Re: National Environmental Policy Act (NEPA) Statutory Checklist

**85 Ridgebrook Dr  
Bridgeport, CT  
Project No. 1403900 -13- 1000**

---

Dear Mr. Folino:

GEI Consultants, Inc. (GEI), at the request of Eagle Environmental Inc. (Eagle), has completed National Environmental Policy Act (NEPA) requirements associated with the rehabilitation of the above-listed property under the HUD-DR Program. GEI conducted a site-visit, reviewed information specific to the proposed, funded rehabilitation activities associated with the property, and completed a NEPA Statutory Checklist. Based on the information gathered, it appears that this project cannot convert to Exempt because one or more statutes/authorities requires consultation or mitigation. Complete lead paint, asbestos, and mold mitigation requirements, publish NOI/RROF and obtain Authority to Use Grant Funds (HUD 7015.16) per ss58.70 and 58.71 before drawing down funds.

The completed NEPA Checklist, photos, environmental database report, and supporting maps and documents are attached.

If you have any questions, please feel free to contact me at 860.368.5408.

Sincerely,

GEI CONSULTANTS, INC.

---

Martin Brogie, LEP  
Senior Consultant

**STATUTORY CHECKLIST [§58.35(a) activities]  
for Categorical Exclusions and Environmental Assessments**

Note: Review of the items on this checklist is required for both Categorical Exclusions under Sec. 58.35(a) and projects requiring an Environmental Assessment under Sec. 58.36. If no compliance with any of the items is required, a Categorical Exclusion [58.35(a)] may become “exempt” under the provisions of Sec. 58.34 (a) (12). In such cases attach the completed Statutory Checklist to a written determination of the exemption. Projects requiring an Environmental Assessment under Sec. 58.36 cannot be determined to be exempt even if no compliance with Statutory Checklist items is found. Three items listed at Sec. 58.6 are applicable to all projects, including those determined to be exempt.

**Project Name and Identification/Location: Owner-occupied Rehabilitation and Rebuilding Program  
Application #2073 85 Ridgebrook Dr., Bridgeport, CT**

Area of Statutory or Regulatory Compliance	Not Applicable to This Project	Consultation Required*	Review Required*	Permits Required*	Determination of consistency Approvals, Permits Obtained*	Conditions and/or Mitigation Actions Required	Provide compliance documentation. Additional material may be attached.
<b>Document Laws and authorities listed at 24 CFR Sec. 58.5</b>							
1. Historic Properties [58.5(a)] [Section 106 of NHPA]	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The State Historic Preservation Office (SHPO) has reviewed the purposed rehabilitation plan (Attachment A - Project Scope). SHPO has determined the property is not eligible for listing in the National Register of Historic Places, and thus, no historic properties will be affected (Attachment B – SHPO Letter 4/21/2014).
2. Floodplain Management [58.5(b)] [EO 11988] [24 CFR 55]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM) for the Site shows the Site is not located within a special flood hazard area. Fairfield County, CT- Map #09001C0427F (Figure 3).
3. Wetland Protection [58.5 (b)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The project site is not located within a wetland according to US Fish and Wildlife Service (USFWS) National Wetlands Inventory Map (NWI; 2012). No impacts to wetlands are anticipated (Figure 4).
4. Coastal Zone Management [58.5(c)] [CGS 22a-100(b)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The project site is not located within the Coastal Jurisdiction Zone based upon the coastal jurisdiction contour/elevation for the City of Bridgeport (2012). No impacts to coastal resources are anticipated (Figure 5).
5. Water Quality – Aquifers [58.5(d)] [40 CFR 149] Clean Water Act 1977 Safe Drinking Water Act 1974	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Rehabilitation does not increase pre-existing footprint of structures. On site water and sewer facilities are not included in rehabilitation work for the project site. CT Department of Energy and Environmental Protection (CTDEEP) Bureau of Water Protection and Land Reuse map titled "Connecticut Aquifer Projection Areas," dated Dec 2013, does not identify aquifer protection areas in the City of Bridgeport, CT (Figure 6). The project site is not located in an EPA Sole Source Aquifer ( <a href="http://www.epa.gov/region1/eco/drinkwater/pc_solesource_aquifer.html">http://www.epa.gov/region1/eco/drinkwater/pc_solesource_aquifer.html</a> ).

Area of Statutory or Regulatory Compliance	Not Applicable to This Project	Consultation Required*	Review Required*	Permits Required*	Determination of consistency Approvals, Permits Obtained*	Conditions and/or Mitigation Actions Required	Provide compliance documentation. Additional material may be attached.
6. Endangered Species [58.5(e)] [16 U.S.C. 1531 et seq.] [CGS 26-310]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	USFWS Information, Planning and Conservation System (IPaC) does not indicate the presence of endangered species or critical habitats on the project site (Attachment C). Program-specific parameters provide that if no sandy beaches are present no further NDDB review is required. Project site is within a suburban neighborhood and is not a waterfront property with a sandy beach (Figure 7).
7. Wild and Scenic Rivers [58.5 (f)] [16 U.S.C. 1271 et seq.]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Eightmile River is the only designated wild & scenic river within program area running through Lyme, Salem and East Haddam, CT (rivers.gov; 2012; Figure 8). Project site is not within one mile of the designated area.
8. Air Quality [58.5(g)] [42 U.S.C. 7401 et seq.]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Residential rehabilitation; will result in no quantifiable increase in air pollution.
9. Farmland Protection [58.5(h)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	US Department of Agriculture Natural Resources Conservation Service (NRCS) mapping indicates the site is underlain by Urban land-Chatfield complex soils (Figure 9). Therefore, the proposed project will not involve the conversion of any prime, unique, statewide, or locally important farmland.
Manmade Hazards: 10 A. Thermal Explosive [58.5(i)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The site is in a residential neighborhood and proposed project will not result in any increase to density.
10 B. Noise [58.5(i)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Proposed project will restore facilities as they existed prior to the disaster.
10 C. Airport Clear Zones [58.5 (i)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The site is outside of any airport clear zone.
10 D. Toxic Sites [58.5 (i)(2)(i)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Site is not listed on EPA Superfund National Priorities or CERCLA List or equivalent State list, is not located within 3,000 feet of a toxic or solid waste landfill, does not have an underground storage tank (which is not a residential fuel tank) and is not known or suspected to be contaminated by toxic chemicals or radioactive materials. Based on attached environmental database report prepared by Ecolog ERIS Ltd. (Attachment D), site inspection, and owner interview.
11. Environmental Justice [58.5(j)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The site is located in a Distressed Municipality based on the CTDECD 2013 List (Attachment E). However, the rehabilitation work at the project site is compatible with the surrounding residential use and no adverse human health and environmental effects on minority or low income population are expected.

