). Bashan Lake remains drawn down (slow refill continues – lake currently remains down approximately 4-5 feet – note that refill rate is dependent on rainfall amounts) following dam repairs and the state boat launch remains closed.

BRANFORD RIVER (boat launch). The Branford River state boat launch is currently closed for renovations. This closure is currently expected to last to November 14, 2016. Alternative nearby launch sites include the Guilford Town boat launch and the East River State boat launch, both in Guilford.

CONNECTICUT RIVER (Hartford, dragon boat races). Riverfront Recapture will be holding its annual “**Dragon Boat Races**” on Saturday, August 19 (8 am – 5 pm) with set-up occurring Friday, August 19 (8 am – 5 pm) on the CT River in Hartford between the Founders Bridge and the Charter Oak Bridge. Boat travel through the course area will be difficult during the race events, use extra caution or avoid the area.

COVENTRY LAKE (invasive species alert). Hydrilla, a very highly invasive aquatic plant, has been found growing in Coventry Lake. All lake users should take extra care to check and clean their boats (including canoes, kayaks and rowing sculls), trailers, and fishing equipment before leaving the boat launch, or leaving the lakeshore.

Coventry Lake (Wangumbaug Lake) boaters should avoid the area outlined in red to avoid fragmenting and spreading hydrilla. This is only area in the lake where hydrilla has been found.

DOOLEY POND (drawdown). A drawdown of Dooley Pond to facilitate dam repairs is ongoing (expected to last to September 1). The state boat launch is currently closed.

GLASGO POND (drawdown). A drawdown of Glasgow Pond to facilitate dam repairs is ongoing (began September 2015). Launching of boats is difficult to impossible.

THERMAL REFUGES: NEW - On Thursday, August 18, due to high water temperatures and low flows, eight thermal refuges were established on the West Branch Farmington River and the Farmington River. These areas are at the mouths of the following tributaries to the West Branch Farmington and Farmington rivers: East Mountain Brook (Hallock Brook, New Hartford), Cherry Brook (Canton), Rattlesnake Hill Brook (Canton), Burlington Brook (Burlington), Hawley Brook (Avon), Unionville Brook (Unionville), Hyde Brook (Unionville), and Pequabuck River (Farmington).

There are also thermal refuge areas on the Housatonic, Naugatuck and Shetucket Rivers. All thermal refuges are now closed to all fishing. These areas will all reopen on September 15. There is no fishing within 100 feet of signs indicating such closure at or near the mouths of tributaries to these rivers. Additionally, there is a thermal refuge on the Salmon River in East Haddam, located around a spring entering the Salmon River approximately 220 feet south of the unused paved boat launch at the state-owned property formerly known as the Sunrise Resort off of Route 151. The refuge includes all water within 100 feet from the end of the pipe as posted. The Salmon River refuge is closed to fishing and access through September 15.

GIVE WILDLIFE SOME SPACE we would like to remind everyone to give wildlife appropriate space. Recently human wildlife interactions have been reported with Mute Swans (Lake Zoar) and Beaver (Quinebaug River). Remember- wild animals can be unpredictable.

PHOTO CONTEST: Do you have the next Angler's Guide cover shot? Email us your high quality (high resolution) photos at Deep.inland.fisheries@ct.gov and include [photo contest](#) in the subject line.

CT FISHIN' TIPS is our monthly e-newsletter dedicated to providing information, tips and pointers about fishing in Connecticut. Get CT Fishin' Tips delivered automatically to your in box by subscribing at www.ct.gov/deep/newslettersubscription

NEW! Youth Fishing Passport [Fishing Challenge Scorecard](#): Download the new scorecard for your Youth Fishing Passport Holder on the program web page at www.ct.gov/deep/yfp. Top anglers will receive a great prize pack of fishing gear.

