Gaylord Hospital is the first hospital in Connecticut to receive state funding through a grant from the Connecticut Clean Energy Fund (CCEF) for a solar thermal hot water system.

Gaylord Hospital is the first hospital in Connecticut to install a new solar thermal hot water heating system and is setting an example for healthcare facilities throughout the region.

**PROJECT INFORMATION**

- Cost: $550,000
- 70 Solarus Evacuated Tube solar hot water panels
- 3,750 gallon storage tank
- Reduce the annual hot water needs of the facility by an estimated 65%
- Oil consumption reduced by about 7,000 gallons of fuel oil per year
- An annual emission equivalent of 135,000 pounds of carbon dioxide emissions