**Document Laws and authorities listed at Sec. 58.6 and other potential environmental concerns**

Area of Statutory or Regulatory Compliance	Not Applicable to This Project	Consultation Required*	Review Required*	Permits Required*	Determination of consistency Approvals, Permits Obtained*	Conditions and/or Mitigation Actions Required	
12 A. Flood Insurance [58.6(a) & (b)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Site is not located within a special flood hazard area. FEMA FIRM Fairfield County, CT- Map #09001C0427F (Figure 3).
12 B. Coastal Barriers [58.6(c)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The Site is not located within a designated FEMA FIRM Coastal Barrier Resource Zone. Fairfield County, CT- Map #09001C0427F (Figure 3).
12 C. Airport Clear Zone Notification [58.6(d)]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The site is outside of any airport clear zone. Project does not involve the purchase or sale of a property as such 24 CFR 58.6(d).
13. A Solid Waste Disposal [42 U.S.C. S3251 et seq.] and [42 U.S.C. 6901-6987 eq seq.]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Solid waste disposal provided by the City. Proposed project will not result in an increase in density.
13 B. Fish and Wildlife [U.S.C. 661-666c]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Program activities will not result in impounding, diverting, deepening, channelizing or modification of any stream or body of water; not a water control project.
13 C. Lead-Based Paint [24 CFR Part 35] and [40 CFR 745.80 Subpart E]	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Residential structure at project site was built prior to 1978. The results of Lead Paint Survey are in the Hazardous Material Inspection Report, dated 7/4/2014, prepared by Eagle Environmental Inc. (submitted by Capital Studio Architects along with the Statutory Checklist). The Lead Controls work plan details the work practices to be followed during construction to address lead containing materials at the project site.
13 D. Asbestos	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	The results of Asbestos-containing Material Survey are included in the Hazardous Material Inspection Report, dated 7/4/2014, prepared by Eagle Environmental Inc. (submitted by Capital Studio Architects along with the Statutory Checklist). Asbestos Abatement work plan details the work practices to be followed during construction to address asbestos-containing materials at the project site.
13 E. Radon [50.3 (i) 1]	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The results of Radon Survey are included in the Hazardous Material Inspection Report, dated 7/4/2014, prepared by Eagle Environmental Inc. (submitted by Capital Studio Architects along with the Statutory Checklist). Radon levels measured at the property were below the USEPA action level. No further actions are required.
13 F. Mold	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	The procedures and results of the microbial testing for mold spores are included in the Hazardous Material Inspection Report, dated 7/4/2014, prepared by Eagle Environmental Inc. (report submitted by Capital Studio Architects along with the Statutory Checklist). The Mold and Water Remediation work plan details the work practices to be followed during construction to address water- and mold-impacted materials at the project site.

Area of Statutory or Regulatory Compliance	Not Applicable to This Project	Consultation Required*	Review Required*	Permits Required*	Determination of consistency Approvals, Permits Obtained*	Conditions and/or Mitigation Actions Required	Provide compliance documentation. Additional material may be attached.
Other: State or Local 14 A. Flood Management Certification [CGS 25-68]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	General Permit for CDBG-DR Program activities with CTDEEP in development. However, no Certification will be required based on the location of this site.
14 B. Structures, Dredging & Fill Act [CGS 22a-359 through 22a-363f]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Rehabilitation work at project site does not propose any activity water ward of the coastal jurisdiction line as defined in C.G.S. Section 22a-359(c)
14 C. Tidal Wetlands Act [CGS 22a-28 through 22a-35]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The project site is located above the Coastal Jurisdiction Zone based upon the coastal jurisdiction contour/elevation for the City of Bridgeport (2012). CTDEEP Tidal Wetlands Mapping, as defined in C.G.S. Section 22a-29 and Section 22a-93(7)(e), identifies the project as outside a Tidal Wetland Zone (Figure 5; CTDEEP 1999).
14 D. Local inland wetlands/watercourses [CGS 22a-42]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	No apparent inland wetlands on or adjacent to the site based review of NWI data (Figure 4) and NRCS soils data (Figure 9) as well as field observations. Project rehabilitation work is not expected to impact wetlands/watercourses.
14 E. Various Municipal Zoning Approvals	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	No change of use or building expansion that would require zoning approvals noted.

**DETERMINATION:**

- This project converts to Exempt, per §58.349a)(12), because it does not require any mitigation for compliance with any listed statutes or authorities, nor requires any formal permit or license. Funds may be drawn down for this (now) EXEMPT project; **OR**
- This project cannot convert to Exempt because one or more statutes/authorities requires consultation or mitigation. Complete consultation/mitigation requirements, publish NOI/RROF and obtain Authority to Use Grant Funds (HUD 7015.16) per §58.70 and 58.71 before drawing down funds; **OR**
- The unusual circumstances of this project may result in a significant environmental impact. This project requires preparation of an Environmental Assessment (EA). Prepare the EA according to 24 CFR Part 58 Subpart E.

Re: Earnestine Brown Residence, 85 Ridgebrook Drive, Bridgeport, CT

Dear Lillian,

Pursuant to our field review, assessment, and evaluation of the above mentioned project (application #2073), attached is our Probable Scope of Work and Magnitude of Cost Document.

It is our team's professional assessment that the projected scope of work is appropriate and corresponds to the repair, preventative, and accessibility requirements of the project.

We recommend proceeding with the work. The scope of work includes replacement of the existing asphalt shingle roofing system, and interior gypsum board ceiling repairs and painting (in three areas) for a total projected magnitude of cost of \$13,500.

Pursuant to your review and directive we will prepare the corresponding environmental assessment and will begin preparation of construction documents.

If you have any questions or concerns, please contact me at (860) 289-3262 or [dholmes@capitalstudio.net](mailto:dholmes@capitalstudio.net).

Thank you.

Regards,

David Holmes  
Partner

Residence Rehabilitation App#2073

85 Ridgebrook Drive

Bridgeport, CT

Project Scope & Magnitude of Cost

April 24, 2014

Scope of Work	Magnitude of Cost
<p><b>Re-roofing</b></p> <p><i>Remove and replace asphalt shingle roof assemblies (damaged in event). Provide new corresponding flashings, felts, gutters, ice and water shield, edge metals, and guards. Note: gutters and leaders appear to be in reasonable condition and did not suffer any damage from the storm, so they are not included. Execute this work on the main house.</i></p> <p><i>This is considered repair and preventative work.</i></p>	\$13,500.00
<p><b>Repair deteriorated gypsum board ceilings - 3 areas</b></p> <p><i>Due to the roof leaking, damage to the gypsum board ceilings has occurred in three locations; Kitchen, Living Room and upstairs Bedroom closet. Gypsum board in these three areas needs to be removed, insulation inspected where applicable, and necessary repairs implemented followed by the ceilings being repainted. It is not expected that deteriorated framing members will be discovered.</i></p> <p><i>This is considered repair work.</i></p>	\$2,300.00
<p><b>Total Projected Magnitude of Cost</b></p>	<b>\$15,800.00</b>

Construction estimates are based on a 2014 construction start.

There is no allowance for cost escalation to future years

**Clarifications:**

Interior of the house has evidence of water damage due to infiltration. Owner stated that this is a result of the storm event. Areas of the roof are covered in tarps. It is not conclusive that the damage/leaks are a result of the storm, however it is likely and the owner is adamant that the storm caused the leaks. There was no evidence that roof shingles were missing, possibly due to the temporary tarps.

The roof shingles, in general have reached the end of their useful life.

It is unlikely that a contractor would guarantee repairs, without the entire roof being replaced.

The correct method would be to replace the entire roofing system, and that is what is estimated.

Photo included for reference.

**Note:**

This project will require, hazardous materials assessment and potential abatement/remediation. If remediation is required, that work is **not** included in this preliminary estimate of probable costs.

**Statement:**

Please be advised it is our team's professional assessment that we cannot confirm that the above mentioned work is required to correct damage resulting from the storm event, but that it is possible that damage did occur. Certainly, if this issue is not addressed damage will result out of similar future storms. If the leaks are not corrected, further damage/deterioration will occur.

