Introduction

The Evaluation, Quality Management and Improvement (EQMI) Division at the Department of Mental Health and Addiction Services (DMHAS) is pleased to publish its second Annual Statistical Report. The report provides information about the services the Department provides and the individuals served by our mental health and substance abuse system.

To develop this report, we used data taken from DMHAS' Enterprise Data Warehouse on September 1, 2016.

EQMI receives multiple requests for data from DMHAS staff, providers, legislative groups, researchers and the media. This report makes key information more accessible to departmental stakeholders; it includes data on clients served, demographic characteristics, types of services provided, residential and inpatient utilization, and substance use trends.

Special thanks to all of the EQMI staff and University of Connecticut School of Social Work contractors who assisted with this report. Karin Haberlin coordinated the development of the report, while Kristen Miller, Hsiu-Ju Lin, Jeff Johnson, and Josh Pierce compiled, tested, and analyzed the data. Kristen Miller was responsible for writing the report.

Jim Siemianowski
Director, EQMI

Background

In this report, we summarize clients served and services provided by the Department of Mental Health and Addiction Services (DMHAS) during state fiscal year 2016. These data include clients served in DMHAS funded or DMHAS operated programs. The clients and the services are diverse, and the data is complex.

This report will, at different times, report numbers that refer to different subgroups or events that are based on *specific filtering of the data*. For instance, we frequently filter out programs that are not required to report treatment data when we present information from the Level of Care (LOC) perspective.

We also distinguish between clients and episodes. This distinction is important:

- **Client counts** are unduplicated counts in which each client is counted **once**.
- **Episode counts** represent an *episode of care* to a client – entailing admission, all services received, and discharge. All occur within the context of an episode of care for a client at a particular program.
- Each client may have multiple episodes of care that occur within the fiscal year; thus, the client may be counted **multiple times** – once for each episode, if applicable.
- Thus, **Admissions and Discharges** are reported as **episode counts**, as many clients have multiple episodes.
- In addition, a client may be admitted to/enrolled several programs simultaneously; therefore, *each* admission will be included in the overall Admission count below.

Figure 1 provides a visual representation of the different levels of analysis used in this report.

Figure 1: Levels of Analysis

In each section of the report, there is a brief description of what the counts represent.

The data contained in this report were taken from DMHAS' Enterprise Data Warehouse (EDW) on September 1, 2016. The data warehouse is a dynamic system, so reports or other analyses performed on different dates may produce slightly different results. **The numbers contained in this report are the official DMHAS data for SFY2016.**

DMHAS SFY2016 Annual Statistical Data - Quick Facts

Program Type		N
Mental Health Programs		59,225
Substance Abuse Programs		61,341
Total Unduplicated Count		112,864

Race	N	%
White/Caucasian	72,231	64%
Black/African American	17,712	16%
Other	22,921	20%

Ethnicity	N	%
Latino/Hispanic Identity	23,098	20%

Gender	N	%
Male	66,458	59%
Female	45,809	41%
Transgender	10	0%

Level of Care	Unduplicated Client Count
MH Inpatient	1,428
MH Residential	2,922
MH Outpatient levels of care (see pg. 13)	58,387
SA Inpatient (Detox)	2,717
SA Residential Rehab	11,323
SA Outpatient levels of care (see pg. 16)	55,256

Primary Drug at MH or SA Admission – All SFY16 Active	N	%
Alcohol	30,976	34%
Heroin	30,909	34%
Marijuana/Hashish/THC	11,039	12%

Primary Drug at MH or SA Admission – SFY16 Admissions	N	%
Heroin/Other Opioids	21,319	39%
Alcohol	19,102	35%

Major Diagnosis Categories	N	%
Serious Mental Illness (SMI)	42,186	52.4
SA diagnosis	54,276	67.5
Dual diagnosis (SMI + SA)	22,127	27.5

Most Common MH Diagnosis Categories	N	%
Depressive Disorders	13,172	16.4
Schizophrenia Spectrum and Other Psychotic Disorders	9,679	12.0
Bipolar and Related Disorders	7,351	9.1

