Since Construction Engineering and Insp. (Facilities) is a prequalification requirement for this assignment, these selections are exempt from the recent selection criteria.

The Department is seeking to engage four (4) prequalified consultant engineering firms to provide task-based Construction Engineering and Inspection services to support the various district offices throughout the state. The selected firms will be required to provide services on short notice, for inspection and administrative duties due to the scheduled in-house construction workload, unexpected schedule changes, or when portions of the project require specialized services. The scope of services may vary from task to task and may include construction engineering and inspection of an entire project, supplementing state inspection forces on a project, inspection of multiple projects of similar size and scope, or providing technical administration support for construction inspection activities. It is anticipated that two of the selected firms will provide services for Districts 1, 1A, and 4, and the other two firms will serve Districts 2, 3, and 3A. If a project requires specific qualifications, personnel or expertise which the firms assigned to that district do not possess, the Office of Construction may utilize the services of the firms assigned to the other districts.

2298 Replacement of Bridge #01843, CT 34 O/Stevenson Dam & Housatonic River 1

The Department is seeking to engage one (1) consultant engineering firm to provide design services for the preparation of contract plans, specifications, estimates and other necessary documents for the replacement of Bridge #01843, CT 34 over Stevenson Dam and the Housatonic River in the Towns of Monroe and Oxford.
The purpose of this project is to replace the structurally deficient and functionally obsolete bridge. Normal maintenance and limited scope projects to the existing structure have not raised the overall rating for the bridge. Replacement will be on a new alignment to improve the inadequate geometry of the roadway approaches and improve safety for all roadway users.

**2299  Construction Engineering and Inspection Services for Project No. 138-249**

The Department is seeking to engage one (1) consultant engineering firm to provide Construction Engineering and Inspection services for the following project:

**Project No. 0102-0348** – Rehabilitation of Bridge #00059 – Yankee Doodle Bridge over Norwalk River and median barrier replacement. This contract is scheduled to be advertised on November 22, 2017, with a scope of “K”.

**2300  Construction Engineering and Inspection Services for Project Nos. 174-403 & 402**

The Department is seeking to engage one (1) consultant engineering firm to provide Construction Engineering and Inspection services for the following projects:

**Project No. 0174-0402** – Preservation Work on Various Non-NHS Bridges in Various Towns in District 4. This project is to address the beam ends and replace bearings for the following Non-NHS bridges. Br. #01161 - Christian Lane over I-84, Middlebury; Br. #01159 - Bullet Hill Road over I-84, Southbury; Br. #00468 - Rte. 222 Naugatuck River overflow. This contract is scheduled to be advertised on August 23, 2017, with a scope of “F”.
Solicitations Look Ahead

Project No. 0174-0403 – Preservation Work on Various NHS Bridges in Various Towns in District 4. This project is to address the beam ends and replace bearings for the following NHS bridges. Br. #01151 - I-84 WB over Rte. 172, Southbury; Br. #01162 - I-84 EB over Long Meadow Road, Middlebury; Br. #01168 - I-84 EB over Bioski Road, Middlebury; Br. #00429 - Rte. 4 over Farmington River, Farmington; Br. #03485 - I-84 EB over Woodruff Road, Farmington; Br. #03495 - I-84 over Rte. 6 EB and SR 531, Farmington; Br. #03497 - I-84 WB over SR508, Farmington; Br. #02988 - I-84 Ramp 031 over I-84 WB, Newtown; Br. #02987 - I-84 Ramp 031 over I-84 EB and I-84 Ramp 028, Newtown. This contract is scheduled to be advertised on August 23, 2017, with a scope of “J”

The total combined scope code for these projects is “K”.

2301 Design Services for Embankment and Track Stabilization,
Project No. 302-0023

The Department is seeking to engage one (1) consultant engineering firm to design stabilization measures for two (2) sections of railroad embankment along the Danbury Branch of the New Haven Line (at Mile Post 7.87 and 19). Site 1 is a 200ft long, 20ft tall section of embankment along the Norwalk River in the Town of Wilton. Site 2 is a 300ft long, 15ft tall section of embankment along Sympaug Pond in the Town of Bethel. Both sections of embankment show signs of vertical and horizontal movement requiring regular regrading to maintain rail alignment. A preliminary investigation has recommended the construction of a retaining wall at both sites as well as a relief culvert through the rail embankment at Site 2. The selected firm must provide all necessary design documents for the construction of the repairs.

2302 Construction Engineering and Inspection Services for Project No. 138-249

The Department is seeking to engage one (1) consultant engineering firm to provide Construction Engineering and Inspection services for the following project:
Project No. 0138-0249 – Breakout project to complete construction of the Moses Wheeler Bridge which was impacted by asbestos contamination. Items of work which are included in this project are: Removal of the remaining sections of the temporary work trestle in the Housatonic River, the creation of Wetland #1 in Stratford and Wetland #3A in Milford, and the boat launch ramp, docks and approach roadway in Milford. This contract is scheduled to be advertised on November 15, 2017, with a scope of “H”. Review information/plans are not available at this time.
