

NOTICE

Calls to Cell Phones Now Allowed

Calls to your friends and families' cell phones are now permitted.

Global Tel Link is introducing a new Cell Phone Calling program that will allow you to add cell phones to your allowed list of numbers.

In order for you to be able to make calls to the cell phone of a family member or friend, your friend or family member is required to set up a Prepaid Account by calling Global Tel*Link Customer Service at 1-800-231-0193.

For inmate activation, follow these simple steps to start calling your family member or friend's cell phone:

- Request to have the cell phone number of your friend or family member added to your allowed list of numbers
- Call the cell phone after the number is approved and added to your list (this call will fail).
- After your first failed call, your family or friend will be contacted by Global Tel*link to set up a prepaid account.

Once your family member or friend's account is set up you will be allowed to call their cell phone as you normally would.

Note: Due to the technology involved with receiving calls on a cell phone Global Tel*Link cannot guarantee service; no call refunds will be provided on disconnected or prematurely terminated calls.