Data Summaries

Clients

- During State Fiscal Year 2016 (July 1, 2015 – June 30, 2016), the Department of Mental Health and Addiction Services served **112,864** people.
- **61,341** clients were treated in **Substance Abuse (SA)** programs (53,639 in only SA programs, plus 7,702 who received SA and MH services).
- **59,225** clients were served in **Mental Health (MH)** programs. (51,523 MH only, plus 7,702 MH and SA)
- A smaller group of clients (**7,702**) received services from **both MH and SA** programs during SFY16.¹

Admissions

- There were **107,212 admissions** (each client may have a single or multiple admissions) to DMHAS operated or DMHAS funded programs.
- **70%** of clients had a **single MH program admission** during SFY2016.
- **71%** of clients had a **single SA program admission** during SFY2016.
- There were **14,194** more admissions to Substance Abuse programs than to Mental Health programs.

Discharges

During this same timeframe,

- There were **102,571** discharges from DMHAS operated or DMHAS funded programs. This does not necessarily mean that clients were discharged from the DMHAS system completely, but simply that an episode of treatment within a program ended.
- There were **12,893** more discharges from SA programs than from MH programs.

Open Episodes

Finally, **52,657** episodes of care (covering **44,395** clients) were **open for the entire fiscal year** (admitted prior to SFY16 and not yet discharged by the end of SFY16).

¹ Note that receiving services from both program types does not imply that these clients have a dual diagnosis.

Table 1: SFY16 Episode Counts

Episode Counts	SA	MH	Total
Admission	60,703	46,509	107,212
Discharge	57,732	44,839	102,571
Open*	17,909	34,748	52,657
Total	92,382	98,642	191,024

* Open-episode --started prior to FY16 and not yet discharged by 6/30/16

Table 2: Unduplicated Clients

Unduplicated Clients	SA	MH	Both	Total
Admissions	33,130	24,969	4,221	62,320
Discharges	31,972	25,788	3,957	61,717
Open	16,808	26,836	751	44,395
Unduplicated Clients	53,639	51,523	7,702	112,864

The tables below provide the same basic information as above, but have differentiated the data by Private Non-Profit (PNP) providers and State Operated facilities.

Table 3: PNP vs. State Operated – Episode Counts

Episode Counts	Funding source	SA	MH	Total
Admission	DMHAS Human Services Agreements	56,487	30,733	87,220
	DMHAS-operated	4,216	15,776	19,992
Discharge	DMHAS Human Services Agreements	53,547	29,213	82,760
	DMHAS-operated	4,185	15,626	19,811
Open	DMHAS Human Services Agreements	17,837	27,509	45,346
	DMHAS-operated	72	7,239	7,311

Table 4: PNP vs. State Operated - Unduplicated Clients

Unduplicated Clients	Funding source	SA	MH	Both	Total
Admissions	DMHAS Human Services Agreements	30,951	17,217	2,433	50,601
	DMHAS-operated	844	6,297	257	7,398
	Both	1,335	1,455	1,531	4,321
	Total	33,130	24,969	4,221	62,320
Discharge	DMHAS Human Services Agreements	29,702	17,543	2,262	49,507
	DMHAS-operated	937	6,806	226	7,969
	Both	1,333	1,439	1,469	4,241
	Total	31,972	25,788	3,957	61,717
Open	DMHAS Human Services Agreements	16,740	21,025	666	38,431
	DMHAS-operated	64	4,440	3	4,507
	Both	4	1,371	82	1,457
	Total	16,808	26,836	751	44,395
Total	DMHAS Human Services Agreements	51,439	38,706	5,126	95,271
	DMHAS-operated	811	8,911	258	9,980
	Both	1,389	3,906	2,318	7,613
	Total	53,639	51,523	7,702	112,864

DEMOGRAPHICS OF CLIENTS SERVED

The data presented in the Demographics section includes all clients served by DMHAS. The values represent unduplicated client counts (each client counted once) within program type (SA only, MH only or both SA & MH). The statewide total is a fully unduplicated client count. The narrative will generally discuss the results in terms of SA and MH programs; the counts under the “Both” category are added into the SA and MH counts to include everyone who received SA services or MH services.