LAKE & POND BATHYMETRIC MAPS

Bathymetric maps of many of Connecticut's public access lakes and ponds can be found online at:

www.ct.gov/deep/lib/deep/fishing/general_information/lakebathymetrymaps.pdf

Both plain line maps and maps overlaying an aerial photo available.

ZEBRA MUSSELS REMINDER

Zebra mussels are now found in a number of locations scattered throughout the Housatonic River and its impoundments including Lake Lillinonah (since 2010), Lake Zoar (since 2010) and Lake Housatonic (since 2011).

Prior to their discovery in Lakes Lillinonah and Zoar in 2010, zebra mussels had been found (1998) in CT only in East Twin Lake and West Twin Lake (Salisbury). Anglers fishing in any of these waters and western Connecticut in general **should use extra care to avoid transporting water, aquatic vegetation, and possibly zebra mussels to new locations.** Information

For more information including precautions that should be taken to prevent the spread of zebra mussels to additional waters, visit www.ct.gov/deep/invasivespecies or the Aquatic Invasive species section of the 2016 CT angler's Guide(www.ct.gov/deep/anglersguide).

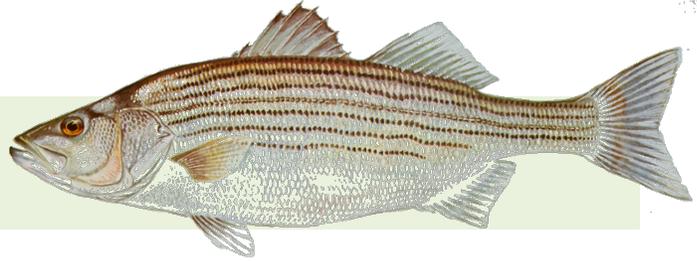

REMINDER TO ANGLERS-

FISHING IN OR CASTING INTO PERMITTED SWIM AREAS IS PROHIBITED.

State regulations prohibit fishing in or into a swim area that's been permitted by DEEP. Additionally, vessels cannot be operated within a permitted swim area, and there's a 100 foot "no-wake" zone around the perimeter. Swim areas that have been permitted by DEEP will be marked by white buoys with orange markings, and there should be a permit number posted on the buoys. They may or may not have small orange barrier floats to further demarcate the area. Should questions arise concerning the validity of the swim area (*no permit numbers or the area appears to have been changed/enlarged or keeps moving*), please contact DEEP's Boating Division at 860-434-8638.

MARINE FISHING REPORT

Surface water temperatures in Long Island Sound (LIS) continue in the upper 70's °F. Check out the following web sites for more detailed water temperatures and marine boating conditions:

<http://www.mysound.uconn.edu/stationstat.html>

http://marine.rutgers.edu/mrs/sat_data/?nothumbs=1

<http://www.ndbc.noaa.gov/>

<http://www.wunderground.com/MAR/AN/330.html>

IMPORTANT NOTES:

NEW SHARK REGULATIONS – EFFECTIVE MONDAY, AUGUST 22, 2016:

Notice to Marine Anglers: An Atlantic Highly Migratory Species (HMS) permit is required to take, possess, or land any shark species, other than smooth or spiny dogfish, in this state.

To obtain an HMS permit visit: <http://www.greateratlantic.fisheries.noaa.gov/aps/permits/> or call NMFS Customer Service Center at (888) 872-8862.

CT Marine anglers may catch Sand Tiger and Sandbar (Brown) Shark which are protected and prohibited species and must be released unharmed.

IF YOU DON'T KNOW, PLEASE LET IT GO! [Coastal shark information.](#)

Connecticut State Boundary Line in Long Island Sound. Anglers please note: Though Connecticut has reciprocity with neighboring states (New York, Rhode Island, Maine and Massachusetts), residents of Connecticut are required to have a CT Resident Marine Waters Sport Fishing License to fish in the Marine District.

WHALES have been reported in Long Island Sound (in early July, juvenile humpback whales have been spotted on the New York side of the sound), please see check [WHALE WATCHING GUIDELINES](#).