This assessment was prepared by David Holmes, Principal of Capital Studio Architects.

If you have any questions, concerns, or require additional clarification regarding this matter, please do not hesitate to call me or email me at 860-289-3262 or [dholmes@capitalstudio.net](mailto:dholmes@capitalstudio.net).

Subject: Department of Housing Superstorm Sandy Reviews  
85 Ridgebrook Drive  
Bridgeport, CT

Dear Ms. Delaire:

The State Historic Preservation Office has reviewed the information submitted for the above-named pursuant to the provisions of Section 106 of the National Historic Preservation Act of 1966. It is the opinion of this office that the property located at 85 Ridgebrook Drive is not eligible for listing on the National Register of Historic Places.

Based on the information provided, no historic properties will be affected by the proposed rehabilitation of 85 Ridgebrook Drive.

This office appreciates the opportunity to have reviewed and commented upon the project.

For further information please contact Laura L. Mancuso, Environmental Review Coordinator, at (860) 256-2757 or [laura.mancuso@ct.gov](mailto:laura.mancuso@ct.gov).

Sincerely,

Daniel T. Forrest  
Deputy State Historic Preservation Officer

Consultation Tracking Number: 05E1NE00-2014-SLI-0302

May 29, 2014

Project Name: 2073 - Brown

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project.

## To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having

similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan ([http://www.fws.gov/windenergy/eagle\\_guidance.html](http://www.fws.gov/windenergy/eagle_guidance.html)). Additionally, wind energy projects should follow the wind energy guidelines (<http://www.fws.gov/windenergy/>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm>; <http://www.towerkill.com>; and <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

## Endangered Species Act Species List

There are a total of 0 threatened, endangered, or candidate species on your species list. Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Critical habitats listed on the **Has Critical Habitat** lines may or may not lie within your project area. See the **Critical habitats within your project area** section further below for critical habitat that lies within your project. Please contact the designated FWS office if you have questions.

There are no listed species identified for the vicinity of your project.

**Location Description:**

Surficial geology - gravel, composed mainly of gravel-sized particles. Based on recent & historical subsurface investigations, the unconsolidated materials at the subject property consist primarily of fine sand and rock fragments with lesser proportions of fine & medium sand. Bedrock geology - is Carrington's Pond Member of the Trap Falls Formation, an interlayered gray. Rusty-weathering schist and light-gray gneiss. Bedrock is assumed to be greater than 19ft. Bgs, based on a boring advanced to this depth. Bedrock refusal as not been encountered in any borings completed to date. ExxonMobil's lease ended on December 8, 2009. Current lease holder is Alliance Energy LLC

**Work Performed:**

1950: Installation of a 1,000 gallon gasoline UST and two 4,000-gallon gasoline USTs in January. 1983: Installation of one 10,000-gallon gasoline USTs in June. 1984: Installation of two 10,000-gallon gasoline USTs in June. 1987: In September, a gasoline product line failed releasing ~8,000-gallons of product into the environment. Three MWs were installed in November 1987 and free-product was detected in each well. Bailing of free-product from MWs

was done. 1989: Installation of a 1,000-gallon fuel oil UST. 1990: In July, monitoring wells GT-1 through GT-3 were installed at the southbound rest area to intercept a separate-phase and a dissolved-phase plume believed to be migrating beneath the Parkway from the 1987 release. 1994: In December the 1,000-gallon gasoline UST and two 4,000-gallon USTs installed in 1950 were removed along with contaminated soils. Installation and activation of vapor extraction system in November. 1996: Deactivation of SVE system in July. Injection of ORC into MW1, MW5, MW7, GT10 & GT11 on 10/17/96 2007: Excavation and removal of 111.58 tons of soil not suitable for reuse or backfill in December during sewer installation. Subsurface Investigations that included the advancement of 9 soils borings were completed by Kleinfelder in May and June. 2008: In January eight MWs were redeveloped and in February three soil borings were advanced. In June, the three 10,000-gallon gasoline USTs that were installed in June 1983 and June 1984 were removed. During UST removal, ~1092.82 tons of impacted soils were removed and ~112,460-gallons of impacted GW were pumped and treating onsite. 19 confirmation soil samples were collected from sidewalls, endpoints, and bottoms of excavation area. Soils were analyzed for VOCs (EPA 8260) and total and SPLP lead (EPA 6010). Three soil samples had VOCs that exceeded the GA PMC and two samples had SPLP lead that exceeded the GA PMC. Installation of three 10,000-gallon gasoline USTs in June. 2009: A supplemental Phase III investigation report was submitted to the DEP by Kleinfelder in February. GW samples collected in February, March, and August were all below the GWPC and only 3 of the 16 MWs sampled had detectable amounts of BTEX in them. Spills Files, UST Enforcement Files, Cleanup Fund Files, Remediation Files, and LUST Files

Open LUST Cases:

**Follow Up:**

F51-09949 (1987 release) is linked to CF 174  
 1987 release - Bailing of free-product from the MWs were done in 1987, installation of a SVE from 1994 to 1996, injection of ORC in 1996, GW monitoring. Investigations revealed impact to the west-southwest portion of the Southbound Rest Stop.

**Release Info:**

2008 release - excavation of soils and GW monitoring  
 CF 174: Release of ~8,000-gallons of gasoline from a failed line reported in September 1987. Impacted extend off iste and free-product was detected on the southbound side in 1990. 2008: In June, the three 10,000-gallon gasoline USTs that were installed in June 1983 and June 1984 were removed. During UST removal, ~1092.82 tons of impacted soils were removed and ~112,460-gallons of impacted GW were pumped and treating onsite. 19 confirmation soil samples were collected from sidewalls, endpoints, and bottoms of excavation area. Soils were analyzed for VOCs (EPA 8260) and total and SPLP lead (EPA 6010). Three soil samples had VOCs that exceeded the GA PMC and two samples had SPLP lead that exceeded the GA PMC.

**Comments:** Kleinfelder East Inc. has been retain by ExxonMobil Oil Corp. to provide environmental oversight service during the removal & replacement of (USTs) at the above referenced property. The UST replacement activities are scheduled to begin in May 2008. The work will be conducted in accordance with the CTDEP UST Regulations 22a-449(d)-107. The following USTs and associated equipment will be cleaned, vented (as applicable) and removed from the subject property in accordance with (NFPA) Code 30 & American Petroleum Institute guidance documents:  
-Three 10,000 gallon gasoline UST  
-Two gasoline product dispensers  
-Associated product piping, including vent lines  
Underground Storage Facility Notification forms (EPHM-6) will be completed to reflect that the current site USTs have been removed, and will note the construction details of the USTs to be installed. The forms will be submitted to the CTDEP upon completion of the work.