Table 5: Gender

Gender	SA		MH		Both		Statewide Total	
	N	%	N	%	N	%	N	%
Female	16,321	30.4%	26,425	51.3%	3,063	39.8%	45,809	40.6%
Male	36,776	68.6%	25,050	48.6%	4,632	60.1%	66,458	58.9%
Transgender	0	0.0%	8	0.0%	2	0.0%	10	0.0%
Unknown	542	1.0%	40	0.1%	5	0.1%	587	0.5%
Total	53,639	100.0%	51,523	100.0%	7,702	100.0%	112,864	100.0%

- Statewide, more males received DMHAS services than females.
- Within MH specific programs, slightly more women than men received treatment (26,425 (51%) and 25,050 (49%) respectively).
- In SA specific programs, however, there were more than twice as many male clients than female clients (36,776 (69%) and 16,321 (30%) respectively).
- Additionally, clients who received both MH and SA services were more likely to be male (60% vs. 40% female). These patterns across program type have been observed since SFY12.

Table 6: Race

Race	SA		MH		Both		Statewide Total	
	N	%	N	%	N	%	N	%
American Indian/Native Alaskan	236	0.4%	291	0.6%	33	0.4%	560	0.5%
Asian	390	0.7%	556	1.1%	30	0.4%	976	0.9%
Black/African American	7,281	13.6%	8,964	17.4%	1,467	19.0%	17,712	15.7%
Native Hawaiian/Other Pacific Islander	98	0.2%	129	0.3%	13	0.2%	240	0.2%
White/Caucasian	35,126	65.5%	32,273	62.6%	4,832	62.7%	72,231	64.0%
More than One Race	733	1.4%	213	0.4%	58	0.8%	1,004	0.9%
Missing/unknown	2,024	3.8%	2,065	4.0%	148	1.9%	4,237	3.8%
Other	7,751	14.5%	7,032	13.6%	1,121	14.6%	15,904	14.1%
Total	53,639	100.0%	51,523	100.0%	7,702	100.0%	112,864	100.0%

- Of the total number of statewide clients served in FY 2016, 64% were White/Caucasian.
- With the addition of the next two largest groups, Black/African Americans and More than One Race (often selected by clients of Hispanic ethnicity who view their race as neither Caucasian nor African American), at 16% and 14% respectively; this accounted for 94% of clients served.
- The distribution of clients by race was very consistent across SA and MH treatment programs. White/Caucasian clients were the most represented in treatment, followed by Black/African American and More than One Race. These patterns have been observed for the past four years.

- According to state census data from 2015, White/Caucasians represent 68.2% of Connecticut residents (reported as “White Alone, not Hispanic or Latino”) and are thus underrepresented in the DMHAS population. Black/African Americans represent 11.6% of CT residents and thus are overrepresented in DMHAS data.²

Table 7: Ethnicity

Ethnicity	SA		MH		Both		Statewide Total	
	N	%	N	%	N	%	N	%
Hispanic-Cuban	156	.3%	97	.2%	18	.2%	271	.2%
Hispanic-Mexican	415	.8%	271	.5%	27	.4%	713	.6%
Hispanic-Other	4,195	7.8%	4,157	8.1%	584	7.6%	8,936	7.9%
Hispanic-Puerto Rican	6,688	12.5%	5,537	10.7%	953	12.4%	13,178	11.7%
Non-Hispanic	38,068	71.0%	38,403	74.5%	5,778	75.0%	82,249	72.9%
Unknown	4,117	7.7%	3,058	5.9%	342	4.4%	7,517	6.7%
Total	53,639	100.0%	51,523	100.0%	7,702	100.0%	112,864	100.0%