Note: All marine mammals are protected by the Federal Marine Mammal Protection Act. Following these recommended operational guidelines helps minimize chances of harassing or injuring whales and violating Federal law. Guidelines apply to all large whales from Maine through Virginia, except North Atlantic right whales. It is illegal to approach a right whale within 500 yards (1500 feet) unless granted specific exemption or authorization.

SEA TURTLES: [See a Tangled Turtle? Call the Hotline!](#) 1-860-572-5955 ext. 107. This is the time of year when leatherback, loggerhead, green, and Kemp's ridley sea turtles return to northern waters, with many sightings around Long Island Sound.

STRIPED BASS fishing remains good during the full 'sturgeon' moon. Live lining bunker (Atlantic menhaden) on the reefs at dawn and dusk still is the best bet for some really large bass. There have been some very impressive schools of bass feeding on the surface on menhaden in the Lower CT River. Striper spots include the Watch Hill reefs, Ram Island Reef in Fishers Island Sound, lower Mystic and Thames River, the Race, Sluiceway, Plum Gut, Pigeon Rip, outer Bartlett Reef, Black Point, the "humps" south of Hatchett Reef, lower Connecticut River, Long Sand Shoal, Cornfield Point, Southwest Reef

(outer), Sixmile Reef, Falkner Island area, the reefs off Branford, New Haven Harbor and the upper reaches, Charles Island area, lower Housatonic River, buoys 18 and 20 off Stratford Point, Stratford Shoal/Middle Ground, Penfield Reef, around the Norwalk Islands, and Cable and Anchor Reef.

Don't have a Boat? Hook up with the many Party or Charter Boats found throughout CT's shoreline from Greenwich to Stonington.

STRIPED BASS ANGLERS FISHING IN RHODE ISLAND WATERS - are advised that the state of Rhode Island has adopted the following regulations pertaining to striped bass. These regulations apply to all Rhode Island state lands and waters including the waters around Block Island: **"Any person recreationally harvesting a striped bass thirty-four (34) inches or larger shall at the time of harvest have the right pectoral fin removed at a point as close to the body of the fish as possible."**

BLUEFISH fishing has been consistent as it should be for this time of year. Larger bluefish weighing in the lower teens have been attacking bunker schools in the lower tidal rivers during dawn and dusk and along most reefs. Eastern sound has seen much better fishing for "alligator" blues. Bluefish fishing spots include the reefs off Watch Hill, the Race, Thames River, Sluiceway, Plum Gut, Pigeon Rip, lower Connecticut River, Long Sand Shoal, Sixmile Reef, Falkner Island area, New Haven Harbor and upper reaches, lower Housatonic River, buoys 18 and 20 off Stratford Point, Stratford Shoal/Middleground, Penfield Reef, and Cable and Anchor Reef. **SNAPPER** fishing has improved in the tidal creeks and rivers with fish measuring now about 4 to 6 inches in length.

BLACK SEA BASS fishing has become a deep water bite. Western Sound anglers should fish near the Norwalk Islands. I highly recommend a [party/charter boat](#) trip to fish off of Block Island...there are many giant-sized sea bass out there. Eastern Sound (Fishers Island to Block Island and northeast of Montauk) anglers are having better success. Fishing is still good on the major reefs in the Eastern Sound. For those willing to travel, Block Island Sound is the place to be for humpback sea bass. Closer to home, the rocky reefs from Madison to Branford have been consistent all season. A reminder to all anglers...if you are fishing in water deeper than 100', barotrauma can cause released fish to struggle to make it back to the bottom. A descending device such as the Shelton Fish Descender can help assist the sea bass air bladder to recompress and get safely back down to the depths. See Fishsmart.org for more information.

