CIAF COVER FABRICATION SPECIFICATIONS

Fabric - The CIAF Cover shall be fabricated from White-Coated Polyester Fabric conforming to the following minimum requirements: Fabric Weight-4 oz/lyr, Fabric Weight-6 oz/lyr, Fabric Weight-8 oz/lyr, Fabric Weight-12 oz/lyr, Fabric Weight-16 oz/lyr, and Fabric Weight-20 oz/lyr. The fabric shall be pre-shrunk and treated to resist fading and discoloration. A sample of the pre-shrunk fabric shall be submitted for approval prior to its use for the CIAF Cover.

Staples - The CIAF Cover staples shall be placed and trimmed to the Cover Fabric in the configuration shown. The staples shall be fabricated from 3/16" black staples, which shall be included with the cover when the cover is shipped. The staples shall be securely fastened to the cover fabric with cloth or natural color, flat washers, and nails. The staples shall be driven to the full length of the staple pins and in conformance with the configuration shown below. Vertical stitching shall be used throughout the CIAF Cover with a size of 1/2 per inch. All loose thread ends shall be securely tied to prevent unraveling.

Cover - The cover shall be made of white 1/16" thick material and be fabricated in the configuration shown below. The cover shall be fastened to the cover fabric with a size of 1/2 per inch. All loose thread ends shall be securely tied to prevent unraveling.