- Of the total number of clients served by DMHAS, 21% were of Hispanic/Latino ethnicity; 15.4% of Connecticut residents are Hispanic or Latino, meaning that they are overrepresented in the DMHAS data.
- The largest group of Hispanic/Latino consumers was of Puerto Rican origin (12%).
- Statewide, 73% of clients receiving DMHAS services were not of Hispanic/Latino ethnicity. The distribution of ethnic origin across SA/MH programs was generally equivalent, with slightly more consumers in Substance Abuse programs (+0.8%) being of Hispanic/Latino origin.
- Non-Hispanic clients represented a slightly larger proportion (+3.5%) of mental health clients than substance abuse clients. These patterns have remained consistent for the past four years.

Table 8: Age

Age	SA		MH		Both		Statewide Total	
	N	%	N	%	N	%	N	%
18-25	9,274	17.3%	6,124	11.9%	806	10.5%	16,204	14.4%
26-34	15,612	29.1%	8,426	16.4%	1,956	25.4%	25,994	23.0%
35-44	10,993	20.5%	8,506	16.5%	1,689	21.9%	21,188	18.8%
45-54	9,991	18.6%	12,105	23.5%	2,064	26.8%	24,160	21.4%
55-64	5,583	10.4%	11,074	21.5%	1,063	13.8%	17,720	15.7%
65+	1,244	2.3%	4,762	9.2%	123	1.6%	6,129	5.4%
missing/unknown/errors	942	1.8%	526	1.0%	1	0.0%	1,469	1.3%
Total	53,639	100.0%	51,523	100.0%	7,702	100.0%	112,864	100.0%

- Average age of DMHAS clients is 41.6 years (± 14.47)
- Average age of clients receiving MH services is 45.2 years (± 15.49)
- Average age of clients receiving SA services is 38.1 years (± 12.78)
- Average age of clients receiving **both** MH and SA services is 41.1 Years (± 12.10)

² Data retrieved from <http://www.census.gov/quickfacts/table/PST045215/09> on November 14, 2016.

- Younger clients (up to age 44) were more likely to receive Substance Abuse services, while older clients (45 and over) were more likely to receive Mental Health services.
- Among clients receiving mental health services, the largest age group was 45 to 54 years, while most frequent age group for Substance Abuse clients was the 26 to 34 age range.
- Of clients receiving treatment, few were 65 years or older with the majority of them in Mental Health services. As with other demographics, the age trend patterns have remained steady over the last four years.

LEVEL OF CARE (LOC) DATA

The data presented in the Level of Care section include clients served by DMHAS funded and operated programs that are required to submit treatment data to DMHAS.

- The client counts represent unique (unduplicated) clients.
- The admission and discharge counts are based on episodes of care and represent duplicated client counts – each admission or discharge is counted once, but a client may have multiple admissions and/or discharges.
- To reduce the chance of confusion between unduplicated client count and admission/discharge counts (they all are counts based on clients), the number of clients admitted or discharged are referred to as ‘admissions’ or ‘discharges’ (versus ‘clients admitted’).

Mental Health Inpatient and Residential

DMHAS served four thousand thirty-six (4,036) clients in mental health inpatient and residential programs, with 2,252 admissions and 2,242 discharges during SFY16. The majority (72%) of these clients were in residential LOCs. Please see Appendix A for regional totals.

Table 9: MH Inpatient/Residential LOCs

9a. Active Clients		Total
Forensic MH	Inpatient Services	473
	Residential Services	39
Mental Health	Inpatient Services	955
	Residential Services	2,883

Total MH		2,242

Mental Health Outpatient

- For each LOC listed, we provide the unduplicated client count as well as the (fully unduplicated) total client count for all listed LOCs.
- Clients who received services from more than one LOC are counted in each relevant LOC.

Fifty-eight thousand three hundred eighty-seven (58,387) clients received services in outpatient levels of care. The majority of clients (66%) were served in a Standard Outpatient MH program, followed by Case Management (14%), Crisis (13%), and Social Rehabilitation (11%).