SUMMER FLOUNDER (fluke) fishing is fair but you have to put your time in to land legal-sized fish. Still some double digit doormat fluke being caught by lucky anglers in the Eastern Sound. Live lining snapper blues in deep water (80 to 100') is the preferred method by fluke sharpies. The usual summer flounder spots include the south shore of Fishers Island (Isabella Beach, Wilderness Point), Napatree Point and along the beach, off the Stonington breakwater, mouth of the Mystic River over to Groton Long Point, Twotree Island Channel, Black Point/Niantic Bay including the Bloody Grounds, Sound View Beach, Long Sand Shoal, Falkner Island area, New Haven Harbor, off the mouth of the Housatonic River during the flood tide, and around the Norwalk Islands.

SCUP (porgy) fishing is good on the major reefs with hubcap size (15+ inches in length) fish being reported! In the west the Norwalk area is fishing very well. If possible, take a trip to the East, southeast of Block Island (great fishing). Otherwise, some good locations in the west are: the lower Housatonic River to Charles Island, Morningside (Milford), Coast Guard Jetty at Southport Beach, Rick Jetty at Calf Pasture beach, **South Benson Fishing Pier, Sherwood Island, Pleasure Beach Fishing Pier, St Mary's by the Sea** and **Stratford wall along with Long Beach** (excellent shore spots). Other shore spots include **Rocky Neck State Park**, Harkness Memorial State Park, **Meigs Point Hammonasset**, Sherwood Island State Park and **Fort Trumbull State Park**. Fish during the high tide at these shore locations. Locate your favorite [Enhanced Shore Fishing Opportunities](#) for these hard fighting and excellent eating "Reef Slammers".

HICKORY SHAD fishing is good in the Black Hall River/Lieutenant River and the lower Connecticut River (DEEP Marine Headquarters fishing pier). Fishing remains good at Fort Trumbull, Black Hall, Clinton Harbor River systems and the lower Connecticut River (DEEP Marine Headquarters fishing pier). Both snappers and hickory shad can be found schooling together at these locations.

BLUE CRAB fishing is good in all tidal creeks and bays. The more popular spots are still producing but are starting to be “crabbed out”. Plenty of sub-legal crabs...which is a good thing for the future of this fishery. Incoming tide has produced better crab fishing...as the crabs migrate into the shallow water to feed. **Remember...** all egg bearing females must be released **without avoidable injury**. Minimum carapace length is 5 inches for a hard shell crab. **Blue crab fishermen please release all diamondback terrapins’ caught in your traps. The turtles must be released without avoidable injury.** Legal gear types include: scoop (dip) net, hand line, star crab trap, circular (topless) trap not exceeding 26 inches in diameter. Maryland Style Crab traps are prohibited. **Chicken with the skin on it (along with a long handle net) and a small circular crab trap is the preferred method to capture these tasty crabs.** [Blue Crab Fact Sheet](#) *Angler’s please also note: It’s illegal to snag blue crabs.*

GOT A FISHING REPORT - PLEASE EMAIL US AT deep.marine.fisheries@ct.gov

NOTABLE CATCHES:

<i>species</i>	<i>Length (inches)</i>	<i>Weight (lbs)</i>	<i>name</i>
Northern Puffer	7 ½”	C&R	Ryan John Alves
Summer Flounder	32”	12 lb. 8 oz.	Cathy Strzepek
Summer Flounder	31 ¼”	12 lb.	James Johnson
Striped Bass	49 ½”	57 lb. 13 oz.	Albert Zuppe
Bluefish	36 ½”	C&R	Derek Williams
Bluefish	34”	C&R	Nicholas Bourdoulous

For Current Connecticut Recreational Fishing Regulations: Anglers should consult the 2016 Connecticut Anglers Guide which is now available at most Town Clerks Offices, DEEP offices and at tackle stores selling fishing licenses. Current regulations, electronic versions of the Angler’s Guide and additional information can all be accessed on the DEEP website at: www.ct.gov/deep/fishing.