**Comments:** Kleinfelder: June-August 2008; Kleinfelder personnel oversaw Martin Drilling advance 3 soil borings (SB-300 through SB-302) 2 of which were completed as GWMWs (MW-300 S/D & MW-301) on May 27 & Jue 5, 2008. From June 17 through July 23, 2008, Kleinfelder personnel were on-site to observe the removal & replacement of 3 10,000 gal gasoline USTs by Petroleum Eng., Inc. During UST removal & replacement activities, 500 gals of gasoline-groundwater rinsate was evacuated from the UST's, 1092.82 tons of petroleum impacted soil & 366.03 tons of non-impacted soil were removed from the site. A dewatering system was set up on-site to remove GW from the UST grave prior to installing the gasoline USTs. Approx. 112,460 gals of petroleum impacted GW was removed, treated and discharged to Mill River behind the southbound station property. Approx 1050 tons of clean 3/8" stone was brought in nad used as backfill in the UST grave. Conducted slug testing at 3 GWMWs (MW-108, MW-202, MW-301) on July 31, 2008. Gauged 16 & sampled 10 MWs on August 6, 2008. 6 wells were destroyed during tank excavation activities & were not sampled on August 6, 2008. 3 GW samples were collected in accordance with CTDEP guidance document for low-flow sampling. Conducted a total station survey on August 6, 2008..

**Comments:** Kleinfelder: January-February 2008; January 8, 2008, Kleinfelder oversaw the installation of the force main sewer line piping via horizontal drilling by Hemlock Directional Boring, Inc. Kleinfelder personnel redeveloped 8 MWs on 1/22 & 23/08. Kleinfelder responded to an emergency response on 2/9/08. The site attendant informed Kleinfelder that a spill occurred at dispenser #4. Near by storm water catch basins and the dispenser pump were screened with a (PID). No significant PID readings were achieved. Gauged & sampled 16 MWs on 2/27/08. 9 samples were collected in accordance with CTDEP guidance document for low-flow sampling. Gauged & sampled 2 MWs on 3/5/08. The samples were collected for a surface water discharge permit related to future UST removal activities. Feb. 27, 2008, Kleinfelder oversaw a private utility mark-out performed by Hager-Richter Geoscience of Salam, New Hampshire. On March 11 & 12,2008, Kleinfelder oversaw the advancement of 3 soil borings by Martin Drilling of Belchertown, Mass, Soil samples were collected from each boring location for waste disposal classification purposes related to future UST removal & replacement activities. No significant impact was observed during drill activities.

**Comments:** Kleinfelder: Oct.-Dec. 2007; On Nov.7, 2007, Kleinfelder oversaw a private utility mark-out performed by Hager-Richter Geoscience of Salem, New Hampshire. On Nov.8, 9, 2007,

Kleinfelder oversaw the advancement of 8 soil borings by Glacier Drilling of Durham, CT. Soil samples were collected from each soil boring for waste disposal classification purposes related to future trenching activities for the upgrade of the on-site forced sewer main. No significant impact was observed during this activity. From November 12-17, 2007, Kleinfelder oversaw trenching for the sanitary force main sewer line installation conducted by M & A Construction Co., Inc, of Farmington, CT. Approx. 111.58 tons of soil not suitable for reuse or backfill was removed from site on Dec.17, 2007 by SRS of Southington, CT. and transported to Ted Ondrick Construction Co. for recycling. On November 12, 2007, Kleinfelder oversaw the abandonment of select MWs, determined to be no longer viable, by Martin GeoEnvironmental. November 26 & 27, 2007, Kleinfelder oversaw LaMountain Bros., Inc., during the excavation of a portion of the concrete pad located over the gasoline USTs. These activities were completed in an effort to evaluate the status of the USTs. Gauged and sampled 8 MWs on Dec.18, 2007. 3 samples were collected in accordance to the CTDEP guidance document for low-flow sampling.

**Comments:** Tank Excavation Assessment Report, Mobil Service Station No. 01-FBH (J. Bey, T. Franco,

and L. Smith) Kleinfelder: Removal of three 10,000-gallon gasoline USTs and associated piping and dispensers. All three USTs were dismantled before being removed so their condition of USTs were observed to be fair, but it is not entirely sure. ~1,092.82 tons of petroleum-impacted soil and pea stone were removed from site. ~112,460 gallons of petroleum-impacted GW were treated and discharged per DEP permit. A total of 19 confirmation soil samples were collected from the excavation areas (UST, dispensers, and piping). All samples were analyzed for VOCs (EPA 8260) and lead (total and SPLP). Three soil samples has VOCs that exceeded the GA PMC, but all were below the Res DEC. Two soil samples from the dispenser/piping areas has SPLP lead above the GA PMC.

**Comments:** Phase III ESA (Zackary Smith, Laurie Smith, Eric Henry) Kleinfelder: Investigation done to further delineate the extent of impact in soil and groundwater in the RECs on site. 4 soil borings were advanced in June 2007 and were completed as monitoring wells. 8 soil samples were collected and analyzed for AVOCs and MTBE (EPA 8260), PAHs (EPA 8270), total lead (EPA 6010) and ETPH (CT ETPH). 7 soil samples had detectable COCs. The detected COCs were above GA PMC in 2 samples. A total of 17 monitoring wells were sampled on June 28, 2007. Groundwater samples were analyzed for AVOCs and MTBE (EPA 8260), PAHs (EPA 8270), total lead (EPA 6010) and ETPH (CT ETPH). 9 GW samples had detectable COCs. The detected COCs were above GWPC in MW-108, 200, 202, 203D, and 203S.

**Action:** Phase II Environmental Site Assessment  
**Date Issued:** 25-OCT-07  
**Date Due:**  
**Date Received:** 01-SEP-10  
**Comments:** Phase II ESA (Daryl VanVranken, Laurie Smith, Eric Henry) Kleinfelder: Phase II was conducted in 2006 in order to assess the presence or absence of COCs in RECs identified in the Phase I. COCs were identified through soil and groundwater analysis in the former and current gasoline dispenser area, the current fuel-oil UST area, the former gasoline UST and remote fill area, and the historical fuel oil UST area. More investigation is needed to further delineate the contamination.

**Action:** Report of Petroleum or Chemical  
**Date Issued:** 01-FEB-11  
**Date Due:**  
**Date Received:** 01-FEB-11  
**Comments:** Report of Petroleum or Chemical Product Discharge, Spillage or Release (S. Rising) ECS: On January 31, 2011, ~0.25 gallons of gasoline were released onto the concrete ground surface when the automatic shut off valve on the nozzle failed while a customer was fueling their vehicle. There was no apparent release to subsurface soils or GW. Release was cleaned up by site personnel with speedy dry and dispenser shut down and bagged off. A contractor made the necessary repairs. ECS personnel indicated release was cleaned up completely.

**Action:** Corrective Actions Report  
**Date Issued:** 24-JUN-11

**Date Due:**  
**Date Received:** 19-JUL-11  
**Comments:** Incident Closure Report (R. Kelly) Lessard Environmental, Inc: On May 28, 2011, ~2 gallons of gasoline was released when the transfer hose disconnected from the UST fill port. The hose was not properly drained at the time a product was released on to the asphalt surface and the spill bucket. Soils and GW were not impacted by this release. TMC was contracted and they applied granular absorbents to the surface area of the release. Spent absorbents were swept up and drummed for proper disposal. Consultant indicates that release has been remediated and no further action is necessary.

--  
**Action:** Remedial Action Plan (RAP)  
**Date Issued:** 08-JUL-11  
**Date Due:**  
**Date Received:** 20-JUL-11  
**Comments:** Remedial Plan (Aaron Silva, Thomas Motsko, and Samuel Haydock) BL: Various remedial alternatives were considered to address remaining contamination at the site. The remedial options included groundwater pumping and treatment, soil excavation and dewatering with offsite disposal, soil vapor extraction with air sparging, multiphase high vacuum extraction, in-situ chemical oxidation, and monitored natural attenuation. A detailed evaluation of soil excavation, AS/SVE, and MNA was done. Consultant recommends performing soil excavation followed by MNA and possible AS/SVE if needed. Consultant also recommends additional characterization in REC-2, 3, and 6 during planned remediation and construction activities. Consultant estimates approximately 1,140 tons of contaminated soil will be removed from the site. Demolition of site structures is tentatively planned for November 2011, remedial excavation for December 2011, installation of the AS/SVE system for January 2012, and final grade construction and repair in March 2012. Paul Clark is currently reviewing the plan.