There were 44,257 admissions to MH Outpatient LOCs during the Fiscal Year. The majority of the admissions (56% total) were to standard outpatient (33%) and crisis services (23%). There were also 42,597 discharges during SFY16. Standard Outpatient and Crisis Services had the most discharges (58% total) of all the service types.

Table 10: Mental Health Outpatient LOCs

Total MH		42,597

Substance Abuse Inpatient and Residential

Twelve thousand seven hundred ninety-seven (12,797) clients received Substance Abuse Inpatient and Residential services. Most (88%) of these clients were in the residential LOC. There were 21,981 admissions to SA inpatient or residential programs and 22,123 discharges during this timeframe.

Table 11: Substance Abuse Inpatient/Residential LOCs

11a. Active Clients		Total
Addiction	Inpatient Services	2,717
	Residential Services	11,323
Total SA		12,797

11b. Admissions		Total
Addiction	Inpatient Services	3,699
	Residential Services	18,282
Total SA		21,981

11c. Discharges		Total
Addiction	Inpatient Services	3,696
	Residential Services	18,427
Total SA		22,123

Substance Abuse Outpatient

- For each LOC listed, we provide the unduplicated client count as well as the (fully unduplicated) total client count for all listed LOCs.
- Clients who received services from more than one LOC are counted in each relevant LOC.

Fifty-five thousand two hundred fifty-six (55,256) clients received SA Outpatient services in SFY16. More than a third of clients (41%) were served in an outpatient SA program, followed by Forensic SA community based (consisting of almost exclusively of Pre-Trial Intervention) (34%), and Medication Assisted Treatment (28%).

There were 38,722 admissions to SA Outpatient LOCs during the Fiscal Year. Almost 80% of the admissions were to the three LOCs noted above: Standard Outpatient (35%), Forensic SA community based (Pre-Trial Intervention) services (25%), and Medication Assisted Treatment (18%).

There were also 35,609 discharges during SFY16. Standard Outpatient (38%) and Pre-Trial Intervention services (23%) again had the most discharges (61% total) of all the service types.

Table 12: Substance Abuse Outpatient LOCs

BED CAPACITY AND UTILIZATION

Data for this section were downloaded from the EDW on November 11, 2016. Bed Capacity represents the total number of beds available within a Level of Care.

- DMHAS defines utilization as the number of days each bed is in use during the SFY
- Statewide utilization represents the total number of days each bed is used (sum #days used across all beds) divided by the total number of bed days (# beds * # days in FY)
- For Group Homes, there are 172 beds available, and they were in use by a client 99% of the time
- Bed Utilization by Region data are located in Appendix B.

Table 13: Bed Capacity and Utilization

13a. MH Inpatient	Bed Capacity	State Avg. Utilization
Acute Psychiatric	326	90%
Acute Psychiatric - Intermediate	11	84%
Non-Certified Sub-Acute	16	96%
Forensic MH Acute Psychiatric	232	96%

** Includes only State Operated programs*

13b. MH Residential	Bed Capacity	State Avg. Utilization
Group Home	172	99%
Intensive Residential	100	89%
Supervised Apartments	684	92%
Transitional	51	86%

13c. SA Inpatient	Bed Capacity	State Avg. Utilization
Intensive Res. Rehabilitation 3.8	111	96%
Medically Managed Detox 4.2	41	87%

13d. SA Residential	Bed Capacity	State Avg. Utilization
Intermediate/Long Term Residential Tx 3.5	657	82%
Long Term Care 3.3	50	100%
Medically Monitored Detox 3.7D	128	87%
SA Intensive Res. Rehabilitation 3.7	177	83%
SA Intensive Residential - Enhanced	43	104%
Transitional/Halfway House 3.1	110	93%

PRIMARY DRUG USE

The data in these tables represent the primary drug reported at admission to treatment related programs. Some clients do not report drug use (primarily MH programs), thus they are not included in the data analyses for this section of the report.

