Name of Protocol: Utilizing the Life Skills Inventory

The Life Skill Inventory (LSI) is a valuable tool for the occupational therapist in obtaining preliminary information about a new referral. It should be used in the beginning stages of the transition process, when the receiving agency is determining eligibility for admission into the Young Adult Services Program. Either the occupational therapist or a liaison from the receiving agency should send the LSI to the referring agency. The referring agency should complete the LSI along with the young adult and any other members of that young adult’s treatment team who would be able to provide input regarding independent living skill performance. The entire Inventory should be completed. For example, even if the young adult is not working, the “Job Seeking” and “Job Maintenance” skill sections should be answered as thoroughly as possible.

It is important to note the manner in which each category should be completed. Category A: Money Management and Consumer Awareness, will be used as an example. (see below) The team should start with the items listed in the “Basic” subsection and determine if these are skills that the young adult possesses and exhibits. As indicated, the young person must know three (3) out of the five (5) listed items in order for the team to proceed to check off the next level of Intermediate skills. If the young person only knows two (2) out of the five (5) items in the Basic subsection, then the team skips the rest of the Money Management and Consumer Awareness Category and proceeds to Category B: Food Management. The same procedure is followed for each of the remaining Categories.

Revised December 2006
INSTRUCTIONS
In order to accurately complete the IL assessment, please involve the youth, the Children's Administration social worker, the foster parent or relative caregiver, and any other persons knowledgeable about the skills of the youth.

Scoring should be based on the lowest level of completion. The level of attainment for each youth completing this assessment is the lowest level where they satisfactorily complete the required number of questions. Youth may be highly competent in some areas, but have limited basic knowledge in others. Having basic knowledge in each area is important for long-term success, and plan development should be focused on filling gaps in youth knowledge.

Completing Category 0
It is important for all youth to have a basic knowledge of options for pregnancy prevention. It is not the goal for all youth to reach "Exceptional" in this category, unless the youth (either male or female) is or will shortly be in a parenting role. Abuse and neglect issues are not specifically assessed, but competence at the "Intermediate" level should help youth avoid CPS complaints.

Time frames for completion
All youth should be assessed at age 18. Once you have completed the IL assessment on a youth you do not need to repeat the assessment. All further reporting will be based on the goals of the youth, and their skill level will be indicated by the progress achieved in attaining goals. If the youth remains on the same goal, the skill level doesn’t change.