**GW Direction:**

**Location Description:** Currently owned by CT DOT and leased to ExxonMobil since 1982. Bedrock is assumed greater than 19 feet bgs. Surficial geology in the vicinity of the sub. property is described on the Surficial Materials Map of Connecticut (Stone, et, al 1992) as alluvium overlaying undifferentiated coarse deposits. The underlying bedrock is described in the Bedrock Geological Map of Connecticut (J.Rodgers, 1985) as a Carrington's Ponds Member of the Trap Falls Formation, an interlayered gray, rusty-weathering schist and light-gray gneiss. Based on recent & historical subsurface investigations, the unconsolidated materials at the subject property consist primarily of fine sand & rock fragments with lesser proportions of fine gravel & medium sand. Bedrock is assumed to be greater than 19ft. bgs., based on a boring advanced to this depth. Bedrock refusal has not been encountered in any borings completed to date on this property.

**Work Performed:** 1937: Property owned by CT DOT. 1940s: Installation of one 4,000-gallon gasoline UST and two 2,000-gallon gasoline USTs and associated dispensers. 1950s: The 4,000-gallon gasoline and two 2,000-gallon gasoline USTs that were installed in the 1940s were abandoned and a 4,000-gallon gasoline UST and two 5,000-gallon gasoline USTs that were to be installed. 1977: In August, a installation of a 8,000-gallon gasoline UST and that replaced the 4,000-gallon gasoline UST installed in the 1950s. There may have been 3 other USTs installed in 1977. 1982: ExxonMobil lease property. 1987: In July, A Well Completion Report, detailing a private well that was drilled at 18 Mill Road in Easton, less than ¼-mile west (crossgradient/downgradient) of the subject property. 1989: In May, the 8,000-gallon gasoline

UST installed in 1977 and the two 5,000-gallon gasoline USTs installed in 1950s were removed along with ~ 500 cubic yards of contaminated soil. In August, one 1,000-gallon fuel-oil UST, two 10,000-gallon gasoline USTs, and one 12,000-gallon gasoline UST were installed on site. 1990: In July, GTI installed monitoring wells GT-1 through GT-3. The purpose of this well installation was to intercept a separate-phase and a dissolved-phase plume believed to be migrating beneath the Parkway, originating from the northbound station (01-FBH) 1991: In June, GTI installed monitoring wells GT-5 through GT-9. In October, LNAPL was detected in GT-3. In November, GT-13 and GT-14 were installed. 1993: In October, a SVE system was installed on site. In November, GTI oversaw the removal of three gasoline USTs that are assumed to be abandoned in 1950 and were installed in the 1940s (spill case #0093-05993). During removal one UST was damaged and ~100 gallons of product was released into the tank grave. 1996: The soil vapor extraction (SVE) system was shut off on July 23, 1996 for removal and removed in 1998: In May, a customer overflow of 1 gallon gasoline occurred. 2006: In September, Kleinfelder completed a Phase I ESA in which 6 RECs were identified for the subject property. 2007: In October, Kleinfelder completed a Phase II ESA to investigate the 6 REC identified in 2006. A total of 16 soil borings were advanced with 8 completed as MWs. A total of 32 soil samples were collected and analyzed VOCs (EPA 8260), SVOCs (EPA 8270), total and SPLP Lead (EPA 6010), and/or ETPH (CT ETPH). GW samples were collected from the 8 new MWs and were analyzed for VOCs, SVOCs, lead, and/or ETPH. Two soil samples (SB-114 and SB-107) had 6 or less COC above the GA PMC, but all COCs were below the I/C DEC. 4 GW samples had VOCs and/or ETPH above the GWPC, but all COCs were below the I/C volatilization criteria. Conclusion of report found data gaps in delineation of impacts in all six REC. 2008: In February, Kleinfelder completed a Phase III ESA to investigate the data gaps identified in the Phase II investigation. A total of 4 soil borings were advanced with 2 completed as MWs. A total of 6 soil samples were collected and analyzed VOCs (EPA 8260), SVOCs (EPA 8270), total and SPLP Lead (EPA 6010), and/or ETPH (CT ETPH). GW samples were collected from the 3 new MWs and 11 pre-existing MWs and were analyzed for VOCs, SVOCs, lead, and/or ETPH. All COCs were below both the GA PMC and Res DEC. 7 GW samples had VOCs and/or ETPH above the GWPC, but all COCs were below the I/C volatilization criteria. Conclusion of report found data gaps in delineation of SVOCs, VOCs in three REC, and possible impacts beneath the site structure. 2009: Groundwater monitoring results show the following MWs with benzene, 1,2,4-TMB and/or 1,3,5-TMB above the GWPC: GT-3 (Feb. only), MW-105, MW-106, MW-103, MW-105, MW-106, MW-108, and MW-200. All VOCs were below the I/C volatilization criteria. Elevated VOCs were detected in soil vapor samples in November. ExxonMobil's lease of property ended on December 8th, Alliance Energy is the new leasee. Paul Clark's Desk, DOT Cabinet, CF Files, Spills Files

Phase I Environmental Site Assessment Mobile Service Station No. 01-109 (R. Stevenson and L. Smith) Kleinfelder: Phase I was completed to provide background information of site and to establish future actions. Identified 6 areas that may have been impacted:  
1: Current, former and historic gasoline UST area and associated piping (located northeast of the station building)  
2: Current and former dispenser area (located east of the station building)  
3: Current and former fuel-oil UST area (located northeast of the station building)  
4: Historic gasoline UST area (located east of the station building)  
5: Historic fuel-oil UST area (located beneath the current station building)  
6: Historic gasoline UST fill area (located adjacent to the former/current fueloil UST)

Water well survey indicates that 7 USGS water wells are located between ¼ mile and 1 mile from site. There are 4 private potable water wells within 1 mile from site. A phase II investigation was recommended.

**Comments:** Phase II Environmental Site Assessment Mobile Service Station No. 01-109 (D. VanVranken, L. Smith, and E. Stoetznner) Kleinfelder: Identified 6 areas that may have been impacted during Phase I:  
1: Current, former and historic gasoline UST area and associated piping  
2: Current and former dispenser area  
3: Current and former fuel-oil UST area  
4: Historic gasoline UST area  
5: Historic fuel-oil UST area  
6: Historic gasoline UST fill area  
16 soil borings were advanced in the areas of concern, at least one soil sample was collected from each boring and analyzed for VOCs (EPA 8260), SVOCs (EPA 8270), lead (total and SPLP), and ETPH (CT ETPH). Eight of the borings were completed as MWs. GW samples were collected for analyses of VOCs (EPA 8260), SVOCs (EPA 8270), lead (total), and ETPH (CT ETPH). COCs were detected in all 7 areas of concern. Only Area #5 reached the RSRs. Significant Data Gaps exist and the impacts to soil and groundwater in Areas 1, 2, 3, 4, and 6 have not been fully delineated.