These counts do not represent unduplicated clients, as each client may have multiple admissions during the SFY.

- The admission totals in these tables are different from those in the previous section, because these data include *all LOCs* and the previous section pertained only to selected LOCs.
- Table 14 includes active clients – anyone treated during the fiscal year regardless of when they were admitted. Table 15 includes only those clients who had an admission during the fiscal year.

Across all active clients in DMHAS funded treatment related (SA and MH) programs, **alcohol and heroin were tied as the most frequently reported primary drug** (34%) at admission.

Marijuana/hashish/THC was the third most frequently reported drug at 12%; all other drugs were reported as primary at less than 10% of all admissions.

Among admissions to SA programs, **heroin** (46%) was the most frequently reported primary drug. **Alcohol** was reported as the primary drug in 29% of admissions. **Heroin or other opioid drugs account for the primary drug reported for 52% of all SA admissions.**

During admission to MH programs, **alcohol** was reported as the primary drug for almost half of the admissions (46%). The second most frequently reported drug during admission to MH programs was **marijuana/hashish/THC** (18%).

Table 14: Primary Drug at Admission – All Active Clients Who Reported a Drug at Admission

	SA		MH		Total	
	# Admissions	%	# Admissions	%	# Admissions	%
Alcohol	18,144	28.8%	12,832	46.4%	30,976	34.1%
Heroin	29,221	46.3%	1,688	6.1%	30,909	34.1%
Marijuana, Hashish, THC	5,988	9.5%	5,051	18.2%	11,039	12.2%
Cocaine	3,327	5.3%	2,422	8.7%	5,749	6.3%
No Primary Drug Specified	144	0.2%	535	1.9%	679	0.7%
Other Opioids and Synthetics	3,846	6.1%	718	2.6%	4,564	5.0%
Other Substances*	2,235	3.6%	1,301	4.8%	3,536	4.0%
Unknown	157	0.20%	3,137	11.30%	3,294	3.60%
Total	63,062	100%	27,684	100%	90,746	100%

*This category includes benzodiazepines, PCP, amphetamines, hallucinogens, non-prescription methadone, other sedatives or hypnotics, barbiturates, inhalants, methamphetamines, other stimulants, over the counter, tobacco, and tranquilizers.

Table 15: Primary Drug at Admission - New Admissions with Drug Reported

	SA		MH		Total	
	# Admissions	%	# Admissions	%	# Admissions	%
Alcohol	14,858	33.9%	4,244	39.0%	19,102	34.9%
Heroin	18,324	41.8%	867	8.0%	19,191	35.1%
Marijuana, Hashish, THC	4,403	10.0%	2,070	19.0%	6,473	11.8%
Cocaine	2,569	5.8%	963	8.9%	3,532	6.4%
No Primary Drug Specified	58	.1%	124	1.1%	182	.3%
Other Opioids and Synthetics	1,824	4.2%	304	2.8%	2,128	3.9%
Other Substances*	1,732	3.9%	429	3.9%	2,161	3.8%
Unknown	68	0.2%	1,871	17.2%	1,939	3.5%
Total	43,836	100%	10,872	100%	54,708	100%

*This category includes benzodiazepines, PCP, amphetamines, hallucinogens, non-prescription methadone, other sedatives or hypnotics, barbiturates, inhalants, methamphetamines, other stimulants, over the counter, tobacco, and tranquilizers.

Overall, in SFY16, heroin was the most frequently reported drug (35%). *This is the first year in which heroin has been reported more frequently than alcohol across total new admissions.*

When looking specifically at admissions during SFY16 (Table 15 above), the most frequent primary drug reported by clients admitted to SA programs was **heroin** (42%).

- **Alcohol** was the second most frequently reported drug (34%), similar to the pattern seen in SFY15.
- Alcohol continues to be the most frequently reported primary drug at admission to mental health programs (39%).

More active clients reported heroin and other opioids (52%) than were new admissions in SFY16 (46%). This increase is due to the number of clients who stayed in long-term methadone maintenance (Medication Assisted Treatment) programs.