**Comments:** Kleinfelder:Kleinfelder oversaw a private utility mark-out performed by Hager-Richter Geoscience of Salem, New Hampshire. Nov. 8 & 9, 2007, Kleinfelder oversaw the advancement of 7 soil borings Glacier Drilling of Durham, CT. Soil samples were collected

from each soil boring for waste disposal classification purposes related to future trenching activities for the upgrade of the on-site forced sewer main. No significant impact was observed during this activity. On Nov.12, 2007, Kleinfelder oversaw the abandonment of select MWs,, determined to be no longer viable, by Martin Geoenvironmental of Belchertown, Mass. On Nov.30 & Dec.3-7 & 12, 2007, Kleinfelder oversaw treching for the sanitary forced main sewer line installation conducted by M & A Construction Co. Inc. of Farminton, CT. Approx. 114.34 tons of soil not suitable for reuse or backfill was removed from site on Nov.30, 2007 by Soil Recovery Services of Southington, CT and transported to Ted Ondrick Construction Co. in Chicopee, Mass. For recycling. Gauged and sampled 13 GMMWs on Dec.27, 2007. 5 samples were collected in accordance with the CTDEP guidance document for low-flow sampling.

**Comments:**

Kleinfelder completed a Phase III ESA at Mobil Service Station No. 01-109 located on the Merritt Parkway SB in Fairfield, CT. The investigation was conducted from May 27 - June 5, 2008, to evaluate data gaps associated with REC-1 through REC-4 & REC-6, identified in the Phase III ESA completed by Kleinfelder in February 2008.  
The results of the investigation suggest the following:  
>LPH was detected in wells MW-101, MW-201S, & MW-201D however the relatively low dissolved concentrations historically detected in these wells are inconsistent with an occurrence of LPH. These wells should be resampled to verify this finding.  
>The results of soil vapor samples collected from the vicinity of the on-site building indicate that some compounds were present at concentrations within 10% of the proposed SVVC. Additional samplings is recommended to confirm that COCs are not present above RSR criteria in soil vapor.  
>The REC-1, 2, 4 & 6 release areas have been substantially delineated.  
The REC-3 release area has been delineated to the east & south however delineation to the west is incomplete due to the steep slope behind the station building & heavy traffic on Congress Street.  
>The downgradient extents of the GW plume emanating from REC-1 appear to be substantially delineated.  
>The GW plume emanating from REC-2 & 4 have been defined to the east & west however downgradient delineation is incomplete due to the steep slope behind the station building & heavy traffic on Congress Street.  
>The GW plume emanating from REC-3 & 6 have been defined to the north & east however downgradient delineation is incomplete due to the steep slope behind the station building & heavy traffic on Congress Street.

**Comments:** ExxonMobil Corporation Site Status Report. (Laurie Smith and Harley Langford). Kleinfelder: Soil vapor monitoring points were sampled and groundwater monitoring was done from December 2009 through March 2010. A total of 20 monitoring wells were gauged and 16 were sampled on February 12, 2010. 2 soil vapor samples were taken on December 31, 2009 and 5 on March 9, 2010. Groundwater samples were analyzed for VOCs (EPA 8260) and soil vapor samples were also analyzed for VOCs. 9 GW samples had detectable COCs. The detected COC<sub>2</sub>s were above the GWPC in wells MW-105, MW106, and MW-200. 5 soil vapor samples contained detectable COCs, and the COCs were above Res SVVC in sample SV-303.

**Comments:** Site Status Update Report (L. Smith and H. Langford) Kleinfelder: September-November 2009: Kleinfelder personnel conducted spilt sampling activities with Diversified Technology Inc during November. 20 MWs were gauged, 16 MWs were sampled, and 5 soil vapor monitoring points were sampled on November 24th. GW samples were analyzed for VOCs (EPA 8260B) and soil vapor were analyzed for VOCs (TO-15). SV-302 and SV-303 had VOCs above the Res Volatilization criteria and SV-303 had benzene (41,000 ppb) that exceeded the I/C volatilization criteria, but is below 30 x I/C V/C. During the November sampling, MW-103, MW-105, MW-106, MW-108, MW-200 had total xylenes, benzene, n-propylbenzene, 1,2,4-TMB and/or 1,3,5-TMB above the GWPC. All VOCs were below the I/C volatilization criteria for both GW samples.

**Action:** Remedial Action Plan (RAP)  
**Date Issued:** 08-JUL-11  
**Date Due:**  
**Date Received:** 20-JUL-11  
**Comments:** Remedial Plan (Aaron Silva, Thomas Motsko, and Samuel Haydock) BL: Remedial options considered to address remaining contamination at the site included groundwater pumping and treatment, soil excavation and dewatering with offsite disposal, soil vapor extraction with air sparging, multiphase high vacuum extraction, in-situ chemical oxidation, and monitored natural attenuation. A detailed evaluation of soil excavation and AS/SVE was done. Consultant recommends performing soil excavation followed by AS/SVE. Consultant also recommends additional characterization in REC-2, 3, 5, 6, and the service plaza building during planned remediation and construction activities. Soil excavation would be done in REC-2, 3, 6, and possibly 5 and an estimated 1,275 tons of contaminated soil would be removed. Demolition of site structures is planned for November 2011, remedial excavations for December 2011, installation of AS/SVE in January and February 2012, and final grade construction and repair and start of AS/SVE operation in March 2012. Paul Clark is currently reviewing the plan.

**Date Due:**

**Date Received:** 26-JUN-13

**Comments:** Report of Petroleum or Chemical Product Discharge, Spillage or Release (S. Rising) ECS: On May 9, 2013, ~3 gallons of gasoline was released onto the concrete ground surface when a customer overfilled their car gas tank. There was no apparent release to subsurface soils or GW. Release was cleaned up by FFD with speedy dry. ECS personnel indicated release was cleaned up.

**Action:** Ground Water Monitoring Report  
**Date Issued:** 12-SEP-08  
**Date Due:**  
**Date Received:** 18-SEP-08  
**Comments:** Kleinfelder: June-August 2008; Kleinfelder personnel oversaw Martin Drilling advance 4 soil borings , 1 of which was completed as a GWMW and installed 5 soil vapor monitoring points from May 27 though July 5, 2008. Conducted a total station survey on June 18, 2008. Conducted slug testing at 3 MWs on July 30, 2008. Gauged 16 & sampled 13 GWMWs on August 6, 2008. 3 samples were collected in accordance to CTDEP guidance document for low-flow sampling. LPH was detected in 3 MWs (MW-101, MW-201 & S/D) with an (EIP) during well gauging activities. Subsequently, GW samples were not collected from these wells.

**Action:** Tank Closure Assessment Report  
**Date Issued:** 14-JUN-89  
**Date Due:**  
**Date Received:** 14-JUN-89  
**Comments:** Tank Closure Report (E. Henry and S. Bristol) Groundwater Technology, Inc.: Between November 3rd and 5th of 1993, three gasoline USTs were removed from site. One gasoline UST was cracked by the excavator during removal releasing product into the surrounding soils. Tyree Environmental utilized a vacuum truck to extract free-product from the grave. ~20 gallons of product was vacuumed up. Tyree excavated soils from the sides and bottom of the grave and soil samples were collected. A 4" diameter PVC soil vapor extraction point was installed in the UST grave. The two other USTs were removed without damage, soils were excavated from both graves and stock piled. All soil samples were analyzed for TPH (EPA 418.1), VOCs (EPA 8240), and lead (TCLP). Lead in sample 03 was above the GA PMC (0.06 mg/L), TPH in sample 04 was above the GB PMC (3,040 mg/L). A SVE point was installed in the both UST graves. A total of 150 cubic yards of soils were removed. Groundwater Technology recommends a pilot study of the SVE points.

**Action:** Phase III Environmental Site Assessment  
**Date Issued:** 28-FEB-08  
**Date Due:**  
**Date Received:** 21-NOV-08  
**Comments:** Phase III Environmental Site Assessment Mobile Service Station No. 01-109 (Z. Smith, L. Smith, and E. Henry) Kleinfelder: Identified 6 areas that may have been impacted during Phase I:  
1: Current, former and historic gasoline UST area and associated piping

- 2: Current and former dispenser area
- 3: Current and former fuel-oil UST area
- 4: Historic gasoline UST area
- 5: Historic fuel-oil UST area
- 6: Historic gasoline UST fill area

4 soil borings were advanced and two were completed as MWs. One of the MW was a nested well. Soil samples were collected and analyzed for VOCs (EPA 8260), SVOCs (EPA 8270), lead (total), and ETPH (CT ETPH). GW samples were collected and analyzed VOCs (EPA 8260), SVOCs (EPA 8270), lead (total), and ETPH (CT ETPH). COCs were detected in all 7 areas of concern. Only Area #5 reached the RSRs. Results include:

- 1: Current, former and historic gasoline UST area and associated piping  $\zeta$  no gasoline related COCs above the RSRs for soil. VOC and/or ETPH detected in above the RSRs in two MWs.
- 2: Current and former dispenser area  $\zeta$  one soil sample had VOCs that exceeded the GA PMC, all other COCs were below the RSRs. VOCs were detected in 3 MWs above the RSRs.
- 3: Current and former fuel-oil UST area  $\zeta$  One soil sample had VOCs above the RSRs, all others were below RSRs. VOC and ETPH were detected above RSRs in GW.
- 4: Historic gasoline UST area  $\zeta$  COCs in soils were all below RSRs. Only 3 MW had COCs (VOCs) that exceeded the RSRs.
- 5: Historic fuel-oil UST area - Soils had COCs below RSRs. GW had COCs below the RSRs
- 6: Historic gasoline UST fill area  $\zeta$  one soil sample had VOCs above RSRs. 3 MW had VOCs and/or ETPH above the RSRs.

Significant Data Gaps exist: source and distribution of SVOCs in soils is not delineated. Extent of GW impact in areas 1, 3, and 6 is not fully delineated. Soil impact in are 2 is not delineated. AVOC extents in area 2 are not delineated.

# Appendix: Database Descriptions

*Ecolog Environmental Risk Information Services Ltd (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

## **Standard Environmental Record Sources**

### **Federal**

#### **National Priority List:**

[NPL](#)

National Priorities List (Superfund)-NPL: EPA's list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Please see our NPL Polygon data for site boundary information.

**Government Publication Date: Oct 25, 2013**

#### **National Priority List - Proposed:**

[PROPOSED NPL](#)

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment

**Government Publication Date: Oct 25, 2013**

#### **Delisted NPL:**

[DELISTED NPL](#)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

**Government Publication Date: Oct 25, 2013**

#### **Comprehensive Environmental Response, Compensation and Liability Information System- CERCLIS:**

[CERCLIS](#)

CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

**Government Publication Date: Oct 25, 2013**

**CERCLIS - No Further Remedial Action Planned:**

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

*Government Publication Date: Oct 25, 2013*

**CERCLIS Liens:**

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner (see topic CERCLA "Superfund" Liens).

*Government Publication Date: Mar 2013*

**RCRA CORRACTS- Corrective Action:**

[RCRA CORRACTS](#)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984.

RCRA (Corrective Action Program) requires TSD owners and operators to investigate and cleanup hazardous waste releases at hazardous waste facilities. The RCRA Corrective Action Program allows these facilities to address the investigation and cleanup of these hazardous releases themselves.

RCRA Corrective Action facilities include many current and former chemical manufacturing plants, oil refineries, lead smelters, wood preservers, steel mills, commercial landfills, and a variety of other types of entities. Due to poor practices prior to environmental regulations, Corrective Action facilities have left large stretches of river sediments laden with PCBs; deposited lead in residential yards and parks beyond site boundaries; polluted drinking water wells in rural areas with chlorinated solvents; tainted municipal water supplies used by millions; and introduced mercury into waterways, necessitating fish advisories. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

*Government Publication Date: Feb 11, 2014*

**RCRA non-CORRACTS TSD Facilities:**

[RCRA TSD](#)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

*Government Publication Date: Feb 11, 2014*

**RCRA Generator List:**

[RCRA GEN](#)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Generators are divided into three categories based upon the quantity of waste they produce:

1. Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste, more than 1 kilogram per month of acutely hazardous waste, or more than 100 kilograms per month of acute spill residue or soil.
2. Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.
3. Conditionally Exempt Small Quantity Generators (CESQGs) generate 100 kilograms or less per month of hazardous waste, or 1 kilogram or less per month of acutely hazardous waste, or less than 100 kilograms per month of acute spill residue or soil.

**RCRA Non-Generators:**

[RCRA NON GEN](#)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Feb 11, 2014

**Federal Engineering Controls-ECs:**

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property.

Government Publication Date: Jul 2013

**Federal Institutional Controls- ICs:**

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. For instance, zoning restrictions prevent site land uses, like residential uses, that are not consistent with the level of cleanup.

Government Publication Date: Jul 2013

**Emergency Response Notification System:**

[ERNS 1982-1986](#)

Database of oil and hazardous substances spill reports controlled by the The National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting all oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

**Emergency Response Notification System:**

[ERNS 1987-1989](#)

Database of oil and hazardous substances spill reports controlled by the The National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting all oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

**Emergency Response Notification System:**

[ERNS](#)

Database of oil and hazardous substances spill reports controlled by the The National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting all oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: Dec 2012

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES)**

[FED BROWNFIELDS](#)

**Brownfield Database:**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands.

Government Publication Date: Mar 21, 2014

**State**

**Inventory of Hazardous Waste Disposal Sites:**

SHWS

State Hazardous Waste Sites (State Equivalent CERLIS). These are sites which may pose a threat to the environment or public health and are listed on the Inventory of Hazardous Waste Disposal Sites ("the Inventory"), pursuant to section 22a-133c of the Connecticut General Statutes (CGS).

*Government Publication Date: Jun 2013*

**Active and Inactive Landfills:**

SWF/LF

Listing of Solid Waste Facilities and Landfills in the state.

*Government Publication Date: Jun 2013*

**Leaking Underground Storage Tanks:**

LUST

The Connecticut Department of Energy and Environmental Protection (DEEP) Leaking Underground Storage Tank Database. This database is a list of leaking underground storage tanks reported to the DEEP. It includes information gathered by DEEP personnel during the initial report of the release and site visit. It does not track the status of a site over the long term.

*Government Publication Date: Jul 2013*

**Underground Storage Tank Facilities:**

UST

List of Underground Storage Tanks registered with the Department of Energy and Environmental Protection.