DIAGNOSIS

Diagnosis data come from treatment related programs, and reflect the *most recent primary diagnosis* during the *most recent episode of care* that was open during the fiscal year.

These values represent *an unduplicated client count* within each diagnostic category.

Table 16: Primary Diagnostic Category for Treatment Related Programs³

Note: clients may have more than one primary diagnosis

		Frequency	%
1	Substance-Related and Addictive Disorders	37,852	47.1
2	Depressive Disorders	13,172	16.4
3	Schizophrenia Spectrum and Other Psychotic Disorders	9,679	12.0
4	Bipolar and Related Disorders	7,351	9.1
5	Trauma- and Stressor-Related Disorders	5,212	6.5
6	Anxiety Disorders	3,506	4.4
7	No primary dx or dx deferred or not sufficient info to classify	1,157	1.4
8	Neurodevelopmental Disorders	1,004	1.2
9	Disruptive, Impulse-Control, and Conduct Disorders	602	0.7
10	Obsessive-Compulsive and Related Disorders	348	0.4
11	Personality Disorders	214	0.3
12	Neurocognitive Disorders	123	0.2
13	Other Mental Disorders	44	0.1
14	Feeding and Eating Disorders	39	0.0
15	Gender Dysphoria	30	0.0
16	Somatic Symptom and Related Disorders	27	0.0
17	Other Conditions That May Be a Focus of Clinical Attention	24	0.0
18	Paraphilic Disorders	21	0.0
19	Dissociative Disorders	20	0.0
20	Sleep-Wake Disorders	15	0.0
21	Sexual Dysfunctions	3	0.0
22	Elimination Disorders	1	0.0
	Total	80,444	100.0

³Based on DSM V classification groups, using the most recent primary dx from the latest episode in FY16, unduplicated cases with dx info, N=80,444

Table 17: Serious Mental Illness (SMI) and SA Diagnosis Prevalence

Diagnostic Category	Count	%
SMI	42,186	52.4
SA dis/abuse	54,276	67.5
Dual dx (SMI+SA)	22,127	27.5

- **Just over half of the clients qualify for an SMI (serious mental illness) diagnosis**, which involves having any (or multiple), of the following diagnoses: Schizophrenia (including related disorders), Bipolar Disorder, or Major Depression.
- Two out of three clients (67.5%) have a **substance use/abuse disorder**.
- Just over one quarter (27.5%) of clients qualify for a **dual diagnosis**, meaning that they have both an SMI diagnosis and a substance abuse diagnosis.
- PTSD diagnosis is not included in the SMI count. There were 3,211 clients (4% of 80,444 clients) with a PTSD diagnosis on record.

YOUNG ADULT SERVICES

Young Adult Services (YAS) serves clients who are aged 18-25 with history of DCF involvement and major mental health problems. These data represent unduplicated client counts. Clients are counted as YAS clients as long as they receive any YAS services.

In SFY16, YAS programs served **1,225 clients** (7.5% of total 18-25 DMHAS population). This is a 3.5% increase from SFY15. To provide context, we present client numbers in different DMHAS subgroups below. Client counts are unduplicated within each subgroup, but not across subgroups.

Table 18: Young Adult Clients

ALL 18-25	SA 18-25	MH 18-25	Young Adult Services
16,235	10,962	6,980	1,225

Since FY13, YAS has been collecting information from YAS clients discharged during the fiscal year.⁴

- In FY16, over 59% of discharged clients were living stably in the community, an increase of over 2% from FY15.
- Additionally, almost 50% of clients were able to live independently after discharge.
- Over a third of discharged YAS clients had obtained a high school diploma or GED and more than a quarter were employed.
- Eight percent were considered to responsible parents, and 7% had obtained a driver's license.

Figure 2: Discharge Data for 254 YAS Discharges in SFY2016

⁴ These data were collected through use of the YAS Evaluation Form, which is managed by the School of Social Work at UCONN.