*Government Publication Date: Jul 2013*

**Marine Terminals:**

AST

List of facilities licensed under the Department of Energy & Environmental Protection (DEEP) Marine Terminals licensing program. Sections 22a-449(b) and (c) of the Connecticut General Statutes (CGS) require that all owners or operators of terminals which receive petroleum or hazardous chemical liquid products from waterborne vessels or dispense such products to vessels apply for a license.

*Government Publication Date: Jun 2013*

**Environmental Land Use Restriction (ELUR):**

AUL

An Environmental Land Use Restriction (ELUR) is an easement granted to the Commissioner of the Department of Energy and Environmental Protection (DEEP) by the property owner that is recorded on the municipal land records. The purpose of an ELUR is to minimize the risk of human exposure to pollutants and hazards to the environment by preventing specific uses or activities at a property or a portion of a property. An ELUR is a tool which permits the remedial goals for a property to be dependent on the exposure risk associated with its use.

*Government Publication Date: Jun 2013*

**Voluntary Remediation Sites:**

VCP

Sites involved in the Department of Energy and Environmental Protection (DEEP) Voluntary Remediation Program. There are two voluntary remediation programs in Connecticut under Connecticut General Statutes (CGS) sections 22a-133x and 22a-133y. Both programs are an elective process for property owners who wish to expedite the remediation of polluted property, thus enabling them the advantage of a remediated site should they ever decide to sell the property.

*Government Publication Date: Jun 2013*

**DEEP Brownfields Inventory:**

BROWNFIELDS

Inventory of brownfields sites maintained by the Department of Energy and Environmental Protection (DEEP). A brownfield is defined by Connecticut General Statutes §32-9kk(a)(1) as "any abandoned or underutilized site where redevelopment, reuse or expansion has not occurred due to the presence or potential presence of pollution in the buildings, soil or groundwater that requires investigation or remediation before or in conjunction with the restoration, redevelopment, reuse and expansion of the property."

*Government Publication Date: Jun 2013*

**CBRA Brownfields:**

CBRA BRWN

The Connecticut Brownfields Redevelopment Authority (CBRA) is a wholly owned subsidiary of the Connecticut Development Authority and provides: Direct and Indirect Financial Assistance for Brownfields Remediation; Direct Loans; Loan Guarantees made in concert with qualifying financial Institutions; Tax Increment Financing (TIF) for brownfields redevelopment and information technology projects; Issue Bonds.

*Government Publication Date: Mar 2013*

**Tribal**

**Leaking Underground Storage Tanks on Indian Lands:**

ILST

Leaking USTs on Tribal/Indian Lands in Region 1, which includes Connecticut, Massachusetts, Maine, New Hampshire, Rhode Island, and Vermont.

*Government Publication Date: Aug 13, 2013*

**Underground Storage Tanks on Indian Lands:**

IUST

USTs on Tribal/Indian Lands in Region 1, which includes Connecticut, Massachusetts, Maine, New Hampshire, Rhode Island, and Vermont.

*Government Publication Date: Aug 13, 2013*

**Voluntary Cleanup Priority Listing on Indian Lands:**

INDIAN VCP

Voluntary Cleanups of Priority Sites located on Indian Land in Region 1, which includes Connecticut.

*Government Publication Date: Mar 8, 2011*

**County**

*No County standard environmental record sources available for this State.*

**Additional Environmental Record Sources**

**Federal**

**Facility Registry Service/Facility Index:**

FINDS/FRS

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

*Government Publication Date: Dec 5, 2013*

**Toxics Release Inventory (TRI) Program:**

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

*Government Publication Date: 1987-2012*

**Hazardous Materials Information Reporting System:**

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

*Government Publication Date: Mar 16, 2014*

**National Clandestine Drug Labs:**

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

*Government Publication Date: Feb 4, 2014*

**Inventory of Open Dumps, June 1985:**

[ODI](#)

The Resource Conservation and Recovery Act (RCRA of the Act) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257)

*Government Publication Date: Jun 1985*

**EPA Report on the Status of Open Dumps on Indian Lands:**

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

*Government Publication Date: Dec 31, 1998*

**Environmental Property Liens Recorded:**

[LIENS](#)

The Department of Energy and Environmental Protection (DEEP) Bureau of Financial & Support Services maintains the Environmental Property Liens Recorded Database. The Connecticut General Statutes (CGS) allow the State of Connecticut to claim a lien for any amount paid by the Commissioner of the DEEP to contain and remove or mitigate the effects of a spill on real property.

*Government Publication Date: May 2013*

**Property Transfer Sites:**

[CT PROPERTY](#)

The Property Transfer Program, administered by the Remediation Division of the Bureau of Water Protection and Land Reuse, requires the disclosure of environmental conditions when certain real properties and/or businesses ("establishments") are transferred. When an establishment is transferred, one of eight Property Transfer Forms must be executed, and a copy of the form must be filed with the Department of Energy & Environmental Protection. When transferring an establishment where there has been a release of a hazardous waste or a hazardous substance, the parties negotiate who will sign the Property Transfer Form as the Certifying Party to investigate the parcel and remediate pollution caused by any release of a hazardous waste or hazardous substance from the establishment.

*Government Publication Date: Jun 2013*

**Spill Incident Tracking System (SITS):**

[SPILLS](#)

List of incident sites recorded in the Spill Incident Tracking System (SITS), maintained by the Connecticut Department of Energy and Environmental Protection (DEEP) Emergency Response Unit. Chapter 446k Section 22a-450 of the Connecticut General Statutes requires that all incidents of discharge, spillage, uncontrolled loss, seepage or filtration of oil or petroleum or chemical liquids or solid, liquid or gaseous products or hazardous wastes be reported to the DEEP.

*Government Publication Date: JUL 17, 2013*

**Hazardous Waste Manifest Data:**

[CT MANIFEST](#)

All shipments of hazardous waste within, into, or from Connecticut require the use of a federal hazardous waste manifest form. The manifest form contains information about: the facility where the waste was generated; the waste generated and its transportation; and the treatment, storage, and disposal facility (TSDF) accepting the shipment. This is a list of waste manifests and associated waste generating facilities; the data is gathered and maintained by the Connecticut Department of Energy and Environmental Protection (DEEP) Hazardous Waste Management program.

**Government Publication Date: Jul 30, 2013**

**Hazardous Waste Manifest Data - Treatment, Storage, and Disposal Facilities:**

[CT MANIFEST TSDF](#)

All shipments of hazardous waste within, into, or from Connecticut require the use of a federal hazardous waste manifest form. The manifest form contains information about: the facility where the waste was generated; the waste generated and its transportation; and the treatment, storage, and disposal facility (TSDF) accepting the shipment. This is a list of TSDF locations in the state of Connecticut who have been recorded within the manifest data (CT MANIFEST) as a receiver of waste.

**Government Publication Date: Jul 30, 2013**

**Hazardous Waste Handlers:**

[CT HAZ HANDLERS](#)

As a part of their Hazardous Waste Manifest database, the Connecticut Department of Energy and Environmental Protection (DEEP) Hazardous Waste Management program keeps a listing of Hazardous Waste Handlers and their status as a generator, transporter, or treatment, storage, and disposal facility (TSDF). This is a list of generator and TSDF facilities which do not have associated records in the Hazardous Waste Manifest Data.

**Government Publication Date: Oct 7, 2013**

**Tribal**

*No Tribal additional environmental record sources available for this State.*

**County**

*No County additional environmental record sources available for this State.*

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries". All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and were included as reference.
